Re: Request for Information Pursuant to Section 104 of

CERCLA for the Downers Grove Groundwater Site in

Downers Grove, DuPage County, Illinois

Dear Ms. Ropski:

In our capacity as counsel to Morey Corporation ("Morey Corp.") we have prepared on Morey Corp.'s behalf the following Response to U.S. EPA's Request for Information Pursuant to Section 104 of CERCLA for the Downers Grove Groundwater Site in Downers Grove, DuPage County, Illinois, dated April 18, 2002. Under cover of this letter, please find enclosed documents bearing the Bates stamp range MOR 000001-MOR 001390 and MOR 001425-MOR 001556. Documents in the range MOR 001391-MOR 1424 are being sent simultaneously under separate cover in an oversize document tube. This set of documents is identical to a set produced to Illinois EPA ("IEPA") in response to an information request that was also related to the Downers Grove Groundwater Site investigation, with the addition of five (5) additional pages numbered MOR 001552-MOR 001556.

The following responses correspond to the numbered requests contained in the information request:

CLIENT/MATTER NUMBER 087656-0114

FOLEY LARDNER

Carol Ropski May 10, 2002 Page 2

1. Identify all persons consulted in the preparation of the answers to these Information Requests.

Response: Current employees of Morey Corp., 100 Morey Drive, Woodridge, Illinois, 60517, (630) 754-2300: Dana Morey Vice-President; Jay Morey, Vice-President; Vincent Petrella, CFO; Fred Pfeiffer, Safety Manager; Jonathan Rausch, Director of Materials Purchasing; Theresa Cunningham, Purchasing Agent; Bill Prasch, Director of Manufacturing; Chris Murphy, Director of Test Engineering; Bogdan Buczek, Plant Engineer; Wayne Dial, Sales Manager; and Ed Hollowed, Chief Engineer. Former employee: Patricia Jurinek, Morey Corp.'s Purchasing Manager from 1979 through 1992, 9 S. 737 William Drive, Hinsdale, IL 60527; Phone (630) 243-6430. Counsel: Gary Rovner, Foley & Lardner, Three First National Plaza, 70 West Madison, Chicago, IL 60602 and Jeff Zimmerman, Foley & Lardner, 3000 K Street, N.W., Suite 500, Washington, D.C. 20007.

2. Identify all documents consulted, examined, or referred to in the preparation of the answers to these Requests, and provide copies of all such documents.

Response: The documents that we examined in preparation of the answers to this information request were, for the most part, the same documents that we identified and provided to the Illinois Environmental Protection Agency, Bureau of Land, in response to its information request regarding the Downers Grove groundwater investigation, dated October 3, 2001. Copies of these documents, bearing the Bates stamp range MOR 000001-MOR 001551, are enclosed. In addition, we obtained information from one of Morey Corp.'s vendors regarding four potting

FOLEY LARDNER

Carol Ropski May 10, 2002 Page 3

machines purchase from that vendor between 1986 and 1991. Copies of these additional documents, bearing the Bates stamp range MOR 001552 – MOR 001556, are enclosed.

3. If you have reason to believe that there may be persons able to provide a more detailed or complete response to any Information Request or who may be able to provide additional responsive documents, identify such persons.

Response: By an agreement dated January 9, 2001 (See MOR 000211 and following) Morey Corporation's parent company, MC Holdings Corporation/Morey Realty Group, Inc. ("MC Holdings") sold the portion of the subject property containing Morey Corp.'s Facility to Ross and Barbara Johnson of Johnson Printing, 2659 Wisconsin Avenue, Downers Grove, Illinois. The current owners may have additional information not in the control of Morey Corporation about current activities at the Facility. In addition, individuals previously with Montgomery Ward, which leased part of the facility located at 2659 Wisconsin Avenue, Downers Grove, IL, may have more information related to the underground storage tank installed, used, and removed by Montgomery Ward. We do not have names or contact information for any such individuals.

4. Have you conducted any Phase I or Phase II investigations at your property? If so, please send copies of all reports including the analytical data.

Response: Morey Corp. has produced the following, which represents all reports in its possession relating to the facility: (1) A Focused Site Investigation & Remedial Action Completion Report (Addendum) (MOR 000012-000040) prepared by Pioneer Environmental, Inc. and dated January 23, 2001; (2) A Focused Site Investigation & Remedial Action

FOLEY: LARDNER

Carol Ropski May 10, 2002 Page 4

Completion Report (MOR 000042-000210) dated November 8, 2000; and (3) A Phase II Subsurface Investigation Report prepared by Environmental Management and Resource Consultants, Inc. (ENMARC) dated May 18 and June 2, 2000 (MOR 000589-000629).

5. Are there any monitoring wells on your property? If so, provide a map and the analytical results of the samples that were collected. Identify the entity that installed the monitoring wells and the date(s) of the well installations.

Response: To the best of the knowledge of those who participated in preparing this response letter, the property does not have and never has had any groundwater wells.

6. Have any soil borings been collected on your property. If so, send a map and analytical results related to the borings that were collected. Identify the entity that performed the soil borings and the date(s) in which they were taken.

Response: Yes, a total of 17 soil borings were conducted by Pioneer Environmental, Inc., in connection with the Focused Site Investigation & Remedial Action Completion Report (MOR 000042-000210) dated November 8, 2000, and with the Focused Site Investigation & Remedial Action Report (Addendum) (MOR 000012-000040) dated January 23, 2001. Fifteen of these soil borings were conducted on August 28 and 29, 2000 (see, MOR 000050). The sixteenth and seventeenth borings were conducted on January 2, 2001 (see, MOR 000015). While both reports include location maps and analytical results, the more recent report includes a map showing all the boring location on one page at MOR 000018 and all analytical results in one table at MOR 000020-21.

FOLEY : LARDNER

Carol Ropski May 10, 2002 Page 5

7. Have there ever been above ground or below ground storage tanks at your facility? If so, provide maps of the locations of the tanks. What was stored in each tank? If the tanks have been removed or replaced provide the date(s) of their removal or replacement. Provide copies of any analytical results of the contents of the tanks and analytical results of any samples taken of the soil surrounding or below the tanks.

Response: Morey Corporation has never installed or used any above ground or underground storage tanks either inside or outside the building located on this property. Based on information and belief, Morey Corporation understands that its tenant, Montgomery Ward, installed and ultimately removed an underground storage tank (UST) on this property. It is believed that this tank was used to store fuel for their vehicles. It is our understanding that removal of the UST occurred prior to the expiration of the Montgomery Ward lease. It is also our understanding based on the information available to us, that the tank was removed in accordance with all applicable state and federal regulations, but Morey Corp. does not have access to any written information or reports related to the use or the removal of this tank. The company has no reason to believe that any leakage of petroleum products occurred from the time the UST was installed through its removal.

8. Describe your company's solvent management system (including the locations of your product and waste holding tanks, drums and containers) at your facility prior to 1980.

Response: Morey Corp. has always used this facility for the manufacture of small electrical and mechanical assemblies (i.e. circuit board assemblies) primarily for use in automotive and telecommunication assemblies. Its processes required the use of relatively small amounts of hazardous materials and/or substances. Morey Corp. has no records or other

FOLEY ! LARDNER

Carol Ropski May 10, 2002 Page 6

information available to it to determine precisely what the solvent management system at this facility was prior to 1980, but has interviewed current and former employees, Fred Pfeiffer, Ed Hollowed and Patricia Jurinek, who collectively provided the following anecdotal information about solvent management system. Prior to 1980, Morey Corp primarily used Freon as a solvent in a parts washer. Paint thinner was also used in very small quantities by dampening a rag and wiping or by using a small artists paint brush to apply thinner to an area where solder flux needed to be removed. Additionally, isopropyl alcohol was also used for the same types of small cleaning purposes. All of these chemicals were purchased using a hand written purchase requisition. When solvent material was received, it was catalogued, inspected for any damage and stored. The material was segregated from other materials and beginning in 1973 stored in a locked fire room. Freon was stored in 55 gallon drums. The thinner and alcohol were stored in the containers that they came in. When thinner or alcohol needed to be used, it was transferred out of the containers in the fire room into small cans which were designed so that, by pushing down on the top of the can, a small amount of the liquid inside would flow into the concave top of the can to be absorbed by a brush or rag. Excess thinner and alcohol evaporated from the top of the small cans and the parts on which they were used.

According to Morey Corp.'s written records (which date back to 1992), hazardous materials arrive at the Facility via the receiving department at a loading dock. All materials received are inspected to verify content, bar coded and sent to a fireproofed, vented fire room (located immediately adjacent to the loading dock) for storage. Any liquid chemical wastes

FOLEY : LARDNER

Carol Ropski

May 10, 2002

Page 7

(such as waste solder flux, thinners, and humiseal) are stored in 55-gallon enclosed drums and

are stored in the fire room. Pursuant to the company's waste handling policies, liquid wastes are

carried from the work stations to the fire room and placed in sealed waste drums. The waste

drums are routinely inspected by the Safety Manager, Mr. Fred Pfeiffer. When a drum is nearly

full (depending on use, from around every two to four weeks during the 1980s and before and,

more recently, every few months), Mr. Pfeiffer calls the waste disposal company. The liquid

wastes are disposed through the services of a third-party contractor, Environmental Waste

Services, Inc., 43 West 540 Main Street Road, Elburg, IL. The fire room is identified on the

architectural drawings as "storage room." See, e.g. MOR 001409, MOR 001415, MOR 001419.

9. Describe your company's waste solvent handling and disposal practices prior

to 1980.

Response: Morey Corp. has no specific information regarding its waste solvent

handling and disposal system practices prior to 1980, but, based on information obtained from

company personnel, there was very little need for disposal of solvents prior to 1980, because the

manufacturing processes were such that very few solvents were used. Freon was the primary

solvent used. The company no longer has any records regarding the disposition of used Freon.

In discussions with several employees, including, Dana Morey, Jay Morey, William Prasch and

Wayne Dial, we have determined that, approximately once a month, the Freon from the parts

washer tank was pumped into special drums (metal, 55 gallon), for removal and recycling. The

equipment was manufactured by Baron Blakeslee. The new and used Freon was stored in the

FOLEY LARDNER

Carol Ropski May 10, 2002 Page 8

fire room. Morey Corp has searched extensively but has not been able to locate records of the company that supplied new Freon, or removed and recycled the used Freon.

Prior to 1980, the company also used small quantities of paint thinner and isopropyl alcohol. Containers of new materials of this type were stored in the fire room. Ms. Jurinek, who was employed by Morey Corp. in 1973 and was in charge of purchasing and assisted in disposal activities beginning in 1979, verified that disposal practices dating back to 1979 were very much in line with current practices. Used solvents were stored in a sealed 55-gallon drum in the fire room, and as it became near to full, the drum was disposed of by a third party contractor. To the best of her recollection, a 55-gallon drum was filled with waste solvents and disposed of at most every two to four weeks.

10. Provide the names of your solvent suppliers, years of service, and quantities of solvents received since you have been at this location.

Response:

The companies and product names listed below are for solvents for which Morey Corp. has current MSDS materials and therefore are solvents that the company either does or may use today. Quantity information, to the extent available from company records is summarized after this table.

Solvent Suppliers, Products, and Quantities Received Since 1992

Company	Product Name	Bates numbers		
Markem Corporation	320 Cleaner	MOR 000688-694

Unknown	Paint thinner	n/a		
Unknown	Trichloroethylene	n/a		

FOLEY LARDNER

Carol Ropski May 10, 2002

Page 10

Based on anecdotal information obtained from company personnel (see discussion in the

response to Question 8 above), Morey Corp. had a parts washer that used Freon to clean small

parts and assemblies made by the company. While we do not know when Freon use began, we

believe it was discontinued in the mid-1980s. We have no quantity information regarding Freon

purchases. Based on this same information, the company also used small quantities of isopropyl

alcohol and paint thinner for cleaning parts assemblies during the manufacturing process, a s

described above in the response to Question 8.

Starting in 1986, Morey Corp. added equipment known as "potting machines" for use on

certain products it produced. Records we obtained from the manufacturer of these machines

indicate that Morey Corp. purchased the first of these machines in April 1986, a second in

September 1988, a third in August 1989, and a fourth in January 1991. MOR 001552-0001556.

These machines mixed a two part epoxy compound and pumped the mixture into electronic

component parts to insulate and seal the electronics in place once the epoxy mix cured. The

tubing that dispensed the mixed epoxy had to be cleaned with a solvent at the end of each work

day so that no epoxy residue would be left behind to block the tubing. Based on information and

belief, from April 1986 until May 1990, trichloroethylene (TCE) was used to clean the tubing, by

a closed loop system built into each machine that passed the TCE from a small (3-5 gallon)

holding tank, through the tubing, and back into the holding tank. Periodically, when the epoxy

residue in the tank reached a level where the solvent effect was diminished, the TCE would be

transferred into a 55 gallon waste solvent drum stored for approximately one month in the fire

FOLEY: LARDNER

Carol Ropski

May 10, 2002

Page 11

room until it was nearly full. It would then be removed by a solvent handler for offsite recycling.

TCE was only used in these potting machines. There was no other use of TCE at the facility.

Sometime prior to May 1990 (the exact date is unclear), DBE Solvent was substituted for TCE

in this equipment and TCE use at the facility ceased.

The only purchaser records Morey Corp. has for solvent materials are from 1992 forward.

This period, under the heading "Gen Alcohol," the purchase records (MOR 001511-1519) show

a total of 1009 containers (5 gallons each) were purchased for a total of 5045 gallons of solvent.

Over this same period, under the heading "Gen. Thinner Conformal," the purchase records

(MOR 001449-0001451, MOR 001460-0001467) show a total of 1240 containers (5 gallons

each) were purchased for a total of 6200 gallons of solvent. Finally, for this period, under the

heading "Gen. Thinner (No Clean)," the purchase records (MOR 001452-1459) show a total of

300 containers (5 gallons each) were purchased for a total of 1500 gallons of solvent. Morey

Corp. has no purchase records for either the Freon used in the parts washer or the TCE used in

the potting machines. Similarly, there are no records to quantify the amount of isopropyl alcohol

or paint thinner used during or prior to the 1980s.

11. Provide the names of your waste solvent handlers, years of service, and

quantities of waste shipped since you have been in service at this location.

Response: Since 1992, all waste solvents have been handled by Environmental Waste

Services, Inc., located at 43 W 540C Main Street Rd., Elburn, IL 60119. See MOR 000643.

011.489401.1

FOLEY LARDNER

Carol Ropski May 10, 2002 Page 12

Morey Corp.'s hazardous waste manifest records (MOR 000299-MOR 000567) show that 4515 gallons of solvent waste have been shipped from the site. As noted in the responses to Questions 9 and 10 above, we have no information to identify the names of the solvent handlers for any of the waste solvent materials prior to 1992.

12. Provide drawings or diagrams of your sanitary and storm water sewer system at your facility.

Response: The sanitary and storm sewer systems are shown on Architectural drawing P-1 dated 3-16-73 (MOR 001419).

13. Provide a copy of all correspondence between yourself and each unit of local government regarding discharges into St. Joseph Creek and the municipal sewer.

Response: To the best of our knowledge, there is no correspondence between Morey Corp. and any unit of local government regarding discharges into St. Joseph Creek or the municipal sewer.

14. Describe the function of any floor drains at the facility. Provide a map of each floor drain location. Describe where the floor drains and associated piping drain to.

Response: To the best of our knowledge, there is one floor drain at this facility. This drain runs from the fire room to the outside of the building at the facility and is identified as a 4" pipe connected to a "scupper drain" on Sheet S-2 dated 3-16-73 (MOR 001418) and noted on

FOLEY#LARDNER

Carol Ropski May 10, 2002

Page 13

Sheet A-2 dated 3-16-73 (MOR 001415). This scupper drain was intended to drain any liquids

that might be present on the floor of the fire room. The area around this drain was investigated

and remediated in 2000/2001, and a No Further Remediation Letter was received at the

completion of that project, see MOR 000001-000010.

FOLEY LARDNER

Re:

0430305029/DuPage

Downers Grove/Morey Corporation

Site Remediation Program/Technical Reports

Dear Mr. Morey:

The Focused Site Investigation & Remedial Action Completion Report (November 8, 2000/00-4399), and the addendum to the report (January 23, 2001/01-0286) as prepared by Pioneer Environmental, Inc. for the Morey Corporation property, has been reviewed by the Illinois Environmental Protection Agency ("Illinois EPA") and demonstrates that the remedial action was completed in accordance with the Focused Site Investigation & Remedial Action Completion Report (November 8, 2000/00-4399), and the addendum to the report (January 23, 2000/01-0286).

The Remediation Site, consisting of 0.03 acres, is located at 2659 Wisconsin Street, Downers Grove, Illinois. Pursuant to Section 58.10 of the Illinois Environmental Protection Act ("Act") (415 ILCS 5/1 et seq.), your request for a no further remediation determination is granted under the conditions and terms specified in this letter. The Remediation Applicant, as identified on the Illinois EPA's Site Remediation Program DRM-1 Form (November 13, 2000/00-4399), is Dana Morey.

This focused No Further Remediation Letter ("Letter") signifies a release from further responsibilities under the Act for the performance of the approved remedial action. This Letter shall be considered prima facie evidence that the Remediation Site described in the attached Illinois EPA Site Remediation Program Environmental Notice and shown in the attached Site Base Map does not constitute a threat to human health and the environment for the specified recognized environmental conditions so long as the Site is utilized in accordance with the terms of this Letter.

GEORGE H. RYAN, GOVERNOR

Conditions and Terms of Approval

Level of Remediation and Land Use Limitations

- 1) The recognized environmental conditions, as characterized by the focused site investigation, consist of the following:
 - a) Regulated substances of concern that have been successfully addressed are detailed in the attached Table A.
- 2) The Remediation Site is restricted to Industrial/Commercial land use.
- 3) The land use specified in this Letter may be revised if:
 - a) Further investigation or remedial action has been conducted that documents the attainment of objectives appropriate for the new land use; and
 - b) A new Letter is obtained and recorded in accordance with Title XVII of the Act and regulations adopted thereunder.

Preventive, Engineering, and Institutional Controls

4) The implementation and maintenance of the following controls are required as part of the approval of the remediation objectives for this Remediation Site.

Institutional Controls:

5) No person shall construct, install, maintain, or operate a water system or well on the property identified in the Environmental Notice. All water supplies and water services for the Remediation Site must be obtained from a public water supply system. The provisions of this institutional control shall be applicable to all water usage (e.g., domestic, industrial/commercial uses and outdoor watering).

Other Terms

6) Where the Remediation Applicant is not the sole owner of the Remediation Site, the Remediation Applicant shall complete the attached Property Owner Certification of the No Further Remediation Letter under the Site Remediation Program Form. This certification, by original signature of each property owner, or the authorized agent of the owner(s), of the Remediation Site or any portion thereof who is not a Remediation Applicant shall be recorded along with this Letter.

7) Further information regarding this Remediation Site can be obtained through a written request under the Freedom of Information Act (5 ILCS 140) to:

Illinois Environmental Protection Agency Attn: Freedom of Information Act Officer Bureau of Land-#24 1021 North Grand Avenue East Post Office Box 19276 Springfield, IL 62794-9276

- 8) Pursuant to Section 58.10(f) of the Act (415 ILCS 5/58.10(f)), should the Illinois EPA seek to void this Letter, the Illinois EPA shall provide notice to the current title holder and to the Remediation Applicant at the last known address. The notice shall specify the cause for the voidance, explain the provisions for appeal, and describe the facts in support of this cause. Specific acts or omissions that may result in the voidance of the Letter under Sections 58.10(e)(1)-(7) of the Act (415 ILCS 5/58.10(e)(1)-(7)) include, but shall not be limited to:
 - a) Any violation of institutional controls or the designated land use restrictions;
 - b) The failure to operate and maintain preventive or engineering controls or to comply with any applicable groundwater monitoring plan;
 - c) The disturbance or removal of contamination that has been left in-place in accordance with the Remedial Action Plan. Access to soil contamination may be allowed if, during and after any access, public health and the environment are protected consistent with the Remedial Action Plan;
 - d) The failure to comply with the recording requirements for this Letter:
 - e) Obtaining the Letter by fraud or misrepresentation;
 - f) Subsequent discovery of contaminants, not identified as part of the investigative or remedial activities upon which the issuance of the Letter was based, that pose a threat to human health or the environment;
 - g) The failure to pay the No Further Remediation Assessment Fee within forty-five (45) days after receiving a request for payment from the Illinois EPA;
 - h) The failure to pay in full the applicable fees under the Review and Evaluation Services Agreement within forty-five (45) days after receiving a request for payment from the Illinois EPA.
- 9) Pursuant to Section 58.10(d) of the Act, this Letter shall apply in favor of the following persons:
 - a) Dana Morey;
 - b) The owner and operator of the Remediation Site;
 - c) Any parent corporation or subsidiary of the owner of the Remediation Site;

7) Further information regarding this Remediation Site can be obtained through a written request under the Freedom of Information Act (5 ILCS 140) to:

Illinois Environmental Protection Agency Attn: Freedom of Information Act Officer Bureau of Land-#24 1021 North Grand Avenue East Post Office Box 19276 Springfield, IL 62794-9276

- 8) Pursuant to Section 58.10(f) of the Act (415 ILCS 5/58.10(f)), should the Illinois EPA seek to void this Letter, the Illinois EPA shall provide notice to the current title holder and to the Remediation Applicant at the last known address. The notice shall specify the cause for the voidance, explain the provisions for appeal, and describe the facts in support of this cause. Specific acts or omissions that may result in the voidance of the Letter under Sections 58.10(e)(1)-(7) of the Act (415 ILCS 5/58.10(e)(1)-(7)) include, but shall not be limited to:
 - a) Any violation of institutional controls or the designated land use restrictions;
 - b) The failure to operate and maintain preventive or engineering controls or to comply with any applicable groundwater monitoring plan;
 - c) The disturbance or removal of contamination that has been left in-place in accordance with the Remedial Action Plan. Access to soil contamination may be allowed if, during and after any access, public health and the environment are protected consistent with the Remedial Action Plan:
 - d) The failure to comply with the recording requirements for this Letter;
 - e) Obtaining the Letter by fraud or misrepresentation;
 - f) Subsequent discovery of contaminants, not identified as part of the investigative or remedial activities upon which the issuance of the Letter was based, that pose a threat to human health or the environment;
 - g) The failure to pay the No Further Remediation Assessment Fee within forty-five (45) days after receiving a request for payment from the Illinois EPA;
 - h) The failure to pay in full the applicable fees under the Review and Evaluation Services Agreement within forty-five (45) days after receiving a request for payment from the Illinois EPA.
- 9) Pursuant to Section 58.10(d) of the Act, this Letter shall apply in favor of the following persons:
 - a) Dana Morey:
 - b) The owner and operator of the Remediation Site;
 - c) Any parent corporation or subsidiary of the owner of the Remediation Site;

- d) Any co-owner, either by joint-tenancy, right of survivorship, or any other party sharing a relationship with the owner of the Remediation Site;
- e) Any holder of a beneficial interest of a land trust or inter vivos trust, whether revocable or irrevocable, involving the Remediation Site;
- f) Any mortgagee or trustee of a deed of trust of the owner of the Remediation Site or any assignee, transferee, or any successor-in-interest thereto;
- g) Any successor-in-interest of the owner of the Remediation Site;
- h) Any transferee of the owner of the Remediation Site whether the transfer was by sale, bankruptcy proceeding, partition, dissolution of marriage, settlement or adjudication of any civil action, charitable gift, or bequest;
- i) Any heir or devisee of the owner of the Remediation Site;
- j) Any financial institution, as that term is defined in Section 2 of the Illinois Banking Act and to include the Illinois Housing Development Authority, that has acquired the ownership, operation, management, or control of the Remediation Site through foreclosure or under the terms of a security interest held by the financial institution, under the terms of an extension of credit made by the financial institution, or any successor-in-interest thereto; or
- k) In the case of a fiduciary (other than a land trustee), the estate, trust estate, or other interest in property held in a fiduciary capacity, and a trustee, executor, administrator, guardian, receiver, conservator, or other person who holds the remediated site in a fiduciary capacity, or a transferee of such party.
- 10) This letter, including all attachments, must be recorded as a single instrument within forty-five (45) days of receipt with the Office of the Recorder of DuPage County. For recording purposes, the Illinois EPA Site Remediation Program Environmental Notice attached to this Letter should be the first page of the instrument filed. This Letter shall not be effective until officially recorded by the Office of the Recorder of DuPage County in accordance with Illinois law so that it forms a permanent part of the chain of title for the Morey Corporation property.
- 11) Within thirty (30) days of this Letter being recorded by the Office of the Recorder of DuPage County, a certified copy of this Letter, as recorded, shall be obtained and submitted to the Illinois EPA to:

Robert E. O'Hara
Illinois Environmental Protection Agency
Bureau of Land/RPMS
1021 North Grand Avenue East
Post Office Box 19276
Springfield, IL 62794-9276

12) In accordance with Section 58.10(g) of the Act, a No Further Remediation Assessment Fee based on the costs incurred for the Remediation Site by the Illinois EPA for review and evaluation services will be applied in addition to the fees applicable under the Review and Evaluation Services Agreement. Request for payment of the No Further Remediation Assessment Fee will be included with the billing statement.

If you have any questions regarding this correspondence, you may contact the Illinois EPA project manager, Steve McCaslin at 217-557-8085.

Sincerely

Re: FSI / RACR Addendum

0430305029 - DuPage County

2659 Wisconsin Street Downers Grove, Illinois Pioneer Project No. 00618B

Dear Mr. McCaslin:

As you requested, Pioneer Environmental, Inc. (Pioneer) has performed additional assessment work at the above captioned site in connection with our Focused Site Investigation & Remedial Action Completion Report (FSI/RACR), dated November 8, 2000, which was submitted to the Site Remediation Program for review and evaluation. Based on our telephone conversations that took place after your review of the FSI/RACR, it was agreed that two additional soil borings would be advanced in order to further define the horizontal extent of contamination to the south, the vertical extent of contamination in the source area, and to assess the contaminant conditions directly beneath the former floor drain discharge pipe. In addition, a Tier 2 Groundwater Evaluation was performed as you suggested to expedite the review and subsequent closure of this site, and the proper disposal of contaminated soil that was previously excavated from beneath the floor drain discharge pipe (i.e. source area) was also conducted. Thus, this letter discusses the procedures and results of these requested activities and is intended to serve as an addendum to Pioneer's original FSI/RACR (Addendum).

Pioneer mobilized to the site and advanced two additional soil borings, B-16 and B-17, on January 2, 2001. These borings were placed in the specific locations discussed by Pioneer and the Agency prior to mobilization to the site. The soil sampling procedures were performed in accordance with Pioneer's Standard Protocol for Subsurface Sampling as described in the original FSI/RACR and in Attachment 1 of this Addendum. The soil boring locations are shown on Figure 1 and soil boring logs are included in Attachment 1.

In order to obtain the additional data requested, Pioneer selected three soil samples from the two boring locations for analytical testing. The selected samples were then shipped overnight to an independent laboratory under standard chain-of-custody procedures, and submitted for analysis

FSI / RACR Addendum 2659 Wisconsin Street Downers Grove, Illinois January 23, 2001 Pioneer Project No. 00618B Page 2 of 3

of the appropriate targeted compounds (VOCs). The results of the laboratory analyses are summarized in Table No. 1 and copies of the laboratory reports are included in Attachment 2.

The results indicated that all contaminant concentrations detected were below the Tier 2 SROs established for the site (Appendix H of FSI/RACR). It should be noted the Tier 2 SROs calculated for the site were based on the Mass-Limit Equations (S-26, S-27 & S-28) for the inhalation exposure route and the soil component of groundwater ingestion exposure route, found in Appendix C, Table A of TACO. The results of this recent sampling event confirm that maximum contaminant concentrations detected at the site are the same as those shown in Table 4.5.1 of the original FSI/RACR.

As we also discussed, in order to expedite the overall review and closure of the site, a Tier 2 Groundwater Evaluation, pursuant to 35 IAC 742.805, is presented herein as opposed to the Tier 3 approach originally presented in the FSI/RACR. Pioneer performed the weighted average calculation as outlined in 35 IAC 742.805(c). According to Table F of Appendix A of TACO, three similar-acting carcinogenic compounds affect the liver: tetrachloroethylene (PCE), trichloroethylene (TCE), and vinyl chloride (VC). Since other target organs listed in Table F are affected by fewer than three similar-acting compounds, the weighted average calculation for liver will yield the most conservative value.

Since no actual groundwater data was collected from the site for use in calculating the weighted average and as we discussed, Pioneer predicted groundwater concentrations from maximum detected soil concentrations using Equation R-14 (Appendix H of FSI/RACR) and then calculated Tier 2 Groundwater Remediation Objectives (GROs) using Equation R-26. Given the fact that an institutional control will eliminate any exposure point on the remediation site, Pioneer used Equation R-26 to "back calculate" allowable source area concentrations to ensure Tier 1 Class I GROs will be achieved at the eastern property boundary, the nearest exposure point. Tier 2 GRO calculations are included in Attachment 3. The results of these calculations were used to determine the weighted average for liver and are summarized as follows:

Tier 2 GROs / Weighted Average Parameters

сос	Maximum Soil Concentration (Actual)	Predicted Groundwater Concentration (x _e)	Calculated Tier 2 GROs (CUOx ₄)		
Tetrachloroethylene	110,000	56,075	4,860,000		
Trichloroethylene	8,000	3,897	20,800		
cis-1,2-Dichloroethylene	3,300	5,457	24,800		
Vinyl Chloride	46	91	709		
Methylene Chloride	40	118	2.03(10 ²⁵)		

All values in parts per billion (ppb).

FSI / RACR Addendum 2659 Wisconsin Street Downers Grove, Illinois January 23, 2001 Pioneer Project No. 00618B Page 3 of 3

Using predicted groundwater concentrations as x_a values and the Tier 2 GROs as the $CUOx_a$ values, as outlined in Section 742.805(c)(1), the following equation was solved using the parameters listed above.

$$W_{ave} = \frac{x_1}{CUOx_1} + \frac{x_2}{CUOx_2} + \dots \frac{x_n}{CUOx_n}$$

The result of this calculation yielded a W_{ave} value of 0.327. Since this value is less than 1.0, remediation objectives are met for the above listed chemicals pursuant to Section 742.805(c)(1)(i). The calculation is included as Attachment 3.

The four drums of contaminated soil, which were previously excavated from beneath the floor drain discharge pipe, have been disposed of as hazardous waste. A copy of the hazardous waste manifest is included as Attachment 4. Finally, per your request, Pioneer submitted a revised Site Base Map (Figure 2) and ascertained that the site operated for approximately 35 years.

Pioneer hopes this information sufficiently addresses your comments and can allow the review and subsequent closure of this site to proceed. Pioneer appreciates your time in this matter and if you have any questions regarding any of the information presented herein, please contact me at (312) 587-1021. Further, any efforts that can be made to expedite your review of this submittal would be greatly appreciated.

Sincerely,

PIONEER ENVIRONMENTAL, INC.

Pioneer Protocol for Subsurface Soil Sampling

Soil Boring Logs

PROTOCOL FOR SUBSURFACE SOIL SAMPLING

Subsurface samples are collected by employing various soil boring techniques based on certain site specific conditions. Soil borings are performed using a Hollow or Solid Stem (site specific) auger with split-spoon sampling techniques, a hydraulic percussive split-spoon sampler, a percussive Macro-Core® barrel sampler, and/or a stainless steel hand auger. The soil sampling activities are conducted in accordance with American Society of Testing and Materials (ASTM) standards (ASTM:D 1586). Soil samples are collected with a stainless steel hand auger, a split-spoon sampler, and/or a Macro-Core® sampler at 2-3 foot intervals depending on the specific method used. In the split-spoon sampling procedures, a split-barrel sampler having either a 2-inch or 1-3/16 inch outside diameter, an inside diameter of 1-3/8 or 7/8 inches, and a length of 2.5 or 3 feet is driven into the soil to collect a representative and undisturbed sample. In the Macro-Core® barrel sampling technique, a stainless steel barrel having a 2-inch outside diameter, an inside diameter of 1-1/2 inches, and a length of 2 or 3 feet is fitted with a PVC liner and is driven into the soil to collect a representative and undisturbed sample.

The drilling is directed by a Pioneer Environmental Field Project Geologist/Engineer, who logs geologic materials encountered during drilling, field screens auger cuttings and soil samples, observes the drilling activities, and supervises sample collection. Each sample is examined in the field for odor and visual evidence of hydrocarbon or other organic contamination. The field observations are noted in the soil boring logs that are included in the Appendices.

A representative portion of each sample is placed into an unused, air-tight plastic bag which is sealed and dedicated to that discrete sample. The sample is allowed to achieve a constant temperature and the headspace above each sample is screened for volatile organic compounds (VOCs) using either a Photovac MP-1000 handheld air monitor / photoionization detector (PID) or a Photovac IS 3000 handheld air monitor / flame ionization detector (FID), depending on the nature of the targeted contaminants. The PID/FID are devices that are sensitive to a variety of VOCs. The headspace is screened by inserting the PID/FID probe into the space above the soil and recording the maximum reading of the instrument. The results of the headspace screening are also listed on the soil boring logs.

When soil samples will be laboratory tested for VOCs, one of two field sampling methods are used as required by US EPA's SW-846 Method 5035. 1) A representative portion of the sample collected in the field is placed in an EnCoreTM sampler, or equivalent, immediately after collection, with the appropriate quantity and volume of the containers determined by the scope of work and field conditions. The EnCoreTM samplers, or equivalent, are delivered to the laboratory within 48 hours of sample collection. 2) An appropriate weight of a representative portion of the sample collected in the field is placed in laboratory-provided glassware, immediately after collection, and then the appropriate preservative is added, either sodium bisulfate-for samples with estimated VOC concentrations less than 200 ppb; or methanol-for samples with estimated VOC concentrations greater than 200 ppb.

Any soil samples chosen for analysis are packed in appropriate containers, properly labeled, and shipped in a cooler on ice via a delivery service overnight to an independent laboratory under standard chain-of-custody procedures. Samples are selected based on the scope of work, field observations (i.e. visual/odor observations, elevated PID readings, etc.), other site specific conditions, and the judgment of the Pioneer Field Project Geologist/Engineer.

Drill cuttings and liquids generated are left at the borehole. All boreholes are decommissioned in accordance with applicable Illinois Department of Public Health guidelines. When required, these spoils are contained in 55 gallon Type 17H drums. Decontamination procedures for the drilling equipment consists of steam cleaning the augers after each boring using a biodegradable detergent and high-pressure steam rinse. The split-spoon samplers are decontaminated between each sample interval by washing in a solution of Alconox and water, and triple rinsing with clean heated water.

Any deviations to or modifications of this standard protocol will be described on a site by site basis.

1.0 INTRODUCTION

1.1 Site Investigation Objectives

Pioneer Environmental, Inc. (Pioneer) was contracted by MC Holdings, Inc. (Remediation Applicant / client) to conduct a "focused" site investigation and provide environmental consulting services for the subject site located at 2659 Wisconsin Avenue in Downers Grove, Illinois (Figure 1). The purpose of the focused site investigation was to determine the nature and extent of contamination related to accidental releases of waste cleaning solvent that was previously identified during an initial assessment, and then use the regulatory options provided in 35 IAC Part 740-Site Remediation Program (SRP), and Part 742-Tiered Approach to Corrective Action Objectives (TACO), to obtain a focused "No Further Remediation" Letter (NFR Letter) for the subject site.

The following report is strictly related to the subsurface investigation activities conducted by Pioneer and is intended to serve as a *Focused Site Investigation & Remedial Action Completion Report* pursuant to Sections 740.435, 740.445 and 740.455. The contents of this report include a detailed discussion of the site characterization work and the TACO procedures utilized to establish site-specific remediation objectives and determine the degree of remedial action necessary to obtain a NFR Letter in accordance with Part 740, Subpart F and Section 58.10 of the Illinois Environmental Protection Act.

1.2 Background Information

The subject property, encompassing approximately 3.9 acres of land, consists of two parcels of land owned by MC Holdings, Inc. The Remediation Site consists of an approximate 1,200 square foot area located near the east-central portion of the subject property (Figure 2). A tall, one-story structure and an adjacent asphalt parking lot comprise the subject property which is located within the Ellsworth Industrial Park. The subject property is currently vacant and the property owner informed Pioneer that the building was formerly used for the manufacturing of small electronic components (See Section 2.1). Legal descriptions for the subject property and the Remediation Site are included in Appendix A.

The client is hereby submitting the required paperwork (Appendix A) to notify the Illinois Environmental Protection Agency (IEPA) of their election to proceed under the Site Remediation Program (SRP). This is being done for the express purpose of securing a NFR Letter from the State.

1.3 Recognized Environmental Conditions

As previously discussed, the subject property was used for manufacturing small electronic components. According to the property owner, historical site operations involved the storage of miscellaneous liquid wastes in a small, dedicated room along the subject building's eastern wall. This waste primarily included cleaning solvent and soldering by-products (i.e. flux). A floor drain from the waste storage room discharged to the ground surface immediately outside the building's eastern wall. Pioneer was informed that an initial assessment was previously performed at the site and identified certain volatile organic compounds (VOCs) in soil samples collected from the area around this drain pipe. Therefore, the presence of VOC-impacted soils was identified as a recognized environmental condition (REC) and provided the focus for the site investigation activities conducted at the subject site by Pioneer.

1.4 Contaminants of Concern

Based on the REC, the information from the previous assessment, and the nature of the suspected source at the subject site, Pioneer established volatile organic compounds (VOCs) as the appropriate contaminants of concern (COCs) at the subject site. The VOC analysis includes the full-scan of organic compounds typically found in waste cleaning solvents, including tetrachloroethylene (PCE), trichloroethylene (TCE) and the various degradation compounds of PCE and TCE.

2.0 SITE CHARACTERIZATION

2.1 Site Description

The subject site consists of two parcels of land owned by MC Holdings, Inc. The subject site is rectangular in shape and encompasses approximately 3.9 acres of land located near the southwest corner of the intersection of Wisconsin Street and Katrine Avenue in the Village of Downers Grove, Illinois. The subject site is occupied by an approximate 43,200 square foot one-story building located within the Ellsworth Industrial Park. The site is bordered to the north and east by Wisconsin Street and Katrine Avenue, respectively, beyond which are industrial/commercial buildings. An asphalt parking lot lies to the west of the subject building, beyond which is industrial/commercial development. South of the subject building is an asphalt parking lot beyond which is densely vegetated vacant land.

The subject building consists primarily of an open warehouse area, where former soldering workstations were utilized to manufacture small electrical and mechanical assemblies (i.e. circuit boards). As assemblies were completed, they were cleaned with solvent and the solvent was then stored in a 55-gallon drum in the aforementioned waste storage room located along the eastern side of the subject building. A floor drain routed any small spills of the wastes to a discharge point immediately outside the subject building and directly east of the waste storage room (Figure 3). Evidence of past spills (i.e. staining) was noted on the floor in the waste storage room.

The subject site is located in a manufacturing district (M1) within the Village of Downers Grove. The following list summarizes the adjacent properties noted during the recent investigation.

North: The site is bordered to the north by Wisconsin Street beyond which is

Novartis Seeds, Inc. and Amkus Rescue Systems.

<u>East:</u> The site is bordered to the east by Katrine Avenue, beyond which is

Lovejoy.

West:

The site is bordered to the west by a public storage facility.

South:

The subject property is bordered to the south by vacant land that is known as Elmore Avenue (dedicated right-of-way), beyond which is densely vegetated vacant land, reportedly located in an unincorporated portion of Downers Grove.

2.2 Sampling Plan

Based on the reported presence of solvent contamination beneath the discharge pipe outside the eastern edge of the building, Pioneer developed a sampling plan to adequately characterize the site conditions associated with the REC. The objectives of the assessment activities were to confirm and supplement previous assessment activities which indicated the site's soils had been impacted by VOCs and then to delineate the horizontal and vertical extent of the potential VOC contamination based on Pioneer's assessment results.

As mentioned, Pioneer was informed by the owner that VOC-impacted soils were identified by a previous assessment conducted in the area outside the east wall of the subject building from a floor drain discharge related to spills from former waste transfer operations previously conducted on-site. Pioneer noted evidence of past spills on the floor of the former waste storage room (i.e. staining). The owner stated that an excavation (3' x 3' x 4' deep) was dug manually beneath the discharge pipe. Soils from the excavation were stockpiled inside 55-gallon drums outside the subject building (Figure 3) and are intended for proper disposal according to the applicable regulations. Therefore, based on the information provided, Pioneer's assessment targeted the area beneath the waste storage room and beneath the discharge pipe outside the eastern portion of the subject building as the potential source area.

As a result, Pioneer advanced 15 soil borings throughout the site. Soil samples were collected and analyzed for VOCs according to USEPA Method 5035/8260B. For purposes of a TACO evaluation, one soil sample was also analyzed for pH and fraction of organic carbon (f_{∞}), according to respective USEPA Methods 9045 and 9060.

2.3 Soil Boring Advancement/Sampling

On August 28 and 29, 2000, Pioneer mobilized subsurface drilling equipment and OSHA-certified personnel to the subject site. A total of 15 soil borings were advanced at strategic locations inside the subject building and throughout the eastern portion of the subject property (Figure 3). Soil borings outside the subject building were advanced through a surface finish of either concrete or vegetated topsoil while soil borings advanced inside the subject building were advanced through concrete and an approximate 6-12 inch layer of associated gravel base materials. Internal soil borings were advanced using a manually-operated jackhammer-driven sinker drill. Exterior soil borings were advanced using a truck-mounted hydraulically-driven sinker drill. Soil samples were collected using a stainless steel barrel sampler with dedicated PVC liner sleeves. A photographic log of these activities is included in Appendix B.

The soil samples obtained from each interval were logged according to their predominant geological characteristics and then divided into two representative portions by a Pioneer Project Engineer. A measured portion of each sample (13 grams) was transferred from the sampling device(s) into pre-labeled laboratory provided glass containers with appropriate preservative (in accordance with SW-846 Method 5035 for VOCs), designated for possible analysis, and stored in a cooler on ice to preserve the integrity of the sample. The remaining portion of each sample was sealed in a pre-labeled plastic bag and set aside to be field screened.

After a sufficient amount of time had elapsed to allow the soil vapors to equilibrate with the air in the sample bags, the sealed soil vapors were field screened using either a MicroFIDTM IS-3000 hand-held flame ionization detector (FID). This device is sensitive to a variety of VOCs, including those commonly associated with waste solvents and their degradation compounds. The instrument provides a quantitative indication of the relative concentrations of these compounds in the soil sample by measuring the amount of VOCs trapped in the headspace of the bags.

Pioneer selected soil samples from various boring locations for analytical testing. The samples were selected based on the scope of work, FID readings, and judgment of the

Project Engineer. The selected samples were then shipped overnight to an independent laboratory under standard chain-of-custody procedures, and submitted for analysis of the appropriate targeted compounds (VOCs). Pioneer's complete protocol for subsurface soil sampling and soil boring logs are provided in Appendix C.

2.4 Field Observations

No visual/olfactory indications of potential contamination were noted in any of the soil borings advanced on-site; however, elevated FID readings were noted in three of the 15 soil borings advanced at the subject site. This field evidence of contamination was primarily observed in samples collected beneath the former waste storage room and near the floor drain discharge pipe outside the eastern portion of the subject building (i.e. source area) and was observed from near surface grade to depths up to 12 feet BSG.

2.5 Site Geology

Soils beneath asphalt and concrete surface materials consisted primarily of brown silty clay and clayey silt from near surface grade to depths ranging from approximately 6 to 9 feet below surface grade (BSG). In general, the upper silty clay unit contained varying percentages of gravel, sand and silt, retained a loose, firm to stiff consistency, and exhibited brown to dark brown color variations.

Beneath this brown upper silty clay unit, a gray silty clay unit was encountered in all borings at depths ranging from 6 to 12 feet BSG with the exception of B-9, which was terminated at 9 feet BSG. The gray silty clay unit contained trace percentages of fine sand and its consistency ranged from soft to stiff. Based on observations from B-6, which began approximately 4 feet below natural surface grade due to the recessed loading dock, the gray silty clay persisted to at least 16 feet BSG. There was no obvious evidence of groundwater detected during any of the subsurface investigation activities performed by Pioneer.

According to the Illinois State Geological Survey (ISGS) map dated 1984 and titled Stack-Unit Mapping of Geological Materials in Illinois to a Depth of 15 Meters, by Kempton, John P. et al., and the ISGS map dated 1970 and titled Surficial Geology of the Chicago Region, by Willman and Lineback, the subject site is situated on the Wadsworth Member of the Wedron Formation, which is described as mostly gray clayey and silty clayey till, with low pebble, cobble and boulder content and local silt lenses present from approximately six to 15 feet BSG. The Wedron Formation is described as silty and clayey tills with interspersed beds of alluvial sand and gravel deposits.

Pioneer also reviewed Plate 1 of the ISGS Circular dated 1984 and titled *Potential for Contamination of Shallow Aquifers in Illinois*, by Berg, Richard C. et al. Plate 1 indicates the subject site is located on the border of areas designated as "C2" and "E". A "C2" classification is described as sand and gravel within 20-50 feet of surface underlain by impermeable till. An "E" classification is described as uniform, relatively impermeable silty or clayey till at least 50 feet thick. Based on the actual subsurface sediments encountered at the subject site, the site geology appears more consistent with an "E" classification.

Based on the Berg Circular and the predominant soil types encountered at the subject site, hydraulic conductivities were estimated to range from 10⁻⁹ to 10⁻⁷ cm/s, which indicate the site's soils have a low permeability. A complete listing of the geological conditions encountered during drilling are provided on the soil boring logs in Appendix C. Copies of the ISGS maps are included in Appendix D.

3.0 TIER 1 EVALUATION

3.1 Introduction

Based on the nature of the REC, each of the soil samples analyzed during the site investigation was tested for VOCs. In order to further characterize the site and for purposes of a potential Tier 2 evaluation, one soil sample was analyzed for pH and one soil sample was also analyzed for its fraction of organic carbon (f_{∞}) . All analytical tests were performed by an independent laboratory in accordance with accepted State and Federal test methods.

Based on the site's historical and intended future industrial use, soil sample analytical results contained herein are compared to the most stringent soil remediation objectives (SROs) for industrial/commercial property, also referred to as Tier 1 SROs, found in 35 IAC 742, Tiered Approach to Corrective Action Objectives (TACO). The industrial/commercial Tier 1 SROs represent baseline contaminant concentrations that are acceptable to the IEPA. These Tier 1 SROs are based on a risk assessment that incorporates a conservative exposure scenario and yields values relative to three primary exposure pathways; namely, ingestion, inhalation, and the groundwater ingestion exposure routes (migration to groundwater), and for two target populations, industrial/commercial workers and construction workers.

Although these Tier 1 SROs may not represent final remediation objectives for the site, the analytical results of the soil and groundwater samples are herein compared to the most stringent Tier 1 SROs for industrial/commercial property use for initial screening purposes. Pursuant to the Part 742 regulations, the values for each of the three exposure pathways must be presented for matters of comparison and the most stringent becomes the remediation objective for a Tier 1 Evaluation.

3.2 Soil Sample Analytical Results

A total of 14 soil samples were analyzed for VOCs. The analytical results of the soil samples tested for VOCs indicated that concentrations of five of the 37 targeted compounds exceeded the most stringent Tier 1 SROs in seven of the samples analyzed. Table 3.2.1 provides a detailed breakdown of the particular pathway-specific Tier 1 SROs that were exceeded.

TABLE 3.2.1

Contaminants of Concern Exceeding Tier 1 SROs
The Morey Corporation
2659 Wisconsin Street / Downers Grove, Illinois

TACO Exposure Pathways								
	Route Specific Values				Soil Com Groundwate	Soil Saturation		
Sample ID	Industrial - Commercial		Construction Worker		Exposure Route		Limit	
	Ingestion	Inhalation	Ingestion	Inholation	Class I	Class II	C	
B-1 (3'-6')	PCE	PCE		PCE	PCE, TCE, DCE, VC	PCE, TCE, DCE		
B-1 (9'-12')					DCE	·		
B-2 (6'-9')					PCE			
B-6 (3'-6')					PCE, TCE, DCE, VC	PCE, TCE, DCE		
B-10 (4'-6')		PCE		PCE	PCE	PCE		
B-10 (10'-12')					PCE	PCE		
B-12 (4'-6')					мс			

Notes:

PCE = Tetrachloroethylene; TCE = Trichloroethylene; DCE = cis 1,2-Dichloroethylene; VC = Vinyl Chloride MC = Methylene Chloride

Analytical results show that remaining VOCs in these seven soil samples and the VOCs in all other soil samples were either not detected at the stated detection limits or were detected below the most stringent Tier 1 SROs. A complete summary of soil analytical results is provided in Table No. 1 and laboratory reports are included in Appendix E. Soil sample locations and exceedances of the Tier 1 SROs are shown on Figure 4.

Soil samples B-7 (3'-6') and B-14 (3'-6'), which were collected from non-impacted areas, were also analyzed for pH and f_{∞} respectively. Results yielded a pH of 7.20 standard units

and an organic carbon content of 1.08 % (or 0.0108 g-C / g-soil), which is approximately 5 times greater than the IEPA subsurface default value of 0.2% (0.002 g-C / g-soil).

3.3 Tier 1 Evaluation - Summary

The analytical results have demonstrated that soils beneath the eastern portion of the subject site have been impacted, to varying degrees, by: tetrachloroethylene (PCE), trichloroethylene (TCE), cis 1-2 dichloroethylene (DCE), vinyl chloride (VC) and methylene chloride (MC). The soil contamination appears to be most severe beneath the former waste storage room and the floor drain discharge pipe, which was considered the apparent source area based on the information previously provided by the owner.

4.0 ENDANGERMENT ASSESSMENT / REMEDIATION OBJECTIVES DETERMINATION

4.1 Introduction

As mentioned above, the analytical results of the soil samples indicated that the subject property has been impacted by certain VOCs at concentrations above the industrial/commercial Tier 1 SROs (Figure 4). As a result, Pioneer performed an endangerment assessment in accordance with the procedures outlined in the TACO regulations. The approach of this endangerment assessment was to eliminate the groundwater ingestion pathway and to establish site-specific Tier 2 SROs for remaining pathways for those contaminants detected above the most stringent industrial/commercial Tier 1 SROs. The five COCs at the site that were analytically confirmed to exceed the most stringent industrial/commercial Tier 1 SROs for any pathway are herein referred to as Targeted COCs and have been outlined below in Table 4.1.1.

Table 4.1.1
Targeted Contaminants of Concern

Targeted COCs	Pathway Exceeded						
	Ingestion	Inhalation	Class 1	Class II			
Tetrachloroethylene (PCE)	X	х	x	X			
Trichloroethvlene (TCE)			X	x			
Cis 1,2 Dichloroethylene (DCE)			x	Х			
Vinyl Chloride (VC)			_ X				
Methylene Chloride (MC)			X				

4.2 Exposure Route Evaluation

Each of the potential exposure routes was evaluated pursuant to Subpart C of the Part 742 regulations to determine the feasibility of excluding specific pathways (i.e. groundwater ingestion and migration to groundwater) for the targeted COCs identified at the site. As provided in Subpart C of the Part 742 regulations, exposure pathways may be excluded from consideration if it can be demonstrated that an actual or potential impact to a receptor

or potential receptor can be eliminated. If exposure pathways can be excluded, their

corresponding objectives are no longer applicable.

However, prior to conducting an exposure pathway assessment, the specific targeted COCs must be identified at the site. Based on the analytical results of the assessment work, the compounds listed in Table 4.1.1 were the only COCs identified at the site that required

investigation beyond a Tier 1 evaluation.

As outlined in Section 742.305, prior to elimination of any pathways at a site, certain minimum requirements must be evaluated and satisfied. These requirements include the

following:

• The sum of the concentrations of all organic COCs shall not exceed the attenuation

capacity of the soil as determined under Section 742.215 (Section 742.305(a));

Pioneer calculated the sum of the organic compounds from each of the soil samples analyzed, using the value of the corresponding detection limit when the compound was not detected. The sum of the organic COCs from the most contaminated soil sample analyzed, B-1 (3'-6'), totaled 121 ppm (Table No. 1). Therefore, based on the analytical results of the soil samples collected, and the comparison to the most stringent default attenuation capacity for the site (2,000 ppm), it has been demonstrated that the attenuation capacity of

the soil has not been exceeded; thus, this requirement has been satisfied.

• The concentrations of any organic COCs remaining in the soil shall not exceed the soil

saturation limit as determined under Section 742.220 (Section 742.305(b)).

The maximum concentration and the soil saturation limits of the Targeted COCs (with

melting points below 30°C) have been outlined below in Table 4.2.1. As illustrated, the

default soil saturation limits are not exceeded by the maximum concentration of any of the

Targeted COCs; therefore, this requirement has been satisfied for the subject property.

Table 4.2.1

Maximum Concentration of COCs
(with melting points below 30°C) and Soil

Saturation Limits

Targeted COCs	Maximum Concentration (ppb)	Soil Saturation Limit (ppb)
Tetrachloroethylene	110,000	240,000
Trichloroethylene	8,000	1,300,000
Cis 1,2 Dichloroethylene	3,300	1,200,000
Vinyl Chloride	46	1,200,000
Methylene Chloride	40	1,200,000

 Any soil which contains COCs shall not exhibit characteristics of reactivity for hazardous waste (Section 742.305(c));

Based on the physical and chemical properties and the relative concentrations of the contaminants identified at the site, it is unlikely that the soil at the subject property would exhibit the characteristics of reactivity as outlined in 35 IAC 721.123; thus, this requirement has been satisfied.

• Any soil which contains COCs shall not exhibit a pH less than or equal to 2.0 or greater than or equal to 12.5 (Section 742.305(d)); and

Based on the result of B-7 (3'-6'), the measured pH of the soil was 7.20 standard units (Appendix E); therefore, this requirement has been satisfied.

 Any soil which contains arsenic, barium, cadmium, chromium, lead, mercury, selenium or silver shall not exhibit any of the characteristics of toxicity for hazardous waste (Section 742.305(e)).

None of the metals listed above were identified as COCs based on the nature of the REC. Therefore, this condition has been satisfied by default.

Based on the preceding evaluation, exclusion of potential exposure pathways is possible at the subject property; however, as described below, additional criteria must also be satisfied

before a particular exposure pathway can be formally excluded from consideration at the site.

4.3 Groundwater Ingestion Pathway

Pursuant to Section 742.320, the groundwater ingestion exposure route, which includes migration from soil to groundwater and direct ingestion of groundwater, may be excluded from consideration if, in addition to the criteria previously outlined in Section 4.2 of this report, the criteria described below are also satisfied. It should be noted that the Village of Downers Grove does <u>not</u> have a groundwater ordinance as required by Section 742.320(d). As a result, elimination of the groundwater ingestion pathway is pursued from a regulatory context under Section 742.900(c)(6). However, the information requested by Section 742.320 is still provided in the subsequent text as it discusses relevant issues needed to support groundwater ingestion pathway elimination under a Tier 3 Evaluation pursuant to Section 742.925(b).

• Corrective action measures must be completed to remove any free product to the maximum extent practicable (Section 742.320(b));

No free product was identified during site assessment activities conducted within the source area or outside the source area; thus, this requirement has been satisfied.

• The source of the release is not located within the minimum or designated maximum setback zone or within a regulated recharge area of a potable water supply well (Section 742.320(c));

Pioneer conducted an Illinois State Geological Survey (ISGS) well search to locate potable water supply wells within a one-mile radius of the source. A review of the ISGS records revealed several private water wells and one community water supply well within 2,500 feet of the site (Appendix F). A representative from the Groundwater Section of the IEPA Bureau of Water informed Pioneer the setback zone for the public water supply well is 400 feet and that there is no regulated recharge area associated with this well. The setback zone for all remaining private wells is 200 feet. Pioneer was additionally informed no maximum setback zone was established for the public water supply well referenced previously. Based on the locations of these wells, the site is not located within the minimum or

designated maximum setback zone of any potable water well or any regulated recharge area. Therefore, this condition is satisfied.

• For any area within 2,500 feet from the source of the release, an ordinance adopted by the unit of local government is in place that effectively prohibits the installation of potable water supply wells (and the use of such wells) (Section 742.320(d));

Pioneer contacted the Village of Downers Grove to determine whether the Village has an ordinance prohibiting the installation of private wells for potable purposes and to determine where the Village gets its potable water supply. Pioneer was informed the Village obtains its public water supply from the City of Chicago, via the DuPage Water Commission, which uses Lake Michigan as its source of potable water. According to the Village representatives, the Village of Downers Grove has a municipal ordinance prohibiting the installation of private wells for potable purposes where municipal water is available within 250 feet. If a business or residence is not within 250 feet of the municipal water supply system, a private well may be installed for potable purposes. Private wells may also be installed solely for irrigation purposes. The remediation site is currently serviced with municipal water and since the site is located within 250 feet of a Village water main, the installation of a private well for potable purposes would be prohibited under the municipal ordinance. A copy of this ordinance is included as Appendix G. However, since the municipal ordinance is not approved by the IEPA for TACO purposes as required under Section 742.1015, this requirement is not satisfied.

Because this condition is not met, Pioneer continued to pursue the exclusion of the groundwater ingestion exposure route under a Tier 3 Evaluation as allowed by Section 742.900(c)(6). The purpose of this Tier 3 Evaluation is to prohibit the potable use of groundwater at the site through a <u>site-specific</u> groundwater use restriction pursuant to Section 742.925.

As previously mentioned, there was no obvious evidence of groundwater encountered during any of Pioneer's subsurface investigation activities and the site is not located within the minimum or designated maximum setback zone of an existing potable water supply well. Further, as described in Section 4.4 of this report, Equation R-14/R-26 modeling calculations show that any potentially impacted groundwater would not migrate off-site at

levels above the Class I GROs, based on maximum soil concentrations and corresponding, conservative *theoretical* groundwater contamination.

Based on the information provided in connection with the pathway exclusion justification under Section 742.925 (including Section 742.320), Pioneer believes it has been adequately demonstrated that both the soil and groundwater components of the groundwater ingestion exposure route can be excluded from consideration at this site, as allowed under a Tier 3 Evaluation (Section 742.900[c][6]). An institutional control, in the form of the NFR Letter for the site, will be utilized to prohibit the potable use of groundwater at the site.

4.4 Equation R-14 / R-26 Modeling

Equations R-14 and R-26 were utilized to model predicted future impacts associated with the residual soil contamination at the site. The source area was identified as the area beneath the former waste storage room and the floor drain discharge pipe outside the subject building and is delineated as shown on Figure 4.

Since there was no obvious evidence of groundwater at the site, Equation R-14 was used to predict theoretical groundwater impacts from soil contaminants leaching to groundwater. Maximum detected soil concentrations from actual samples collected from the site were used to predict the most conservative theoretical groundwater impacts (C_{source}). The corresponding C_{source} values were then inputted into Equation R-26 to evaluate the current and future potential for impacted groundwater to migrate as a result of the impacted soil leaching to groundwater.

The site-specific input values required for Equation R-14 include the hydraulic conductivity (K), the hydraulic gradient (i), pH, fraction of organic carbon (f_{∞}) and source area dimensions as described below.

Hydraulic Conductivity (K)

According to the Berg Circular for "E" type soils, typical hydraulic conductivity values range from 10⁻⁹ to 10⁻⁷ cm/s. However, Pioneer used a hydraulic conductivity value of 10⁻⁵ cm/s as a conservative measure.

• Hydraulic Gradient (i)

Pioneer used a hydraulic gradient of 0.01 ft/ft for the calculations. This is a very conservative value given the lack of groundwater observed during the subsurface investigation.

pH

Pioneer used a site-specific pH of 7.20 standard units as measured from the site's soil (B-7[3'-6']).

Organic Carbon (f_∞)

Pioneer used a site-specific f_{∞} value of 1.08% (B-14 [3'-6']) as measured from the site's soil.

Source Area Dimensions (W, S, X)

Site-specific source area parameters used in the R-14/R-26 calculations are shown on Figure 4. These parameters include: width of source area parallel to the direction of groundwater movement (W); source width perpendicular to the groundwater flow direction in the horizontal plane (S_w); and the distance along the centerline of the groundwater plume in the direction of groundwater flow (X). Since the eastern property line is closest to the source area, the distance from the source to the eastern property line was used as 'X' to provide the most conservative result for the R-26 modeling calculation. Remaining parameters are IEPA default values found in 35 IAC 742. Results of Equation R-26 calculations indicated that the Class I GROs would be achieved at the nearest property border (i.e. eastern property line). The R-14/R-26 modeling calculations are included in Appendix H.

4.5 Tier 2 Soil Evaluation

Since the groundwater ingestion pathway and the soil component of the groundwater ingestion pathway have been eliminated under a Tier 3 Evaluation, the remaining pathways (i.e. inhalation, ingestion) were evaluated under a Tier 2 Evaluation. Given the site's intended industrial/commercial redevelopment, Pioneer developed industrial/commercial Tier 2 SROs for the inhalation and ingestion pathways in order to calculate higher, yet acceptable remediation objectives. Pursuant to Subparts F and G of the Part 742 regulations, Tier 2 SROs may be developed utilizing site-specific information and are considered to be equally protective of human health and the environment even though they are less stringent than the conservative Tier 1 SROs.

As outlined in Section 742.600(e), prior to developing Tier 2 SROs for a site, certain minimum requirements must be evaluated and satisfied. These requirements are provided below and are followed by an explanation of how they apply to the subject property.

• The sum of all organic COCs shall not exceed the attenuation capacity of the soil (Sections 742.600(e)(1) and 742.215);

This condition has been met as previously outlined in Section 4.2.

• If more than one noncarcinogenic COC at the site affects the same target organ, the calculated remediation values shall be corrected for cumulative effects (Sections 742.600(e)(2) and 742.720);

Of the site's Targeted COCs (PCE, TCE, DCE, VC and MC), DCE is the only noncarcinogenic COC. Because not more than one noncarcinogenic COC is present at the site, remediation values were not corrected and this requirement is satisfied.

• For any organic COC with a melting point below 30°C, the concentration remaining in the soil shall not exceed the soil saturation limit (Sections 742.600(e)(3) and 742.220).

This condition has been met as previously discussed in Section 4.2 (See Table 4.2.1).

Since each of these initial conditions was satisfied, a Tier 2 analysis was considered valid for the subject property. Therefore, Pioneer established Tier 2 SROs for both of the remaining exposure pathways (i.e. inhalation and ingestion). Pioneer utilized the Soil Screening Level (SSL) equations as provided in Section 742.710 to calculate the Tier 2 values. Tier 2 SROs were calculated utilizing a widely accepted third-party software program (TACO PROTM [2.0]). Tier 2 SROs were calculated for two populations, industrial/commercial workers and commercial workers.

Site-specific variables used during the Tier 2 calculations were limited to include only the measured pH (7.20), the organic carbon fraction of the soil collected from the site (1.08%), and the finite source area dimensions (Figure 4). The IEPA default values provided in Appendix C of the Part 742 regulations were used for all remaining parameters. See Appendix H for a copy of the appropriate IEPA Tier 2 data worksheets containing the Tier 2 SROs calculated for the Targeted COCs as well as a list of the TACO equations used to develop the Tier 2 SROs. Table 4.5.1 compares maximum site concentrations of the targeted COCs to the Tier 2 SROs calculated for the industrial/commercial populations as they are more stringent than the Tier 2 SROs calculated for the construction worker population as required by Section 742.600(h) (Appendix H).

TABLE 4.5.1
Tier 2 Industrial/Commercial SROs
The Morey Corporation
2659 Wisconsin Street / Downers Grove, Illinois

сос	Maximum Site Concentration	Ingestion (Ind/Comm)	Inhalation (Ind/Comm)	C 🔟 (Surficial)
Tetrachloroethylene	110,000	110,062	144,728	382,949
Trichloroethylene	8,000	520,291	49,378	2,168,731
cis-1,2-Dichloroethylene	3,300	20,440,000	1,801,007	1,801,007
Vinyl Chloride	46	3,012	999	1,402,301
Methylene Chloride	40	763,093	178,600	3,160,595

All concentrations in µg/kg.

As indicated by a comparison of the maximum detected concentrations at the site to the most stringent industrial/commercial Tier 2 SROs calculated using TACO equations (Table No. 4.5.1), it was determined that the concentrations of COCs at the site are all less than the calculated Tier 2 SROs for industrial/commercial land use. Therefore, given the elimination of the groundwater ingestion pathway and the use of Tier 2 SROs, the actual risk posed by the residual COCs has been mitigated and the impacted soil may be adequately managed in-place.

5.0 FINDINGS

5.1 Summary

Pioneer was contracted by MC Holdings, Inc. (Remediation Applicant / client) to conduct a "focused" site investigation and provide environmental consulting services for the subject site located at 2659 Wisconsin Street in Downers Grove, Illinois (Figure 1). The purpose of the site investigation was to determine/verify whether subsurface soils had been impacted by VOC-contamination and then use the regulatory options provided in 35 IAC Parts 740 and 742 to address the impacts and obtain a "focused" No Further Remediation Letter for the remediation site. Pioneer was informed by the owner that the soils near the east-central portion of the subject building were impacted with VOC contamination related to accidental spills of cleaning solvents in a waste storage room during past facility operations.

Pioneer mobilized to the subject site to perform site characterization work on August 28 and 29, 2000. As a result, 15 soil borings were advanced at various locations on the subject site and select samples were analyzed for VOCs, the COCs established based on the source.

The Tier 1 Evaluation revealed that soil was impacted by certain chlorinated VOCs above industrial/commercial Tier 1 SROs to varying degrees. The assessment activities indicated the contamination was mainly present beneath the building and pavement within the source area and from near surface grade to approximately six feet BSG near the eastern portion of the subject site. Based on the results of the soil testing, the horizontal and vertical extent of contamination was adequately defined.

Pioneer then performed an endangerment assessment in accordance with TACO regulations to justify the elimination of the groundwater ingestion pathway (soil migration to groundwater) and to develop Tier 2 SROs for the targeted COCs at the site. The groundwater ingestion pathway was eliminated under a Tier 3 Evaluation pursuant to Section 742.925. Equations R-14 and R-26 were utilized to evaluate the potential for

theoretical, predicted future groundwater impacts to migrate. Results of the conservative modeling calculations indicated that the *potential* concentrations of COCs in groundwater would <u>not</u> migrate off-site at concentrations exceeding the Class I GROs as modeled from the source area to the nearest property boundary (Figure 4, Appendix H).

Pioneer then developed Tier 2 SROs for industrial/commercial and construction worker populations to address the remaining exceedances of the Tier 1 SROs for the ingestion and inhalation pathways. The only site-specific variables used for the Tier 2 calculations were the finite source area dimensions (Figure 4), pH (7.20) and the fraction of organic carbon (1.08%); TACO default values were used for all other parameters. Maximum soil contaminant concentrations were compared to the calculated Tier 2 SROs. Since there were no actual site concentrations that exceeded the most stringent calculated Tier 2 SROs (Table 4.5.1), it was determined that no further investigation was warranted and the residual contamination could be adequately managed in-place. A Site Base Map showing the area of contaminants remaining in-place is included as Figure 5.

5.2 Conclusions

Based on the site characterization work which has adequately defined the nature and extent of contamination and the endangerment assessment performed in accordance with the TACO regulations, Pioneer has demonstrated that the applicable remediation objectives have been achieved and that the risk associated with the soil contamination identified at the subject site can be adequately managed in-place. Thus, Pioneer maintains that no further remedial action is warranted in connection with the subsurface impacts identified at the subject site. In addition, Pioneer believes the site conditions warrant the issuance of a "focused" No Further Remediation Letter from the IEPA as acknowledgment of formal site closure in accordance with 35 IAC 740.430 and 415 ILCS 5/58.10 of the Illinois Environmental Protection Act. Pioneer respectfully requests the NFR letter include the following conditions and institutional controls:

The land use is limited to industrial/commercial use;

- No person shall construct, install, maintain, or operate a water system or well at the remediation site for potable purposes;
- There are no engineering controls;
- Any contaminated soil (or groundwater) that is removed, excavated, or disturbed from the subject property must be handled in accordance with applicable laws and regulations; and
- The NFR Letter shall be recorded as a permanent part of the chain of title for the subject property and serve as an appropriate institutional control.

6.0 CLOSING REMARKS

This report has been prepared for the sole use of the client identified in the report and evaluation by the Illinois EPA, and can not be relied upon by other persons or entities without the joint permission of the client and Pioneer Environmental, Inc. (Pioneer). The observations and conclusions contained herein are limited by the scope and intent of the work mutually agreed upon by the client and Pioneer and the work actually performed. There are no warranties, implied or expressed, concerning the environmental integrity of areas and/or mediums not analytically tested.

APPENDIX C

Pioneer Standard Protocol
Soil Boring Logs
Monitoring Well Completion Reports

PROTOCOL FOR SUBSURFACE SOIL SAMPLING

Subsurface samples are collected by employing various soil boring techniques based on certain site specific conditions. Soil borings are performed using a Hollow or Solid Stem (site specific) auger with split-spoon sampling techniques, a hydraulic percussive split-spoon sampler, a percussive Macro-Core® barrel sampler, and/or a stainless steel hand auger. The soil sampling activities are conducted in accordance with American Society of Testing and Materials (ASTM) standards (ASTM:D 1586). Soil samples are collected with a stainless steel hand auger, a split-spoon sampler, and/or a Macro-Core® sampler at 2-3 foot intervals depending on the specific method used. In the split-spoon sampling procedures, a split-barrel sampler having either a 2-inch or 1-3/16 inch outside diameter, an inside diameter of 1-3/8 or 7/8 inches, and a length of 2.5 or 3 feet is driven into the soil to collect a representative and undisturbed sample. In the Macro-Core® barrel sampling technique, a stainless steel barrel having a 2-inch outside diameter, an inside diameter of 1-1/2 inches, and a length of 2 or 3 feet is fitted with a PVC liner and is driven into the soil to collect a representative and undisturbed sample.

The drilling is directed by a Pioneer Environmental Field Project Geologist/Engineer, who logs geologic materials encountered during drilling, field screens auger cuttings and soil samples, observes the drilling activities, and supervises sample collection. Each sample is examined in the field for odor and visual evidence of hydrocarbon or other organic contamination. The field observations are noted in the soil boring logs that are included in the Appendices.

A representative portion of each sample is placed into an unused, air-tight plastic bag which is sealed and dedicated to that discrete sample. The sample is allowed to achieve a constant temperature and the headspace above each sample is screened for volatile organic compounds (VOCs) using either a Photovac MP-1000 handheld air monitor / photoionization detector (PID) or a Photovac IS 3000 handheld air monitor / flame ionization detector (FID), depending on the nature of the targeted contaminants. The PID/FID are devices that are sensitive to a variety of VOCs. The headspace is screened by inserting the PID/FID probe into the space above the soil and recording the maximum reading of the instrument. The results of the headspace screening are also listed on the soil boring logs.

When soil samples will be laboratory tested for VOCs, one of two field sampling methods are used as required by US EPA's SW-846 Method 5035. 1) A representative portion of the sample collected in the field is placed in an EnCoreTM sampler, or equivalent, immediately after collection, with the appropriate quantity and volume of the containers determined by the scope of work and field conditions. The EnCoreTM samplers, or equivalent, are delivered to the laboratory within 48 hours of sample collection. 2) An appropriate weight of a representative portion of the sample collected in the field is placed in laboratory-provided glassware, immediately after collection, and then the appropriate preservative is added, either sodium bisulfate-for samples with estimated VOC concentrations less than 200 ppb; or methanol-for samples with estimated VOC concentrations greater than 200 ppb.

Any soil samples chosen for analysis are packed in appropriate containers, properly labeled, and shipped in a cooler on ice via a delivery service overnight to an independent laboratory under standard chain-of-custody procedures. Samples are selected based on the scope of work, field observations (i.e. visual/odor observations, elevated PID readings, etc.), other site specific conditions, and the judgment of the Pioneer Field Project Geologist/Engineer.

Drill cuttings and liquids generated are left at the borehole. All boreholes are decommissioned in accordance with applicable Illinois Department of Public Health guidelines. When required, these spoils are contained in 55 gallon Type 17H drums. Decontamination procedures for the drilling equipment consists of steam cleaning the augers after each boring using a biodegradable detergent and high-pressure steam rinse. The split-spoon samplers are decontaminated between each sample interval by washing in a solution of Alconox and water, and triple rinsing with clean heated water.

Any deviations to or modifications of this standard protocol will be described on a site by site basis.

PROTOCOL GROUNDWATER MONITORING WELL INSTALLATION & SAMPLING

Groundwater monitoring wells are typically installed using hollow stem auger borings. When spatial constraints dictate, wells may be installed using manual hand-augering techniques, or other acceptable practices. Soil sampling is conducted during well installation, according to Pioneer's Subsurface Soil Sampling Protocol. The drilling and well installation are directed by Pioneer's Field Project Geologist/Engineer, who logs geologic materials encountered during drilling, field screens auger cuttings and soil samples, observes the drilling activities, and supervises installation of groundwater monitoring wells. All drilling equipment and tools are properly decontaminated (i.e. pressure washing, steam cleaning, etc.) prior to mobilization onto the site, between boreholes, and upon completion of the drilling program.

Wells are constructed of 2 inch I.D. schedule 40 flush-joint PVC riser and screen unless noted otherwise in the report. The well materials are decontaminated prior to installation. When the depth of the well allows, the annular space surrounding the screen is backfilled with silica sand filter pack to a height not less than 1 foot above the top of the well screen, and a minimum of one foot of bentonite pellets or granular bentonite is placed above this backfill, to provide a low permeability seal. The remaining annulus is sealed with a cement/bentonite grout to the ground surface. Well screens are positioned to monitor selected areas of the water column. In high traffic areas, a flush-mount protective casing with a locking well cap is generally installed at the surface and secured with concrete. In low traffic areas, a "stickup" locking protective casing is typically installed.

After installation, wells are developed using either a new disposable high-density polyethylene (HDPE) bailer for each well, or a stainless steel submersible pump, by purging approximately 5-10 well volumes of water from each well, until the well water is visually clear of suspended sediments, or until further yield cannot be achieved. Wells are allowed to stabilize prior to sampling, to ensure the collected sample is representative of groundwater at the location. If a stainless steel pump is used during well development, it is decontaminated between wells using a tri-sodium phosphate (TSP) wash and triple water rinse.

Prior to sample collection, the wells are purged by removing a maximum of 3-5 well volumes of water or until further yield cannot be achieved in order to remove all static water from the wells. Purging is accomplished using either a disposable HDPE bailer which is dedicated to the individual well or a stainless steel submersible pump. Sample collection is accomplished using a new disposable HDPE bailer for each well. Groundwater samples are collected, placed in appropriately sized laboratory provided glassware and labeled, identifying sample number, location and date, and sampling personnel. The proper sample preservatives are added to the sampling jars as required. Standard chain-of-custody procedures are followed regarding shipment and receipt of samples.

Quality Assurance/Quality Control (QA/QC) procedures for field sampling techniques are performed on a site-by-site basis per scope of work considerations and contract obligations.

In accordance with Pioneer's Site Safety Plan, a photoionization detector (PID) is used to monitor ambient air concentrations at the sampling locations. Personal protective equipment is utilized by site personnel during performance of sampling activities, as specified in the Site Safety Plan as necessary.

Any deviations to or modifications of this standard protocol will be described on a site-by-site basis.

APPENDIX G

Local Groundwater Ordinance

Article V. Cross Connections/Backflow Prevention Requirements.

(Ord. No. 3805, Amended, 12/04/95; Ord. No. 3805, Amended, 12/04/95)

25-51. Cross-connection prohibited; backflow prevention device required.

No person shall establish or permit to be established or maintain or permit to be maintained any connection of a nonpublic water supply to the public water supply of the Village, excluding any water system interconnections the Village may establish. Backflow prevention devices shall be installed where required under this Article and in accordance with Illinois Environmental Protection Agency Regulations, specifically Ill. Admin. Code, Title 35, Section 653.803.(Ord. No. 2942, § 1; Ord. No. 3301, § 2.)(Ord. No. 3473, Amended, 06/15/92; Ord. No. 3555, Amended, 04/19/93; Ord. No. 3581, Amended, 08/02/93; Ord. No. 3805, Amended, 12/04/95)

25-52. Private water wells; permit required.

- (a) It shall be unlawful for any person to dig, drill, redrill or extend, or cause to be dug, dniled, redrilled, or extended, any well, hole or other excavation in the ground for the purpose of extracting water therefrom, at any location within the corporate limits of the Village, except:
- (1) Any well authorized and intended to oc owned and operated by the Village as part of the Village's water system;
- (2) Any well situated on a zoning lot (as such term is defined and used in the Comprehensive Zoning Ordinance of the village) on which a building has been or may be lawfully constructed and occupied; provided, that no portion of such zoning lot is located within two hundred and fifty feet (as measured by the most direct route along public right of way or existing utility easements) of a water main owned by the Village that is available to provide water service to such zoning lot;
 - (3) Any well situated outside a zoning

lot; provided, that such well is not located within two hundred fifty feet (measured as provided in paragraph (2) of this section) of a water main owned by the village that is available to provide water service:

- (4) Any well intended and used exclusively for irrigation and watering of crops or landscaping or in cooling towers used in conjunction with air conditioning systems; provided, that the well shall meet the following conditions:
- (i) Such well shall not be drilled to a depth greater than two hundred feet; and
- (ii) Such well shall not be connected in any way to any water system providing water for domestic use or human consumption, including but not limited to, the Village's water system. In order to assure that water from such well is not so connected, the Village may require that a periodic bacteriological sampling may be taken of the domestic water entering any building on the property served by such well. The charge for such sampling shall be automatically added to the water bill for Village water for such building, and shall constitute an expense to the owner thereof, and
- (iii) Any such well with a column pipe up to four inches in size shall not be dug or drilled within fifty feet from any Village-owned well. Any such well with a column pipe greater than five inches in size shall not be dug or drilled within one thousand feet from any Village-owned well; and
- (iv) Such well shall be no less than fifteen feet from any publicly or privately owned water main, and
- (v) A backflow prevention device shall be installed on the water service pipe(s)/line(s) connecting any structure on the property to the public water supply.
- (vi) Such wells shall not be subject to the water conservation regulations in Section 25-5 if the owner or occupant of the property on which the well is located obtains and displays a "private well" sign. A metal sign shall be placed

Supplement No. 9

25 - 16

in the front yard or a paper sign in the window of the property in a location clearly visible from the street. Such signs shall be obtained from the Village: metal property signs for a cost of twenty dollars; paper window signs at no charge. Except as otherwise provided in the preceding sentences, such wells shall be subject to the water conservation regulations in Section 25-5.

(vii) If well water is used in cooling towers in conjunction with air conditioning systems, all such water shall dispense through evaporation or other appropriate means and shall not be discharged into the sanitary or storm sower systems, or otherwise discharged into the ground.

(b) It shall be unlawful for any person to dig, drill, redrill or extend, or cause to be dug, drilled, redrilled, or extended, any well, hole or other excavation in the ground for the purpose of extracting water therefrom, without (1) having first applied for and obtained a permit for such well from the Village, which permit shall not be issued unless the applicant provides satisfactory evidence to the effect that such well is permitted under the provisions of subsection (a) above; (2) establishing that permits therefor have also been issued by DuPage County, the Illinois Department of Mines and Minerals and any other governmental authority having jurisdiction thereof; and (3) certifying that such well will be in full compliance with all applicable health and safety requirements of DuPage County. Fees for the permit required in paragraph (a) hereof shall be as follows:

Work Performed	_Fee_	<u>Bond</u>	
Plan review and			
on site inspection	\$ 100.00	N/A	
Electrical inspection	6.00	NA	
Parkway opening	20.00	\$200.00	

(Ord. No. 2942, § 1; Ord. No. 3301, § 3.)(Ord. No. 3505, Amended, 12/04/95)

25-53. Backflow preventers required for certain facilities.

(a) If the director of public works or his designee determines that an industrial or commercial facility is an actual or potential hazard to the public water supply system, the owner or occupant of the property shall install a backflow prevention device on the water service pipes/lines which connect the industrial or commercial facility to the public water supply system. The following types of facilities are presumed to pose an actual or potential hazard unless the director of public works or his designee. upon certification from cross-connection control device inspector (CCCDI), determines that the building does not pose an actual or potential hazard to the public water supply: (1) hospitals, mortuaries, clinics, nursing homes; (2) laboratories; (3) sewage treatment plants, sewage pumping stations or stormwater pumping stations; (4) food or beverage processing plants; (5) chemical plants; (6) metal plating industries; (7) petroleum processing or storage plants; (8) radioactive material processing plants or nuclear reactors: (9) car washes; (10) pesticide, or herbicide or extermination plants and trucks; (11) farm service and fertilizer plants and trucks. The aforementioned listing is not exhaustive and the director of public works or his designee may determine that other facilities not listed above pose an actual or potential hazard to the public water supply system.

(b) Any property owner or occupant notified in writing of a determination that the facility poses an actual or potential hazard to the public water supply system shall within ninety days of receipt of the notice install the required backflow prevention device at his or her expense and provide the director of public works or his designee with a certificate of inspection from an approved cross-connection control device inspector (CCCDI). (Ord. No. 3301, § 4.) (Ord. No. 3805, Renumbered, 12/04/95, 25-52.1)

REAL ESTATE AGREEMENT

This Contract is made this 9th day of January, 2001, by and between M. C. HOLDINGS, CORP. (hereinafter referred to as "Seller") and ROSS A. JOHNSON and BARBARA R. JOHNSON (hereinafter referred to as "Purchaser").

RECITALS

- I. Seller represents that it or its nominee is the owner of real property located at 2659 Wisconsin Avenue, Downers Grove, Illinois 60515, together with all improvements thereon and appurtenances thereto, legally described in Exhibit "A" which is appended hereto and is by reference incorporated herein (hereinafter referred to as the "Premises") and known as P.I.N. 08-12-303-008.
- II. Seller desires to sell and Purchaser desires to purchase the premises upon the terms and conditions hereinafter set forth.

Now, therefore, in consideration of the recitals which are hereby specifically by reference incorporated herein and in further consideration of the mutual promises of the parties, it is hereby covenanted and agreed as follows:

1. **PREMISES**:

Purchaser agrees to purchase from Seller and Seller agrees to sell to Purchaser the premises legally described in Exhibit "A" including all property owned by Seller at this location as specifically set forth on Exhibit "B" and to cause to be granted to Purchaser or its nominee good and merchantable title thereto by Special Warranty Deed with appropriate state and county revenue stamps affixed, subject only to permitted exceptions as hereinafter defined.

2. <u>PURCHASE PRICE AND EARNEST MONEY</u>:

- A. The purchase price for the premises shall be in the sum of Two Million and no/100 (\$2,000,000.00) Dollars (hereinafter referred to as "Purchase Price"), and shall be payable in the manner and at the time hereinafter set forth.
- B. Upon execution of this Agreement:
 - 1. Upon receipt of a fully executed Agreement, the Purchaser shall deposit Fifty Thousand and no/100 (\$50,000.00) Dollars, in the form of cash or acceptable Letter of Credit as earnest money in an escrow account to be established with EPIC Savage Realty Partners. If the deposit is in the form of cash, the escrow account shall be interest bearing with interest to be paid to the Purchaser.

2. The escrowee shall be instructed to invest said earnest money in money market funds or certificates of deposit or other interest bearing accounts, and the interest earned thereon prior to disbursement to Seller or refunded to Purchaser shall be paid to Purchaser.

3. **CONTINGENCIES**:

Purchaser's obligation to perform under this agreement shall be contingent upon the following:

- A. Effective November 22, 2000, the Purchaser shall have an initial sixty (60) day feasibility period ending January 22, 2001, in which to conduct soil tests, engineering, environmental and any additional investigations deemed necessary. These investigations will be conducted at the Purchaser's expense and the Purchaser shall agree to repair any damage caused during inspections. Purchaser shall indemnify, defend and hold harmless Seller for any liabilities, claims, suits or causes of action against Seller as a result of said investigations. In the event that Purchaser, in its sole discretion, shall determine that any of Purchaser's investigations indicate that development of the premises is unsuitable, then Purchaser shall so inform Seller in writing, whereupon Seller shall forthwith refund or cause to be refunded to Purchaser the earnest money deposited hereunder and this Agreement shall thereupon terminate and become null and void and of no further force or effect.
- B. This Contract shall be subject to the Purchaser's ability to enter into a contract for the sale of Purchaser's property located at 1007 Burlington Avenue, Downers Grove, IL 60515 to the Village of Downers Grove on or before the expiration of Purchaser's feasibility period provided for in paragraph 3(A).
- C. During this initial sixty (60) day period, the Purchaser shall have the right to terminate the contract for any reason and all earnest money, together with any and all interest earned thereon shall be returned to Purchaser. Subsequent to the initial sixty (60) day period, the Purchaser's obligation to purchase the property shall be subject to Purchaser's simultaneous closing of the sale of Purchaser's property at 1007 Burlington Avenue, Downers Grove, IL 60515 to the Village of Downers Grove on or before the 9th day of February, 2001.

4. NON-SATISFACTION OF CONTINGENCIES:

In the event that satisfaction of the foregoing contingencies shall fail to occur on or before January 22, 2001, then this Agreement shall thereupon terminate at Purchaser's or Seller's option and become null and void and of no further force or effect, whereupon Seller shall cause the earnest money herewith deposited with the escrowee to be delivered by it to Purchaser.

5. <u>1031 EXCHANGE</u>:

Purchaser desires to exchange other property of like kind and qualifying use within the meaning of Section 1031 of the Internal Revenue Code of 1986, as amended, and the regulations promulgated thereunder for fee title in the property which is the subject of this contract. Purchaser expressly reserves the right to assign their rights, but not their obligations hereunder, to a Qualified Intermediary as provided in IRC Reg. 1.1031(k)-1(g)(4) on or before the closing date.

6. MORTGAGE CONTINGENCY:

This Contract is contingent upon Purchaser obtaining an unconditional written mortgage commitment (except for matters of title and survey or matters totally within Purchaser's control) on or before January 22, 2001, on terms and conditions acceptable to Purchaser. If Purchaser, having applied for the loan specified above, is unable to obtain a loan commitment and serves written notice to Seller within the time specified, this Contract shall be null and void and earnest money refunded to Purchaser upon written direction of the Parties to Escrowee. If written notice is not served within the time specified, Purchaser shall for all purposes be deemed to have waived this contingency and this Contract shall remain in full force and effect. Should Purchaser receive a mortgage commitment conditioned upon sale and/or closing of existing property, said commitment shall satisfy the terms of this mortgage contingency.

7. **SURVEY**:

Seller shall provide Purchaser with a current ALTA survey of the subject property, at Seller's expense, within thirty (30) days from the date hereof, said survey to include extended coverage and conforming to ALTA standard and bearing the certification of such surveyor to Purchaser, Seller, and the title insurer described in Paragraph 9 below or other mutually accepted title company that same was prepared in accordance with Illinois land survey standards at its own cost.

8. CLOSING PAYMENT OF PURCHASE PRICE:

On or before February 9, 2001, Purchaser shall deposit with the escrowee a sum equal to the difference between the purchase price and all sums theretofore paid or credited to Purchaser pursuant to the terms of this Agreement, and Seller shall deposit with the escrowee its Special Warranty deed conveying the premises to Purchaser or its nominee. Both parties shall further make the deposits described hereinbelow in Paragraph 9B whereupon closing hereunder shall occur (hereinafter referred to as "Closing"). Purchaser shall have the right to one (1) thirty (30) day extension of the closing date upon written notice to Seller of Purchaser's failure to meet the Section 3C contingency.

9. ESCROW: CONVEYANCES:

Upon execution of this Agreement, the parties shall enter into a deed and purchase money escrow with First American Title Insurance Company. Said escrow shall contain, in addition to the standard provisions contained in said instrument, clauses incorporating the following:

Α. First American Title Insurance Company shall forthwith cause a commitment for title insurance, Form B, covering premises to be prepared in the amount of the purchase price. Said commitments shall show good title in Seller, subject only to Schedule B exceptions numbered 1 (as to 2000 taxes), 2, 3, 4, 15 and 16 as depicted on First American Title Commitment No. DC001189 dated May 9, 2000 ("Permitted Exceptions"), a copy of which is attached hereto as Exhibit C; provided, that Seller shall cause any title exception relating to any mortgage lien to be removed on or before the date of closing. Said commitment shall contain endorsements as requested by Purchaser's lender (payable by Purchaser) and a tax parcel endorsement. Seller shall cause the title insurer to issue an extended coverage endorsement over such general title exceptions. If any such title commitment shall disclose defects, encumbrances, or exceptions other than Permitted Exceptions, Seller shall have thirty (30) days from the date of notice thereof to the escrowee to remove same. If Seller shall fail to remove same within the specified time, Purchaser may terminate this Agreement or may elect upon notice to Seller within ten (10) days after expiration of said thirty (30) day period, to take title as it then is, with the right to deduct from the purchase price liens or encumbrances of a definite or ascertainable amount, not to exceed the sum of Ten Thousand (\$10,000.00) Dollars. Purchaser, however, reserves the right not to close if said liens are not removed or insured over. If Purchaser shall fail so to elect, this Agreement shall become null and void without further action of the parties. The expense of said title commitments and the cost of premium charges of the title insurer for insurance over said general title exception or

extended coverage endorsements shall be paid by Seller, however, any endorsements required by Purchaser or Purchaser's lender, shall be paid by Purchaser. Seller shall furnish the title insurer with all documents, affidavits, and undertakings which may be necessary in order to cause good title to be conveyed to Purchaser or its nominee in compliance with this Agreement and in order to cause the title insurer to issue its title commitment or owners guarantee policy.

- B. 1. Seller shall deposit with the escrowee the following documents prior to closing:
 - a. Stamped Special Warranty Deed conveying the premises to the nominee designated in writing by Purchaser;
 - b. Transfer declarations:
 - c. ALTA statement;
 - d. FIRPTA statement:
 - e. IRPTA disclosure document, if applicable.
 - 2. Purchaser shall deposit with the escrowee the following sum and documents prior to closing:
 - a. The sum described in Paragraph 6 above by cashier's or certified check or wire transfer, plus or minus applicable prorations;
 - b. ALTA statement.
 - 3. The parties shall jointly deposit with the escrowee the following documents prior to closing:
 - a. Joint proration statement;
 - b. A copy of this Agreement.

10. **DISBURSEMENTS**:

Upon execution and delivery of a deed for the premises, Seller shall instruct the title insurer to later date its commitment for the title insurance to cover said deed in the amount of the purchase price; and, when the title insurer is prepared to issue

its owner title insurance policy to the grantee in said deed, subject to Permitted Exceptions, it shall disburse the funds held by it as follows:

- A. Pay state and county revenue stamps attached to the deed, the cost of title insurance and policy, and one-half of the escrow fees.
- B. Bill Purchaser one-half of the escrow fees.
- C. Pay to Seller the balance of the purchase price per the joint proration statement.
- D. Pay to Purchaser the balance remaining, if any.

11. SELLER'S ASSURANCES:

Seller warrants, represents and covenants the following during the pendency of this Agreement and at the time of closing:

- A. That Seller has entered into no agreement with any governmental authority and have no knowledge of any actual or proposed ordinance, statute, or agreement which has imposed or may impose any charge, liability, or financial obligation upon the premises, and that Seller shall hereafter execute no such agreement without the express written approval of Purchaser.
- B. That Seller is the owner of good and marketable title to the premises, subject to the Permitted Exceptions.
- C. That no encroachment exists over any property line of premises, except as noted on Exhibit C.
- D. That Seller has received no notice, direct or indirect, of any violation from any governmental authority or of any proposed condemnation of any portion of the premises of any special assessment thereon.
- E. That Seller shall not move any dirt from or upon the premises during the pendency of this Agreement subject to Seller's obligations under Paragraph 12, and shall forebear from using any portion thereof as a borrow pit or dump area for construction debris, rubble, or other refuse.
- F. Except as set forth in Paragraph 12, neither Seller nor, to the best knowledge of Seller, any other person has ever caused or permitted any hazardous, toxic, or dangerous waste, substance, or material (hereinafter referred to as "hazardous material") to be placed, held, located, or disposed

of on, under, or at the premises, and that no portion of the premises has ever been used (whether by Seller or, to the best knowledge of the Seller, by any other person) as a permanent or temporary dump site or storage site for any hazardous material except as disclosed by Sellers environmental reports.

12. ENVIRONMENTAL MATTERS:

Seller has provided Purchaser with copies of a Phase I Environmental Site Assessment of the Property performed by Environmental Management and Resource Consultants, Inc., under report dated May 9, 2000, and a Focused Site Investigation & Remedial Action Completion Report performed by Pioneer Environmental, Inc., under report dated November 8, 2000. Said reports identify the presence on a small portion of the Property of elevated levels of certain compounds. Seller previously caused the affected area of the Property to be excavated. The excavated material remain on site and Seller intends to dispose of same and replace the excavated material with clean fill.

In addition, Seller has applied for a "no further remediation" letter from the Illinois Environmental Protection Agency. Such NFR letter will reflect that no further environmental remediation is required at the site, and will require that any deed conveying interests in the Property reflect that no grantee may use the Property for other than commercial or industrial uses. Purchaser agrees that such a restriction contained in the Seller's deed shall be a "Permitted Exception" hereunder.

In the event that the issuance of the NFR requires the performance of additional clean up at the site, then Seller agrees promptly to undertake to have such additional work performed. If such additional work is not completed prior to the Closing, then the parties agree to close this transaction and Seller will deposit into escrow, with the title insurer as escrow agent, an amount equal to the earnest money hereunder for such purpose. Seller agrees to complete the additional work as soon as practicable and the cost of same shall be paid from the funds in escrow upon application by Seller. Upon completion of such work, and the issuance by the IEPA of its NFR, and remaining funds in escrow shall be released to Seller. The funds held in escrow shall be invested in an interest bearing account and any interest earned therein shall accrue to Seller's benefit.

From and after the Closing date or the date of the issuance of the NFR, whichever is later, Seller shall have no further responsibility to Purchaser, or to Purchaser's heirs, personal representatives, grantees, successors or assigns or to any other party including, without limitation, any party claiming by, through or under Purchaser, for the assessment, monitoring or remediation of any contamination on or at the Property and Purchaser agrees that from and after such date, Purchaser shall not bring any claim, or make any demand, in a court of law or otherwise for damages,

reimbursement, contribution, indemnification or otherwise relating to contamination on, at or migrating from the Property.

13. FIRPTA AFFIDAVIT:

That Seller shall, prior to closing, deliver to Purchaser in accordance with Section 1445 of the Internal Revenue Code and regulations promulgated thereunder, an affidavit by Seller stating under penalty of perjury, Seller United States taxpayer identification number and that Seller is not a foreign person as defined by Internal Revenue Code 1445(F)(3).

14. **DEFAULT**:

- A. It is hereby stipulated and agreed that time is of the essence of this Agreement and each and every part thereof.
- B. If Seller shall fail to perform any covenant, term, or condition of this Agreement or shall breach any warranty herein contained, and such failure or breach shall not be cured within thirty (30) days after delivery of written notice thereof to Seller from Escrowee or Purchaser, then all rights and remedies granted by law or in equity or under this Agreement shall be available to Purchaser, including causes of action for damages and specific performance.
- C. If Purchaser shall fail to perform any covenant, term, or condition of this Agreement or shall breach any warranty herein contained, and such failure or breach shall not be cured within thirty (30) days after delivery of written notice thereof to Purchaser from Escrowee or Seller, then all rights and remedies granted by law or in equity under this Agreement shall be available to Seller, including causes of action for damages and specific performance.

15. **SELLER'S COOPERATION:**

A. Seller agrees that it or its authorized agent, trustee, or attorney shall, at any time after execution of this Agreement, execute such petitions, agreements, and other instruments as Purchaser may desire or request to complete more effectively the transfer to Purchaser of the premises acquired under this Agreement. Seller shall cooperate with Purchaser in executing all applications and documents relative to Purchaser's land plans, zoning, utilities, traffic facilities, and development of the premises which may be required by Purchaser for submission to private or governmental authorities; provided that Seller shall be required to incur no financial obligation thereby.

B. Purchaser shall pay all costs expended or incurred in connection with preparation and submission of any amendment or modification of the zoning classification or any engineering plan or document required in connection therewith, and Seller shall have no responsibility thereof.

16. PURCHASER'S ENTRY: FEASIBILITY:

From and after the execution of this Agreement, Purchaser, its employees, agents, and designated representatives shall have the right to enter upon the premises or any portion thereof for the purpose of making surveys, soil tests, borings, percolation, and other tests and engineering, environmental and architectural studies, at its sole cost; provided that Purchaser shall not suffer nor permit any mechanics lien to attached to or be against or upon the premises which shall or may be superior to the rights of the Seller and save it harmless from and against any claim, obligation, liability, or expense (including, without limitation, attorney's fees and court costs) which may be asserted by any person or party arising out of or in the course of performance of any work or act hereinabove permitted.

17. **IMPROVEMENTS**:

All improvements owned by Seller and presently installed on the premises and specifically set forth on Exhibit B shall be included in the purchase price and shall be conveyed to Purchaser at the time of closing.

18. REAL ESTATE TAXES: POSSESSION:

- A. General real estate taxes for the premises shall be prorated to the date of recordation of deed thereto by the escrowee on the basis of 103% of the most recent ascertainable tax bill. Purchaser shall be solely responsible for any increased tax or tax assessments arising or accruing prior to the closing which are directly attributable to the Purchaser's zoning reclassification or zoning application.
- B. Possession of the premises shall be delivered to Purchaser upon deposit into escrow of the purchase price therefore and recordation of deed thereto.

19. **CONDEMNATION**:

In the event that, prior to the date of closing, all or any portion of the premises or any rights or easements therein shall be taken by condemnation or right of eminent domain or like process, or shall be threatened therewith, and the same, in Purchaser's opinion, would have a materially adverse impact upon its proposed development of the premises, Purchaser shall, within thirty (30) days after having received notice thereof from Seller, elect in writing to either:

- A. Continue this Agreement in full force and effect, notwithstanding such taking or threatened taking, in which case Purchaser shall continue to be required to purchase the premises. In such event, Seller shall deliver to Purchaser the summons and complaint initiating any condemnation proceedings forthwith after service thereof. Purchaser shall be entitled to appear and defend against same, and the total amount of any condemnation award made prior to closing shall be paid to Seller and applied as a credit to Purchaser at closing; or:
- B. Delete that portion of the premises condemned or threatened to be condemned from this Agreement, with a proportionate reduction in the purchase price, in which event Purchaser and Seller shall jointly appear and defend against such condemnation proceedings; or:
- C. Terminate this Agreement. Failure of Purchaser to make a written election as aforesaid shall constitute an election to terminate this Agreement.

20. BROKER'S COMMISSION:

Seller and Purchaser hereby acknowledge that EPIC Savage Realty Partners by David Friedland has acted as broker in the negotiation of this contract and that Seller shall be responsible for any broker's commission due and owing to said Broker.

21. NOTICES:

All notices required or desired to be furnished pursuant to or with respect to this Agreement shall be in writing and shall be personally served or sent by registered or certified mail, return receipt requested, postage prepaid, to the respective parties at the following addresses:

To Purchaser:

Copy to:

Ross Johnson c/o Johnson Printers James F. Russ, Jr. 4915 Main Street

1007 Burlington

Downers Grove, IL 60515

Downers Grove, IL 60515

To Seller:

Copy to:

The Morey Corp. Attn: Dana Morey 100 Morey Drive Woodridge, IL 60517

William Cotter 8182 South Cass Darien, IL 60561 Any party may change its address for purposes of service by delivery of written notice to all other parties designated above. Any notice to all other parties designated above. Any notice mailed in the manner herein specified shall be deemed received on the second business day after mailing.

22. MISCELLANEOUS:

- A. This Agreement shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors, and assigns.
- B. All warranties and representations made hereunder shall survive the closing and delivery of deed and shall remain binding upon the parties for one (1) year.

The second of th

- C. This Agreement shall not be merged into any escrow agreement.
- D. This Agreement may be executed in counterparts and all so executed shall constitute one and the same Agreement.
- E. This Agreement embodies the entire Agreement between the parties with respect to the premises. No extension or amendment of this Agreement shall be made or claimed by any party or have any force or effect whatsoever unless same shall be set forth in writing and signed by the parties.
- F. Wherever applicable, the gender of any words used in this Agreement shall be construed to include any other gender, and any words used in the singular form shall be construed as though they were used in the plural form.
- G. Any party shall have the right, as its option, to waive any covenant, warranty, term or condition of this Agreement, which the other party is obligated to perform or fulfill; provided that any such waiver shall be in writing and delivered to the other party.
- H. This Agreement shall be construed under the laws of the State of Illinois.
- I. Time is of the essence of this Agreement.
- J. Seller agrees to deliver this Agreement to buyer on the same date of Seller's execution of said Agreement.

IN WITNESS WHEREOF, the parties have executed and delivered this Agreement in duplicate on the day of year first above written.

The Morey Corporation Mr. Douglas E. Cunningham 2659 Wisconsin Avenue Downers Grove, IL 60515-0719

RE: MONTGOMERY WARD - DOWNERS GROVE, IL PARKING LOT LEASE RENT INCREASE

Dear Mr. Cunningham:

Your letter of January 19, 1996 was referred to me for handling. According to the terms of our Lease dated February 5, 1980 and the First Supplemental Agreement dated December 29, 1989, our rent shall be increased per section 5 during the option period 10/1/95 thru 9/30/2000. Our fixed rent during this further extended term shall be adjusted upward at the commencement of the extended term by the percentage change in the CPI since the commencement of the extended term, but in no event shall rent be increased by more than 75%.

Below you will find our calculation for this increase using the following indexes:

CPI-U (82 Series) $\frac{10/95}{10/90} \frac{153.7}{133.5} = 15.13$ % Increase

Current monthly rent $$2,141.67 \times 15.13\% = $2,465.70 \text{ mo.}$

I have adjusted our rent retroactively to 10/1/95 to the new monthly amount of \$2,465.70. Our check in the amount of \$1,620.15 representing the rent adjustment for period 10/1/95 thru 2/29/96 shall be forthcoming in about ten days. Please note your records.

Should you have any questions, feel free to contact me at #312/467-7798.

Sincerely,

Barbara Gianfrancesco, Supr.

MOR 000232

<u>MEMORANDUM</u>

TO:

DOUG CUNNINGHAM

FROM:

BILL COTTER

REGARDING:

MONTGOMERY WARDS PARKING LOT LEASE _ 7

DATE:

FEBRUARY 8, 1996

I received the "First Supplemental Agreement" and, as we had discussed, it appears that five years ago TMC in fact agreed to maintain the tenant's rent at the prior rate through 1995. Since this is true, B. Gianfrancesco's analysis in her January 30, 1996 letter appears accurate. We had talked at an earlier time about the likelihood of the rent increase being 75% (the cap set out in the lease); we were not aware at that time of the 1990 supplemental agreement.

B. Gianfrancesco's computation of the increase in rent uses the CPI-U index, which is the consumer price index for all urban consumers, and is only one of several such indices maintained by the US Bureau of Labor Statistics. The CPI-U is a widely-used index, although there are others (for example, relating to specific geographic areas, such as the Chicagoland area, or relating to specific industries, such as manufacturing) that are also published. However, the various indices do tend to track very closely, and the use of one index over another for our purposes would result in only insignificant changes in the rent adjustment.

Finally, we talked about the January 11, 1995 letter from Chuck Jensen. While it is clear that he appeared to labor under the impression that the rent increase would be 75%, his letter is truly a simple offer to modify the terms of the existing lease, which offer was not accepted by TMC. In any contested dispute over the terms of the lease, I suspect that this letter would be disregarded in favor of simply construing the actual lease documents.

If you have any questions, please give me a call.

312-467-2000

THE MOULE CORP.

Scott Morey
The Morey Corporation
2659 Wisconsin Avenue
Downers Grove, IL 60515

RE: Parking Lot Lease Renewal
Montgomery Ward Product Service Facility #2701
Downers Grove, IL

Dear Scott:

1. 1. 1

10.30

I am the regional property manager in the real estate department of Montgomery Ward responsible for renewal of the lease for the above captioned property.

We are presently in the first of two (2), five (5) year renewal options. The date for the renewal of our remaining 5 year option is on or before March 31, 1995, based on 180 days prior notice. The lease is scheduled to expire on September 30, 1995. If renewal occurs, the rent is scheduled to increase to 75% of present rent.

The purpose of this letter is to offer an alternative to the upcoming renewal terms and significant rent increase. This is necessary, as our Product Service department is presently going through some major strategic changes. The areas serviced by this particular facility may be affected.

In an effort to develop some flexibility until the Product Service strategy has been fully developed, it is necessary to maintain a presence in Downers Grove.

Therefore, I would like to propose the following:

	Current _Terms_	Lease <u>Terms</u>	Proposed Terms
Term:	4/1/90 - 9/30/95	(5 yrs.) 10/1/95 - 9/30/2005	(5 yrs.) 10/1/95 - 9/30/2005 (Montgomery Ward would have the right to terminate the lease after the 2nd year, upon 90 days prior notice.)
Rent:	\$25,700/per year	\$44,975/year	\$35,338 per year

All other terms and conditions of the lease would remain the same.

Based on the modified terms above, the landlord is guaranteed a rent increase and Montgomery Ward has the flexibility it requires, while developing a long-term strategy.

After you have had a chance to review the aforementioned proposal to the lease renewal terms, please call me at (312) 467-6245 or send any correspondence to the address on the letterhead.

I will need time to prepare a proposal for management's review and approval, so any efforts on your part to expedite the handling of this matter would be most appreciated.

Regards,

-794 **-**9

Chuck Jensen

Re: Montgomery Ward Lease

Ellsworth Park Unit #5

Downers Grove, IL

Dear Mr. Kerr:

As you will recall, we represent the Downers Grove National Bank and Trust Company as trustee under Trust # 78-309 (The Morey Corporation) in regard to the proposed Lease for the above-captioned premises.

It is my understanding that Montgomery Ward and Company has not as yet signed the Lease and will not do so until the lease for the adjoining parcel has been fully executed.

As you are aware, the proposed Lease with my client provides for the completion of the improvements by June 1, 1980. Obviously, that date will not be realistic if there is any further delay in the execution of the Lease.

As you are further aware, the cost of construction increases almost daily. We will expect that the Lease will be executed in the near future or the terms will have to be renegotiated.

Very truly yours,

BAUER & HOTTE, P. C.

The Morey Torporation

September 14, 1979

Montgomery Ward P.O. Box 7337 Chicago, Illinois 60680

Attn: Greg Palka

Northcentral Regional Real Estate Dept.

Gentlemen:

We are pleased to submit for your consideration the following details concerning rental of parking facilities for your proposed service center in our area.

The area involved would consist of the approximately 48,667 square feet as discussed and would be made ready for your use in accordance with drawing submitted on your visit in the last week of August. Wards would supply on a no charge basis, the fuel tank, pump and associated hardware and fittings.

The lease period shall be for 10 years. The two 5 year options to extend will be acceptable subject to mutual agreement of the effect of ravaging inflation.

The Morey Corporation shall be held loss free of any maintenance costs during all periods and a certification of insurance shall be furnished by Montgomery Ward to hold The Morey Corporation free of any and all other claims against it.

The Realestate Tax for this portion of land was \$1346.54 for 1978 and this amount shall be considered as the base figure included for the first three years of rental. The Morey Corporation shall continue to pay this tax. The rental shall be changed upward or downward for years 4 through 10 on a dollar for dollar adjustment basis of this base tax.

The rental shall be \$28,200.00 per year, payable on a monthly basis.

We understand from our contractor, that should we have your order to proceed by the first of October, we can be ready for your January 1, 1980 use.

The precise language of our lease agreement shall, of course, be the product of both of our legal counsels.

We shall await your instructions.

Very truly yours, THE MOREY CORPORATION

Ellsworth Park Unit #5
Downers Grove, Illinois

Dear James:

Thank you for your letter of January 4, 1980. Your client's lease is acceptable to us, and is being prepared for execution.

However, we are still negotiating some minor points of the lease for the adjaining premises, and that delay has caused us to put off execution of your client's lease until both can be executed at the same time. We are hopeful of doing this within the next seven to ten days.

I will advise further shortly.

Very truly yours,

Dear Ed:

Enclosed is the completed lease between The Morey Corporation and Montgomery Ward & Co. It's been a long time coming but we finally did it.

As I mentioned in our meeting on Wednesday, April 2, 1980, I've listed below the individuals at Wards who are directly involved with this project:

Mr. Warren Mathews Real Estate Manager 140 South State Chicago, Illinois (312) 467-3261

Mr. Ray Olson Engineering Department 140 South State Chicago, Illinois (312) 467-3197

Either one of these individuals should be able to give you an answer or direct you to the person in charge. If you have problems, please do not hesitate to call me.

Again, it's been a sincere pleasure working with you and best of luck with the lease.

Kindest regards,

KAPLAN, GOODE & CO.

FIRST SUPPLEMENTAL AGREEMENT

THIS FIRST SUPPLEMENTAL AGREEMENT made this 29th day of December, 1989, by and between DOWNERS GROVE NATIONAL BANK.

National Banking Association, as Trusted under Trust No. 78-309, Dereinafter called Landlord, and MONTGOMERY WARD & CO., INCORPORATED, an Illinois corporation, with corporate offices at One Montgomery Ward Plaza, Chicago, Illinois 60671, hereinafter called Tenant.

WITNESSETH:

WHEREAS, the parties hereto entered into a certain Lease Agreement dated February 5, 1980, hereafter called the Lease, covering certain premises located in the City of Downers Grove, County of DuPage, State of Illinois, commonly known as 2663 Wisconsin Avenue, now occupied by Tenant and more fully described in said Lease, and

WHEREAS, the parties are mutually desirous of supplementing said Lease;

NOW THEREFORE, for and in consideration of the mutual covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

- (1) The term of said Lease is hereby extended from and including the first (1st) day of October, 1990 to and including the thirtieth (30th) day of September, 1995.
- (2) Tenant shall continue to pay rent to Landlord for the leased premises during the extended term herein provided at the annual rate of TWENTY FIVE THOUSAND SEVEN HUNDRED AND NO/100 DOLLARS (\$25,700.00), payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prorated.
- (3) Payments to the Landlord may be made by checks or drafts payable to the order of The Morey Corporation, and mailed to such payee at 2659 Wisconsin Avenue, Downers Grove, Illinois 60515.
- (4) Effective as of the complete execution and delivery of this First Supplemental Agreement, Section 4 of said Lease shall be and is hereby cancelled and deleted therefrom, it being understood and agreed, however, that the Tenant shall continue to have the option granted to it in Section 5 of said Lease to further extend the term for an additional period of five (5) years from the end of the extended term herein provided, in accordance with said Section 5.
- (5) In consideration of One Dollar (\$1.00) paid by the Tenant to the Landlord, the receipt and sufficiency of which is hereby acknowledged, Landlord hereby agrees that the Tenant shall have the option to execute this First Supplemental Agreement at any time within thirty (30) days after receipt of the same duly executed by Landlord.

RE: Parking lot lease, Montgomery Ward Service Facility 2701, Behind Walnut Avenue, Downers Grove, Illinois.

Dear Mr. Jensen:

As you are aware, Montgomery Ward has chosen to exercise the final five year option on the parking lot described above.

The lease terms provide for a 75% increase in rent effective on the October 1, 1995 renewal date.

We therefore request that you update your records and payment system to reflect a monthly rent of \$3,747.91 as of October 1, 1995.

Please feel free to call the undersigned at (708) 964-2300 with any questions.

Very truly yours,

THE MOREY CORPORATION

Re: Montgomery Ward Parking Lot Lease

Dear Doug,

I am returning the documents which you had sent to me concerning the captioned lease. I have retained a copy of the actual lease, but have not kept copies of the other materials.

Montgomery Ward has suggested a five-year renewal of the lease at a lower rent that would otherwise be called for under the lease, coupled with the ability to terminate after two years. As I mentioned to you on the phone, our review of the lease does not indicate that there are any simple "outs" for the landlord, or any manner in which to deter the tenant for exercising its right to extend the lease. Your only true ability to terminate the lease is in the event of a tenant default, which you indicated has not occurred. To the contrary, Montgomery Ward has apparently been a very good tenant.

At this point, it appears your strategic options are somewhat limited: (1) you could reject the Montgomery Ward proposal and require strict adherence to the terms of the lease and hope that Montgomery Ward's plans are such that they would elect simply not to renew at all; (2) you could agree to the lower rent proposed by Montgomery Ward, but only on the condition that both landlord and tenant have the right to terminate the lease after two years (or some other period), (3) you could perhaps propose that the tenant waive its right to extend for five years in exchange for a one-year renewal - perhaps at the old rent. Opting for (1) above - the hardball approach - certainly could produce the best results for Morey, but clearly is a gamble; however, the tenor of Montgomery Ward's January 11 letter suggests that Montgomery Ward perceives any renewal of the lease to be a significant benefit to Morey.

Incidentally, as I mentioned to you, when I was speaking to Downers Grove National Bank the other day, I inquired into the status of the landlord-land trust (number 78-309). I was advised that the Bank's computer records reflected the trust was terminated in 1986. The Bank

O'BRIEN, O'ROURKE & HOGAN

Mr. Douglas Cunningham MOREY CORPORATION

January 28, 1995 Page -2-

could not at the time locate their files to determine to whom the property was conveyed. I suggested to you when we spoke that this seemed somewhat unusual since the trust would not have expired by its terms (typically 20 years) in 1986, and given the existence of the long term lease, there probably would have been no activity on the trust file. However, there may have been reasons why the trust was terminated at that time -- such as the repayment of any mortgages or other loans for which the property served as collateral. In any case, I wanted you to be alerted to this fact so that any extension documentation with Montgomery Ward would reflect the proper parties.

In any case, if you need assistance in documenting any agreement that you reach with Montgomery Ward, or if you have any questions, please let me know.

Sincerely,

William J. Cotter

Re: Montgomery Ward Lease

Ellsworth Park Unit #5

Downers Grove, IL

Dear Mr. Kerr:

In accordance with our recent telephone conversations, I am enclosing a photostatic copy of Lease previously tendered to me with the following changes and/or deletions:

- (1) Leases dated December 1, 1979.
- (2) The rent can be adjusted upward, but not downward, during any extention terms.
- (3) That all maintenance of the demised premises are the obligation of the tenant.
- (4) That Landlord has no obligation whatsoever in regard to insurance.
 - (5) That cost of leasehold title policy and recording of

Lease Agreement shall be bourn by Tenant.

I believe that these changes correctly reflects the intention of the parties but will await your comments before I incorporate them into the master copies of the Lease.

Very truly yours, .

- 16. (a) The Landlord shall pay when due all taxes and assessments of every kind and nature which have been or which shall during the term of this lease be levied, assessed or otherwise imposed upon the leased premises, including all improvements now or hereafter thereon, but nothing contained in this Section 16 shall be deemed to obligate the Landlord to pay any taxes levied or assessed against the personal property of the Tenant located in the leased premises or any taxes commonly known as "chain store taxes" imposed on the Tenant by reason of the fact that the Tenant operates more than one place of business in the jurisdiction imposing such tax, which personal property taxes and chain store shall be paid the Tenant.
- (b) The Tenant, upon receipt of satisfactory evidence of the amount of such excess, shall reimburse the Landlord the amount by which the general real estate taxes levied and assessed against the leased premises for each subsequent tax fiscal year during the term of this lease exceed the general real estate taxes levied and assessed against the leased premises for the third tax fiscal year following Tenant's occupancy; provided, however, that the Tenant shall be obligated to pay only its pro rata share of such excess taxes for the tax fiscal year during which its obligation to pay rent under this lease ceases, said pro rata share to be based upon the number of days of the then current tax fiscal year for which the Tenant has been obligated to pay rent under this lease.
- (c) Prior to the payment thereof, the Landlord shall submit to the Tenant copies of all general real estate tax bills, a portion of which the Tenant may be obligated to pay to the Landlord under this Section 18, together with a statement showing the computation of the amount owed by the Tenant to the Landlord hereunder, supported by such evidence as the Tenant may reasonably require, whereupon the Tenant (unless it shall contest such taxes as hereinafter provided) shall pay to the Landlord within thirty (30) days after receipt of such bills, statement and other evidence, that portion of such general real estate taxes required to be paid by the Tenant hereunder.
- (d) In the event the Tenant shall desire to contest the validity or amount of any tax, a portion of which it may be required to pay to the Landlord hereunder, the Tenant, within thirty (30) days after being notified of the amount thereof, shall notify the Landlord of its intention to do so, whereupon the Landlord shall defer payment of any such tax so long as the validity or amount thereof shall be contested by the Tenant in good faith and by proper proceedings, except that the Landlord may make such payments under protest or take such other steps with regard to said tax as will not prejudice the Tenant's opportunity to successfully contest the validity, or amount thereof. The Landlord agrees to render to the Tenant all assistance reasonably possible, without expense to the Landlord, in contesting the validity or amount of any such tax, including joining in and signing any protest or pleading which the Tenant may deem it advisable to file. Should any rebate be made on account of any tax a portion of which has been paid by the Tenant to the Landlord hereunder shall belong to and be paid to the Tenant.
- 17. Tenant shall maintain the parking lot areas, fence, and paved areas in good condition and repair, and shall also, as necessary, maintain, repair, and replace the gas pump and lighting facilities on the demised premises.
- 18. Tenant shall carry General Liability insurance, or at its option be self-insured, with limits of not less than Two Hundred and Fifty Thousand Dollars (\$250,000.00).

Public Lightlity The bandlord shall easily policies of incurrence against public lightlity wish limits of at least Two Hundred Fifty Thousand Dellars/Two Hundred Pifty Thousand Dellars (\$250,000/\$250,000) and against property damages with a light of at least Two Hundred Fifty Thousand Dellars (\$250,000), which incurrence shall be in effect at all times during the consecution of Landlord's Improvements:

All insurance polices required hoseunder shall include Tenunt as a name insured or provide for diseas contractural liability of the insurance contract to Tenant and shall be corried by responsible, solvens corriers authorized to the business in the crare in which the President 19 located.

the following endorsements shall be pluced on all insurance policies carried by the Landlord pursuant to this Section 8.

- (a) "Before changing of cancelling this policy, the Insurance Company agrees to give five (5) days prior written notice to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois 60603, attention of the Regional Real Estate Department."
- (b) "Notice is received and accepted by the Insurance Company that the insured has waived the right of recovery from Monagomery Ward & Co., Incorporated."

required under this section bearing the required endorsements shall be depocited, upon request with the Tenant on or before commencement of the term of this lease.

- 19. Within Thirty (30) days after final execution of this Lease, Landlord shall commence, and thereafter diligently prosecute to completion, the following Landlord's work, as also more fully described an Exhibit "B", which is attached hereto and made a part hereof:
 - (a) Grade, compact, and gravel the parking areas so as to be suitable for Tenant's intended use.
 - (b) Install a six (6) foot chainlink fence (with barbed wire and sliding gate) around the perimeter of the demised area.
 - (c) Excavate for, position, and install a certain Eight Thousand (8000) gallon gasoline tank, and pump, located as shown on Exhibit "B", tank and pump to be supplied by Tenant promptly after last execution of this Lease.
 - (d) Provide electric service to the gas pump.
 - (e) Install and erect a lighting pylon, and attach lighting fixtures thereto, as shown on Exhibit "A".
 - (f) Lay concrete paving in and about the area of the gasoline pump as required.
 - (g) Pave a hard surface, all weather, access drive from the pump area to the adjoining parcel also leased by Tenant.

All work required to be performed by the Landlord hereunder shall be performed in a good and workmanlike manner. The Premises shall be left at the completion of such work in a safe, clean and tenantable condition and in good order and repair. Landlord shall perform all work provided for hereunder in conformity with all applicable construction and building codes and with every applicable requirement of law or duly constituted authority of law, or any Board of Underwriters, Rating Bureau or similar organization having jurisdiction, of carriers of insurance on the leased Premises.

- 20. Tenant shall take possession of the Leased premises within a reasonable time, not to exceed Thirty (30) days, after Landlord notifies Tenant that all Landlord's work pursuant to Paragraph #19 has been completed and that Tenant may have exclusive possession of the Premises. In the event the Landlord has not completed all work on or before June 1, 1980 , Tenant may cancel this Lease by sending written notice to Landlord, whereupon this Lease shall be terminated and of no further force and event:
- 21.1 Within thirty (30) days from the date of last execution of this Lease. Landlord shall pay feet, provide and deliver to Tenant (at the office of Tenant) a leasehold title insurance policy of a title company acceptable to Tenant in the amount of ONE HUNDRED THOUSAND and No/100 (\$100,000.00) DOLLARS covering the date hereof, or if Tenant so elects, its preliminary report on title or title binder in said amount of \$100,000.00 showing title in Landlord, subject only to matters to which this Lease is subject. All such title costs and premiums to be paid by Landlord.

If the report on title, title binder, or leasehold title insurance policy, so required, discloses any defects in title (other than such usual objections contained in Leasehold policies and matters to which this Lease is subject) Landlord shall, upon tendering the same to Tenant within thirty (30) days from the date of last execution of this Lease, have sixty (70) days, from the date which such title report, binder, or leasehold title insurance policy bears, to cure such defects and to furnish such title report, binder, or leasehold policy showing such defects ures or removed. If such defects in title are not so cured within sixty (60) days, enaities, at its option, terminate this Lease. In the event this Lease is so terminate at least the reporting of the reprocitive of the reporting of the rep

MOR 000268

, i.e.

- 21.2 Tenant may, at its option, record this Lease and the cost of all documentary stamps, or conveyancing, transfer tax and recording fees shall be paid equally by the parties heres. If ILMANT
- 21. Broker's Commissions If there are any Broker's fees or commissions payable in connection with the bringing about of the execution and delivery of this lease, the Landlord agrees that Landlord will pay same, that the Tenant shall not be liable for such fees and commissions and that the Landlord will indemnify and save the Tenant harmless from any and all claims for such fees and commissions.
- 22. Landlord and Tenant acknowledge that Tenant is negotiating a Lease of substiantially like terms and conditions for Premises adjoining the Landlord's Premises, and that Tenant's use of the demised premises is not feasible without the use of said adjoining Premises. Notwithstanding anything in this Lease to the contrary, Tenant's rental obligation hereunder shall not commence until Tenant has taken possession of the adjoining Premises. When the commencement date of both leases has become fixed, Landlord and Tenant agree to execute a Lease Supplement fixing the commencement date and the termination date of the Lease.
- If, due to fire, the elements, or the exercise of the right of eminent domain or other authority of law, or any other cause, the premises shall become untenantable, dangerous or unfit for the Tenant's use, rent payable under this lease shall abate during the continuance of that condition. If the conditions which give rise to an abatement of rent under this section continue for a period of ninety (90) days, then the Tenant may, at any time within sixty (60) days after such ninety (90) day period, cancel this lease and terminate its tenancy by giving the Landlord written notice of its intention to do so.

All notices, approvals, or requests in connection with this lease shall be sent by registered mail or telegram. Notices to the Landlord may be addressed to the Landlord at the address set forth in Section 3 above. Notices to the Tenant shall be addressed to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois, attention: Regional law Department.

Employees or agents of the Tenant have no authority to make or agree to make a lease. This instrument shall not be binding upon the Tenant until it has been executed on behald of the Tenant by one of its corporate officers. No act or omission of any employee of the Tenant shall alter, change, or modify any of the provisions of this lease. Any alterations, changes, and modifications of this lease shall be effective only when made in writing and executed on behalf of the Tenant by one of its corporate officers.

All the grantors of the term shall be bound jointly and severally by this lease. This lease shall inure to the benefit of and be binding upon, the respective heirs, legal representatives, successors and assigns of the Landlord and the Tenant.

IN WITNESS WHEREOF, this lease has been duly executed under seal as of the first hereinabove written.

Attn: Mr. Kent Kerr

Re: Montgomery Ward Lease Ellsworth Park Unit #5

Downers Grove, IL

Dear Mr. Kerr:

In accordance with our recent telephone conversations, I am enclosing a photostatic copy of Lease previously tendered to me with the following changes and/or deletions:

- (1) Leases dated December 1, 1979.
- (2) The rent can be adjusted upward, but not downward, during any extention terms.
- (3) That all maintenance of the demised premises are the obligation of the tenant.
- (4) That Landlord has no obligation whatsoever in regard to insurance.
 - (5) That cost of leasehold title policy and recording of

Lease Agreement shall be bourn by Tenant.

I believe that these changes correctly reflects the intention of the parties but will await your comments before I incorporate them into the master copies of the Lease.

Very truly yours, .

BAUER & HOTTE, P. C.

22. Landlord and Tenant acknowledge that Tenant is negotiating a Lease of substiantially like terms and conditions for Premises adjoining the Landlord's Premises, and that Tenant's use of the demised premises is not feasible without the use of said adjoining Premises. Notwithstanding anything in this Lease to the contrary, Tenant's rental obligation hereunder shall not commence until Tenant has taken possession of the adjoining Premises. When the commencement date of both leases has become fixed, Landlord and Tenant agree to execute a Lease Supplement fixing the commencement date and the termination date of the Lease.

If, due to fire, the elements, or the exercise of the right of eminent domain or other authority of law, or any other cause, the premises shall become untenantable, dangerous or unfit for the Tenant's use, rent payable under this lease shall abate during the continuance of that condition. If the conditions which give rise to an abatement of rent under this section continue for a period of ninety (90) days, then the Tenant may, at any time within sixty (60) days after such ninety (90) day period, cancel this lease and terminate its tenancy by giving the Landlord written notice of its intention to do so.

All notices, approvals, or requests in connection with this lease shall be sent by registered mail or telegram. Notices to the Landlord may be addressed to the Landlord at the address set forth in Section 3 above. Notices to the Tenant shall be addressed to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois, attention: Regional law Department.

Employees or agents of the Tenant have no authority to make or agree to make a lease. This instrument shall not be binding upon the Tenant until it has been executed on behald of the Tenant by one of its corporate officers. No act or omission of any employee of the Tenant shall alter, change, or modify any of the provisions of this lease. Any alterations, changes, and modifications of this lease shall be effective only when made in writing and executed on behalf of the Tenant by one of its corporate officers.

All the grantors of the term shall be bound jointly and severally by this lease. This lease shall inure to the benefit of and be binding upon, the respective heirs, legal representatives, successors and assigns of the Landlord and the Tenant.

IN WITNESS WHEREOF, this lease has been duly executed under seal as of the first hereinabove written.

Re: Parking lot for Montgomery Ward

Dear Mr. Cunningham:

Enclosed please find a letter of interest from Montgomery Ward regarding your land immediately behind the building at 5355 Walnut Street, Downers Grove. I have shown them your property on March 7th and 16th, 1979.

You will note that there is no stated rental price. This is based on the fact that there is work to be done on the property and amortized over the term of the lease. In the event a lease contract is agreed upon Kaplan, Goode & Co., would receive as commission payment, 3% of the total rental called for in the lease. If Montgomery Ward should execute the option periods Kaplan, Goode & Co. would be paid 3% of the total rental called for in the option period of the lease.

I look forward to working with you on this project and will be available at your request.

Sincerely,

KAPLAN, GOODE & CO.

Re: Downers Grove, Illinois
Ward Proposed Parking Lot

Dear Mr. Cunningham:

After reviewing the gravel parking area behind 5355 Walnut, Downers Grove, with Mr. Steve Goode and Ward's operating management, we wish to express our interest in further discussing the leasing of this area. I am in receipt of a drawing of this lot which indicates approximately 100 available spaces. Ideally, Ward desires 125 to 150 spaces in the event that additional land adjacent to your existing lot could be transformed for this purpose. I would, also, like you to consider making the following three improvements which will be necessary for our needs:

- (1) Complete paving and striping of the subject lot and drive connecting it to the drive behind the building just west.
- (2) Complete fencing of the subject lot to Ward's standard specifications.
- (3) Addition of adequate lighting for security purposes.

In addition, I would like you to consider the following lease structure:

LEASE TERM:

10 years fixed (a necessity, since we concurrently

wish to lease the facility just west for a like

term).

OPTION TO EXTEND:

Two 5-year periods.

OPTION TO CANCEL:

None.

ANNUAL RENTAL:

To be determined subject to the landlord's agreement to making the previously requested improvements as preferred by Wards (\$3,300 is understood to be

the base asking rental).

MOR 000271

Mr. Ed Cunningham C/O Kaplan, Goode & Co.

MAINTENANCE:

Upon completion of paving and fencing, Ward shall be responsible for all maintenance and patching to the point of complete replacement which shall be the landlord's responsibility.

REAL ESTATE TAXES:

To be paid by landlord.

Anything contained herein notwithstanding, further pursuit and subsequent execution of an arrangement to lease this lot must be contingent upon Ward's concurrently arranging an agreement to lease the facility at 5355 Walnut in Downers Grove.

After your review of this proposal, I will be glad to meet with you and Mr. Steve Goode in order to resolve any points of further discussion. I feel that Ward can offer you an excellent investment possibility in terms of both longevity and security. I hope to hear from you at your earliest convenience.

Very truly yours,

G. A. Palka

Dear Mr. Olson:

We are enclosing a copy of the plans and specifications of what we consider to be our obligations with respect to the parking area that you are leasing from us.

We would appreciate your prompt review and return of one signed copy so that we may instruct our contractor to proceed.

Kindly call should there be any questions.

Very truly yours,

PLANS AND SPECIFICATIONS MONTGOMERY WARD PARKING LOT

We propose to furnish labor and material to install parking lot as per outline survey and specifications on preliminary plan.

We will grade present lot to as near as possible a flat plain sloping to lower side of lot.

We will then install approximately 6" of rough stone from $1\frac{1}{2}$ " to 0 grade and then top with approximately 2" of fine screening rolled and compacted.

We will excavate for and install a gasoline steel storage tank.

PERMITS:

Apply and bear cost of state and local permits as required, and notify state and local fire prevention bureaus prior to starting installation.

TANKS:

Install 1-8000 gallon steel tank of (Fiberglass) tank with 4" Midwest opening and U.L. label in the area designated, including excavation and backfilling.

SUMP:

We will furnish and install a spill control inspection sump by tank as required by codes.

TEST:

Tank to be tested prior to installation, and all completed piping to be tested before trenches and top of tank is backfilled, to assure a safe and efficient system.

PIPING:

We will install with galvanized pipe and fittings; $1\frac{1}{2}$ " suction line, complete with OPW #32H Double poppet angle check valve and the required swing joints at tank.

We will install a complete Vapor Recovery System. Enco Wheaton coaxial fitting, locking cap and an A70 drop tube on 4" fill line to tank, a 12" manhole and lid at grade, and required to meet State codes and approved by Illinois Environmental Protection Agencies. 2" vent line, complete with swing joints, from tank to building, or pump island and up to a height of 12' as required by codes. Vent head will be a rustproof aluminum cap, updraft type, to dissipate hazardous vapors, and prevent accumulation of these vapors at ground level.

PUMP: We will set pump and tank furnished by Montgomery Ward.

We will install a concrete slab above tank of approximately 38' wide by 33' long. We will have a raised concrete island above slab for pump and pylon light.

We will have a blacktop approach to the parking lot where entrance will be facing adjoining building to the west as per plans.

We will install a 6' chainlink fence around the entire lot which measures approximately 265' X 183'. Fence to be as follows:

INSTALLATION:

All concrete used for post foundation shall be certified ready-mix concrete designed to obtain a minimum compression strength of 2,500 psi at 28 days or shall be mixed at the job site in the following proportions by volume: one part Type I Portland cement, two parts sand, three parts course aggregate, using just enough water to obtain workability.

- (a) Posts shall be installed plumb at no more than 8 feet center to center.
- (b) Posts for fence and gates shall be embedded 36" minimum in concrete foundation.

Erect approximately 884 lineal feet of 72" high galvanized mesh with three strands of barb wire on top per project specifications.

Supply one (1) cantilever gate 16 feet in width.

MATERIALS:

FABRIC:

72" high 9 gauge mesh

TERMINAL POST:

2½" O.D. structural pipe

LINE POST:

2" O.D.

CANTILEVER GATE:

4" O.D. schedule 40 pipe

CANTILEVER GATE:

21/2" O.D. rails with 2" uprights for bracing standard

in industry.

BARB WIRE:

4 pt. 12½ gauge galvanized.

ELECTRIC:

We will furnish and install electric wiring from building west of this site (leased by Wards) to pump island and connect gas pump and furnish and install a pylon light on island as called for on plans.

Mr. Ed Cunningham C/O Kaplan, Goode & Co. 2 North Riverside Plaza Chicago, Illinois 60606

Re: Downers Grove, Illinois
Ward Proposed Parking Lot

Dear Mr. Cunningham:

After reviewing the gravel parking area behind 5355 Walnut, Downers Grove, with Mr. Steve Goode and Ward's operating management, we wish to express our interest in further discussing the leasing of this area. I am in receipt of a drawing of this lot which indicates approximately 100 available spaces. Ideally, Ward desires 125 to 150 spaces in the event that additional land adjacent to your existing lot could be transformed for this purpose. I would, also, like you to consider making the following three improvements which will be necessary for our needs:

- (1) Complete paving and striping of the subject lot and drive connecting it to the drive behind the building just west.
- (2) Complete fencing of the subject lot to Ward's standard specifications.
- (3) Addition of adequate lighting for security purposes.

In addition, I would like you to consider the following lease structure:

LEASE TERM:

10 years fixed (a necessity, since we concurrently wish to lease the facility just west for a like term).

OPTION TO EXTEND:

Two 5-year periods.

OPTION TO CANCEL:

None.

ANNUAL RENTAL:

To be determined subject to the landlord's agreement to making the previously requested improvements as preferred by Wards (\$3,300 is understood to be the base asking rental).

MAINTENANCE:

Upon completion of paving and fencing, Ward shall be responsible for all maintenance and patching to the point of complete replacement which shall be the landlord's responsibility.

REAL ESTATE TAXES:

To be paid by landlord.

Anything contained herein notwithstanding, further pursuit and subsequent execution of an arrangement to lease this lot must be contingent upon Ward's concurrently arranging an agreement to lease the facility at 5355 Walnut in Downers Grove.

After your review of this proposal, I will be glad to meet with you and Mr. Steve Goode in order to resolve any points of further discussion. I feel that Ward can offer you an excellent investment possibility in terms of both longevity and security. I hope to hear from you at your earliest convenience.

COTESTICATES NOT THE COLUMN ASSESSMENT AND ASSESSMENT A

- - (a) Grade, compact, and gravel the parking areas so as to be suitable for Tenant's intended use.
 - (b) Install a six (6) foot chainlink fence (with barbed wire and sliding gate) around the perimeter of the demised area.
 - (c) Excavate for, position, and install a certain Eight Thousand (8000) gallon gasoline tank, and pump, located as shown on Exhibit "B", tank and pump to be supplied by Tenant promptly after last execution of this Lease.

(d) Provide electric service to the gas pump.

MOR 000278

- (e) Install and erect a lighting pylon, and attach lighting fixtures thereto, as shown on Exhibit "B".
- (f) Lay concrete paving in and about the area of the gasoline pump as required.
- (g) Pave a hard surface, all weather, access drive from the pump area to the adjoining parcel also leased by Tenant.

All work required to be performed by the Landlord hereunder shall be performed in a good and workmanlike manner. The Premises shall be left at the completion of such work in a safe, clean and tenantable condition and in good order and repair. Landlord shall perform all work provided for hereunder in conformity with all applicable construction and building codes and with every applicable requirement of law or duly constituted authority of law, or any Board of Underwriters, Rating Bureau or similar organization having jurisdiction, of carriers of insurance on the leased Premises. See paragraph 19, continued on Page 4a.

20. Tenant shall take possession of the Leased premises within a reasonable time, not to exceed Thirty (30) days, after Landlord notifies Tenant that all Landlord's work pursuant to Paragraph #19 has been completed and that Tenant may have exclusive possession of the Premises. In the event the Landlord has not completed all work on or before June 1, 1980, Tenant may cancel this Lease by sending written notice to Landlord, whereupon this Lease shall be terminated and of no further force and event.

The following provisions shall be incorporated and made part of this Exclusive Agency Agreement.

With reference to Item (1) under "The Owner Agrees" on the reverse side hereof, the commission schedule is as follows:

SALE:

6% of the first \$100,000 of sale price and 5% on the balance.

NET LEASE:

3/2 % of 10 y R-

- A. For a lease of more than one (1) year to and including six (6) years Commission is 8% of the first years rental plus 2% of the total rental reserved in the lease after the first year.
- B. For a lease of more than six (6) years Commission is 3-1/2% of the total rental reserved in the lease for the first twenty-five (25) years or less plus 1-3/4% of the total rental reserved for the balance of the term after twenty-five (25) years.

GROSS LEASE:

- A. For a lease of more than one (1) year to and including six (6) years Commission is 7% of the first years rental plus 2% of the total rental reserved in the lease after the first year.
- B. For a lease of more than six (6) years Commission is 3% of the total rental reserved in the lease for the first twenty-five (25) years or less plus 1-1/2% of the total reserved for the balance of the term after twenty-five (25) years.

PAYMENT:

Lease Commissions are payable on the date of signing of the lease.

OPTIONS:

- A. If a lease contains an option to renew and if the Lessee exercises such option, then a commission shall be paid on the additional period equal to the difference between the amount of commission due for the entire term and the amount of commission previously paid. Commission shall be paid at the time of such renewal.
- B. If a lease contains an option to lease additional space and the Lessee exercises such option then a commission shall be paid at rate set forth for a new lease.
- C. If a lease contains an option to purchase the property and if the Lessee exercises such option, then a commission on said sale shall be paid to the broker based on rates as indicated above, less any commission already paid for the unexpired portion of the lease. Such sales commission shall be paid at the time of said purchase.
- D. The above agreements as to option commission shall be made part of any lease.

EXCLUSIVE AGENCY AND COOPERATIVE LISTING AGREEMENT

To:

KAPLAN, GOODE & CO.

2 North Riverside Plaza Chicago, Illinois 60606 In consideration of our mutual agreements and of your efforts to secure a buyer or tenant for the property located at _____, Illinois, and described as the undersigned, hereinafter referred to as "OWNER", warrants his authority to execute this agreement and does hereby employ you as exclusive agent from ______19____to_____ ____with sole authority to offer said property for sale or lease, including authority to advertise and to place "For Sale" or "For Rent" signs thereon, on the following terms and conditions: TERMS OF SALE: _____ TERMS OF LEASE: ___ THE OWNER AGREES: (1) To pay you a real estate brokerage commission in an amount determined by the applicable rate as indicated in schedule on reverse side hereof (a) for your services in procuring a purchaser or lessee of the property on the above terms or such other terms as the OWNER shall accept, or (b) if the property is sold or leased by you, by OWNER, or through any other person, during the period hereof, or (c) if the property is sold or leased within six (6) months after terminating date hereof to a purchaser or lessee, or anyone on behalf thereof, to whom it was submitted by you and whose name has been registered with OWNER. (2) To cooperate with you in bringing about a sale or lease of said property and to refer to you all inquiries of brokers or others interested in said property, that all negotiations or dealings shall be with and through you as agent, and that you may list this property with cooperating brokers. (3) In the event your authority is revoked or said property is withdrawn from sale or lease during the period of this agreement, then to pay you as compensation for your services and as liquidated damages an amount equivalent to a brokerage commission based upon the sale or lease price as above stated. (4) To reimburse you for advertising expenses as follows: THE AGENT AGREES: (1) To inspect the said property, to secure and compile written information with respect thereto and to make an earnest and continued effort to sell or lease said property at the terms hereinabove set forth. (2) TO LIST THIS PROPERTY WITH OTHER ACTIVE INDUSTRIAL REAL ESTATE BROKERS AND TO COOPER-ATE FULLY WITH ALL REAL ESTATE BROKERS. (3) To promote and advertise said property for sale or lease in the manner that in the judgment of the agent will aid in securing prospects for the OWNER'S property. (4) To send information and copy of any descriptive brochure to prospective buyers and to others as the OWNER requests. (5) To take prospective buyers or lessees through the said property at convenient times and from time to time to advise OWNER as to sale or lease conditions upon his request. In the event the property is not sold or leased during the period of this agreement, then, immediately upon its expiration the agent shall furnish the OWNER with a list of all persons to whom the property was submitted. REGIONAL ENGINEERING Chicago, 111. - June 30, 1980

D. G. Walnut Building Account c/o Olivieri Bros. Inc. 800 East 120th Street Chicago, Illinois 60628

Re: Downers Grove, Illinois Service Center Parking Lot

Gentlemen:

Mr. West, our Engineering Manager, has stated that the 10,000 gallon gasoline tank can be installed without the concrete holddown pad as most of the major oil companies do it this way. The tank must be on 12" of pea gravel, and be covered with it up to the surface. The top of the tank shall be three feet below finished grade, or per code, whichever is greater.

Very truly yours,

C. R. Olson Project Supervisor

Dear Mr. Cunningham:

Re: Trust No. 78-309

Some time ago, Mr. Starmann spoke with you requesting that you forward to the Trust Department a letter of direction authorizing the Trustee to sign an Assignment of Rents. We have not yet received that letter in a form which specifically authorizes the execution of the Assignment.

I have enclosed for your use a sample form of the letter which would enable the trustee to proceed with the execution of the document. Please return the letter of direction signed by the proper beneficiaries of the trust if the letter is acceptable to you.

Do not hesitate to call if you have any questions.

Very truly yours,

faye/D. Adfiman

Trust Assistant

Re: Montgomery Ward Lease

Dear Ed:

Enclosed please find original and four copies of proposed Exhibit A to be attached to the lease with Montgomery Ward Corporation.

I have taken the legal description from the photocopy of the 1977 Du Page County Real Estate Tax Bill which you furnished to me on January 28, 1980. I note that that description covers a parcel with approximate dimensions of 320 by 200 feet and is located on Wisconsin Avenue.

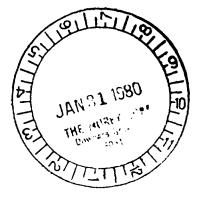

The original and one copy of the Exhibit should be attached to the two copies of the Lease and initialed (along with Exhibit B) by Downers Grove National Bank.

Very truly yours,

BAUER & HOTTE, P. C.

James G. Bauer

- (b) The Tenant, upon receipt of satisfactory evidence of the amount of such excess, shall reimburse the Landlord the amount by which the general real estate taxes levied and assessed against the leased premises for each subsequent tax fiscal year during the term of this lease exceed the general real estate taxes levied and assessed against the leased premises for the third tax fiscal year following Tenant's occupancy; provided, however, that the Tenant shall be obligated to pay only its promate share of such excess taxes for the tax fiscal year during which its obligation to pay rent under this lease ceases, said promata share to be based upon the number of days of the then current tax fiscal year for which the Tenant has been obligated to pay rent under this lease.
- (c) Prior to the payment thereof, the Landlord shall submit to the Tenant copies of all general real estate tax bills, a portion of which the Tenant may be obligated to pay to the Landlord under this Section 18, together with a statement showing the computation of the amount owed by the Tenant to the Landlord hereunder, supported by such evidence as the Tenant may reasonably require, whereupon the Tenant (unless it shall contest such taxes as hereinafter provided) shall pay to the Landlord within thirty (30) days after receipt of such bills, statement and other evidence, that portion of such general real estate taxes required to be paid by the Tenant hereunder.
- (d) In the event the Tenant shall desire to contest the validity or amount of any tax, a portion of which it may be required to pay to the Landlord hereunder, the Tenant, within thirty (30) days after being notified of the amount thereof, shall notify the Landlord of its intention to do so, whereupon the Landlord shall defer payment of any such tax so long as the validity or amount thereof shall be contested by the Tenant in good faith and by proper proceedings, except that the Landlord may make such payments under protest or take such other steps with regard to said tax as will not prejudice the Tenant's opportunity to successfully contest the validity or amount thereof. The Landlord agrees to render to the Tenant all assistance reasonably possible, without expense to the Landlord, in contesting the validity or amount of any such tax, including joining in and signing any protest or pleading which the Tenant may deem it advisable to file. Should any rebate be made on account of any tax a portion of which has been paid by the Tenant to the Landlord hereunder shall belong to and be paid to the Tenant.
- 17. Tenant shall maintain the parking lot areas, fence, and paved areas in good condition and repair, and shall also, as necessary, maintain, repair, and replace the gas pump and lighting facilities on the demised premises.
- 18. Tenant shall carry General Liability insurance, or at its option be self-insured, with limits of not less than Two Hundred and Fifty Thousand Dollars (\$250,000.00).

- * approval of plans by Tenant as hereinafter specified.
 19. Within Thirty (30) days after MANNEXE CONDING STATES, Landlord shall commence, and thereafter diligently prosecute to completion, the following Landlord's work, as also more fully described an Exhibit "B", which is attached hereto and made a part hereof:
 - (a) Grade, compact, and gravel the parking areas so as to be suitable for Tenant's intended use.
 - (b) Install a six (6) foot chainlink fence (with barbed wire and sliding gate) around the perimeter of the demised area.
 - (c) Excavate for, position, and install a certain Eight Thousand (8000) gallon gasoline tank, and pump, located as shown on Exhibit "B", tank and pump to be supplied by Tenant promptly after last execution of this Lease.
 - (d) Provide electric service to the gas pump.
 - (e) Install and erect a lighting pylon, and attach lighting fixtures thereto, as shown on Exhibit "B'.
 - (f) Lay concrete paving in and about the area of the gasoline pump as required.
 - (g) Pave a hard surface, all weather, access drive from the pump area to the adjoining parcel also leased by Tenant.

All work required to be performed by the Landlord hereunder shall be performed in a good and workmanlike manner. The Premises shall be left at the completion of such work in a safe, clean and tenantable condition and in good order and repair. Landlord shall perform all work provided for hereunder in conformity with all applicable construction and building codes and with every applicable requirement of law or duly constituted authority of law, or any Board of Underwriters, Rating Bureau or similar organization having jurisdiction, of carriers of insurance on the leased Premises. See Paragraph 19, continued on Page 4a.

- 20. Tenant shall take possession of the Leased premises within a reasonable time, not to exceed Thirty (30) days, after Landlord notifies Tenant that all Landlord's work pursuant to Paragraph #19 has been completed and that Tenant may have exclusive possession of the Premises. In the event the Landlord has not completed all work on or before June 1, 1980 , Tenant may cancel this Lease by sending written notice to Landlord, whereupon this Lease shall be terminated and of no further force and event.
- 21.1 Within thirty (30) days from the date of last execution of this Lease, Landlord shall remember, provide and deliver to Tenant (at the office of Tenant) a leasehold title insurance policy of a title company acceptable to Tenant in the amount of ONE HUNDRED THOUSAND and No/100 (\$100,000.00) DOLLARS covering the date hereof, or if Tenant so elects, its preliminary report on title or title binder in said amount of \$100,000.00 showing title in Landlord, subject only to matters to which this Lease is subject. All such title costs and premiums to be paid by liesal back.

If the report on title, title binder, or leasehold title insurance policy, so required, discloses any defects in title (other than such usual objections contained in Leasehold policies and matters to which this Lease is subject) Landlord shall, upon tendering the same to Tenant within thirty (30) days from the date of last execution of this Lease, have sixty (60) days, from the date which such title report, binder, or leasehold title insurance policy bears, to cure such defects and to furnish such title report, binder, or leasehold policy showing such defects urec or removed. If such defects in title are not so cured within sixty (60) days, enamay, at its option, terminate this Lease. In the event this Lease is so terminate all members, decounts and instruments shall be returned to the respective.

22. Landlord and Tenant acknowledge that Tenant is negotiating a Lease of substiantially like terms and conditions for Premises adjoining the Landlord's Premises, and that Tenant's use of the demised premises is not feasible without the use of said adjoining Premises. Notwithstanding anything in this Lease to the contrary, Tenant's rental obligation hereunder shall not commence until Tenant has taken possession of the adjoining Premises. When the commencement date of both leases has become fixed, Landlord and Tenant agree to execute a Lease Supplement fixing the commencement date and the termination date of the Lease.

If, due to fire, the elements, or the exercise of the right of eminent domain or other authority of law, or any other cause, the premises shall become untenantable, dangerous or unfit for the Tenant's use, rent payable under this lease shall abate during the continuance of that condition. If the conditions which give rise to an abatement of rent under this section continue for a period of ninety (90) days, then the Tenant may, at any time within sixty (60) days after such ninety (90) day period, cancel this lease and terminate its tenancy by giving the Landlord written notice of its intention to do so.

All notices, approvals, or requests in connection with this lease shall be sent by registered mail or telegram. Notices to the Landlord may be addressed to the Landlord at the address set forth in Section 3 above. Notices to the Tenant shall be addressed to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois, attention: Regional law Department.

Employees or agents of the Tenant have no authority to make or agree to make a lease. This instrument shall not be binding upon the Tenant until it has been executed on behalf of the Tenant by one of its corporate officers. No act or omission of any employee of the Tenant shall alter, change, or modify any of the provisions of this lease. Any alterations, changes, and modifications of this lease shall be effective only when made in writing and executed on behalf of the Tenant by one of its corporate officers.

All the grantors of the term shall be bound jointly and severally by this lease. This lease shall inure to the benefit of and be binding upon, the respective heirs, legal representatives, successors and assigns of the Landlord and the Tenant.

IN WITNESS WHEREOF, this lease has been duly executed under seal as of the first hereinabove written.

The reable recording burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporting, and 16 minutes for transporting for transporting and disposal facilities. The burden associated with reading the regulations is estimated at 1 minutes for the collection of information is estimated to average 6 minutes for generates for present and 6 minutes for present actions and disposal facilities. The burden associated with reading the regulations is estimated at 1 minutes of 5 minutes annually. Burden means the lotal time, effort or financial resources expended by persons to generate, maintain, return, or disclose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently vaid OMB control number. The OMB numbers for EPA's regulations are fisted in 40 CFR Part 2 and 45 CFI Chapter 15. Send comments regarding these bursts or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection techniques to the Director, OPPE Requisitory Information Division, U.S. Environmenta Protection Agency (2.37), 401 M.St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Menagement and Budget Agencies. Desk Officer for EPA, 725 17th Street. N.W., Washington, D.C., 20513. Include the OMB control number in any correspondence.

HOW MUST THE WASTE BE MANAGED?

For S, circle the appropriate response for the 3 italicized options:

THIS CONTAMINATED SOIL DOES / DOES NOT CONTAIN LISTED HAZARDOUS WASTE AND DOES / DOES NOT EXHIBIT A

(CIRCLE ONE)

CHARACTERISTIC OF HAZARDOUS WASTE AND IS SUBJECT TO / COMPLIES WITH THE SOIL TREATMENT STANDARDS

(CIRCLE ONE)

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and

examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the approximation of the prohibited wastes.

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CPR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS, I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT
 TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN
 WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have
 personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification
 and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater
 organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part
 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have
 been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I
 am aware that there are significant penaltics for submitting a false certification, including the possibility of fine and imprisonment.
- I THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penaltics for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of line and imprisonment.

ALL SPILLS MUST BE REPORTED TO THE MICHIGAN POLLUTION EMERGENCY ALERTING SYSTEM, IN MICHIGAN AT 1-400-272-4706 OR OUT OF STATE AT 517-373-7860 AND THE NATIONAL RESPONSE CENTER AT 1-400-424-8662 24 HOURS PER DAY.

S. THIS CONTAMINATED SOIL DOES / DOES NOT CONTAIN LISTED HAZARDOUS WASTE AND DOES / DOES NOT EXHIBIT A (CIRCLE ONE) (CIRCLE ONE)

CHARACTERISTIC OF HAZARDOUS WASTE AND IS SUBJECT TO / COMPLIES WITH THE SOIL TREATMENT STANDARDS

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- ITHIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT

 TO'268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D. OF THIS PART IS BASED IN PART OR IN

 WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have

 personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification
 and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater

 organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part

 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have
 been unable to detect that nonwastewater; organic constituents despite having used best good faith efforts to analyze for such constituents. I
 am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- IL THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 60 CER 268.40 to remove the hazardous characteristics. I am aware that there are significant penaltics for submitting a false certification including the possibility of line and imprisonment.
- THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOYE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penaltics for submitting a false certification, includin; the possibility of fine and imprisonment.

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS, I codify under penalty of law that I hav personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- IL THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- 1. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOYE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS PESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.20 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of line and imprisonment.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. Potentially Infectious Medical Waste (PIMW) requires a PIMW manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of Copy I should be used.

INSTRUCTIONS TO GENERATORS (Please type)

- Enter generator's USEPA twelve digit identification.number* and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.
- Enter total number of pages comprising this Manifest.
- Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
- Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- B. Enter the generator's Phinois EFA ten digit identification
- 5, 6. For the first transporter who will transport the waste, enter the
- C. D. company name. USEPA ID number*, Illinois EPA four digit Special Waste Hadling (55) 4) Permit number or the Uniform Program LD number issued by the participating state, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- 7. 8. If applicable enter the information requested for the second
- E, F. transporter who will transport the waste
- 9, 10, For the facility designated to receive the waste, enter company
- G. H. name, address, USEPA ID Number*. Illinois EPA ten digit identification number, and telephone number where an authorized agent of the receiving facility may be reached.
- Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT".

* REQUIRED ONLY FOR HAZARDOUS WASTE

Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM = Metal boxes or roll offs DM = Metal drums

CW = Wooden boxes

DW = Wooden drums

CF = Fiberboard or plastic bags DF = Fiberboard or plastic drums

BA = Burlap, cloth, paper or plastic bags.

CY = Cylinders

TT = Tank Trucks

DT = Dump tracks

TP = Tanks portable

TC = Tank cars

- 13. Enter the total quantity of each waste.
- Enter unit of measure from list below:

Con Callons

P = Pounds

T = Tons

Y = Cubic Yards

f . There

K = Kilograms

N = Cubic meters

M. Metric four

Enter the FPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - additional numbers should be listed in Section J.

- J. K. If needed, enter additional description or information/ instructions for the material listed in Item 11.
- If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments generators must enter the point of departure (City and State) for shipments destined for treatment, storage, or disposal outside the jurisdiction of the United States in this space.
- The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be fined out and the appropriate mode trail, water, or any inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6. MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT IF WASTE IS RCRA HAZARDOUS OR PCB WASTE.

INSTRUCTIONS TO TRANSPORTER: 17, 18. The person accepting the waste on behalf of the transporter must acknowledge. acceptance of the waste described on the Manifest by signing and entering the date of receipt. Upon delivery of waste to facility, retain Copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

- The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt. RETAIN COPY 3, SEND COPY 1 TO THE GENERATOR, AND SEND COPY 2 TO ILLINOIS EPA WITHIN 30 DAYS OF THE DELIVERY IF WASTE IS RCRA HAZARDOUS OR PCB WASTE.

Public reporting burden for this collection of information is estimated to average 37 minutes for generators, 15 minutes for transporters. and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate. including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M. Street SW., Washington, D.C. 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

INTERNATIONAL SHIPMENTS

Exports-Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure. From the United States.*

Importe: Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA The rindary sous Waste Manifest. Any person functioning as the U.S. importer, as defined in Part 111, Tull 15, solate the manifest as required in Page 9310.*

For prime, if here this wash all others must do yet a upry of the modeling to $1.9\,$ Colstons when courts on country the waste across $0.5\,$ borders. Note the foreign waste manifest document unswinding.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates munitiest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MOEQ no later than the tenth day of the month following the snipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state maintest is used imail to the MOEQ a photocopy of the menifest when the shipment is placed into transpuration and mail a phytocopy of the second generator marstest copy, when received

TRANSPORTER: Upon delivery to the designated (or atternate) facility, and that facility signs and dates the manifest, the canary bended copy will be returned to you. If more than one transporter is used, the manifast is to be popped and supplied to the provious transporter acknowledging the receipt of the shiptier toy meneral nar sporter. The canary banded copy stays with the manifest until the ship nont reaches the besignated facility

DESIGNATED FACILITY: Upon signing and dating the manifest as received give the canary banded so, yird the trait sporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDEQ no later than the 10th day of the month following receipt of snipment.

ADDRESS ALL MOED MANIFEST COPIES TO:

WASTE MANAGEMENT DIVISION MICHGAN DEPARTMENT OF ENVIRONMENTAL QUALITY PO BOX 30038 LANSING MI 48906-7538

The public reprocess burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters, and 16 minutes for treatment, storage and disposal facilities. The record keeping burden per-securities for this collection of information is estimated to average 6 minutes for generators, 6 minutes for minutes for treatment, storage and disposal traceles. The burden associated with reading the regulations is estimated at 1 hour and 15 minutes envirally. Burden means the total time, effort, or financial resources expanded by persons to generate, methods, retein, or disclose or provide information to or for a Federal agency.

An agency may not construct or appoint or and a person is not required to respond to, a collection of information unless it displays a currently valid CMB control number. The CMB numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection sectioniques to the Director, CPPE Regulatory Information Division, U.S. Environmental Protection Agency (2.37), 401 M St., S.W., Washington, D.C., 20460 and to the Office of Information and Regulatory Affairs, Office of Menagement and Budget, Abendoor, Dec. 2050. Include the OMB control number in any correspondence.

THIS CONTAMINATED SOIL DOES/DOES NOT CONTAIN LISTED HAZARDOUS WASTE AND DOES/DOES NOT EXHIBIT A S. (CIRCLE ONE) (CIRCLE ONE) CHARACTERISTIC OF HAZARDOUS WASTE AND IS SUBJECT TO / COMPLIES WITH THE SOIL TREATMENT STANDARDS (CIRCLE ONE)

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imprisonment.

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to a applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 26 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine an imprisonment.
- D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY. HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- 1. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- 1. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penaltics for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOYE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

THIS CONTAMINATED SOIL DOES / DOES NOT CONTAIN LISTED HAZARDOUS WASTE AND DOES / DOES NOT EXHIBIT A (CIRCLE ONE)

CHARACTERISTIC OF HAZARDOUS WASTE AND IS SUBJECT TO / COMPLIES WITH THE SOIL TREATMENT STANDARDS (CIRCLE ONE)

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohimage. I am aware the operation of the prohimage of the proh

HOW MUST THE WASTE BE MANAGED?

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- 1. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOYE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT

 TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- I. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOYE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide—LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

INSTRUCTIONS

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY INVENTORY IDENTIFICATION NUMBER APPLICATION

An Illinois inventory ID number is required under 35 Ill Adm, Section 855.104. Information provided on this application form will be entered into the Bureau of Land's inventory computer system. Illinois Inventory ID numbers are assigned to a specific location address and not to the facility. A separate application is required for each location. Once an inventory number is assigned to a location, it will remain in the inventory system indefinitely. Please notify the Bureau of Land's Planning and Reporting Section if there is a name change for the location address.

The original and colored copies must be returned to the IEPA. Applications which are incomplete or are completed inaccurately will be rejected. To avoid delays or a rejected application, please read the following instructions carefully.

The gray shaded area at the top of the page is for Agency use. The number that is assigned to your location will appear in this space when your application is processed.

IEMA INCIDENT # (if applicable): Provide the Illinois Emergency Management Agency (IEMA) Incident number for this location.

COMPANY NAME: Provide the company's official name.

NAICS CODE(s): Provide the North America Industrial Classification System (NAICS) Code that best describes the principal product or services rendered at this location. See the attached list for codes.

GENERATOR STATUS (check all that apply):

- -Hazardous Large Quantity Generator (LQG): Greater than 1000kg/mo (2,200 lbs).
- -Hazardous Small Quantity Generator (SQG) or Hazardous Conditionally Exempt Small Quantity Generator (CESQG): Less than 1000kg/mo (2,200 lbs).
- -Nonhazardous Generator: Generator of nonhazardous special waste.

LOCATION ADDRESS: LOCATION: Provide the street address, a P.O. Box is not acceptable. CITY:, STATE:, ZIP CODE: Provide all information. TELEPHONE: Provide company telephone number including the area code. CONTACT: Provide a contact person for your company.

MAILING ADDRESS (if applicable): Provide this information only if it is different than the location address, if not, leave blank.

MANIFESTS: Indicate quantity and type.

RETURN ADDRESS: Type the address for UPS delivery of the package (processed application with number issued, manifests or manifest order form).

AUTHORIZATION STATEMENT: After completion of form, read the certification statement, sign and date.

RETURN COMPLETED FORM TO: Illinois Environmental Protection Agency
Bureau of Land (#24)

Planning and Reporting Section 1021 North Grand Avenue East P.O. Box 19276

INTERNATIONAL SHIPMENTS

Exports-Transponers must sign and enter the date the waste leaves the United States in Item 15. The nary exporter must identify the point of departure. from the United States.

Importe- Shipments of hazardous and Part 121 regulated waster must be accompanied by a U.S. EPA Uniform riazardous Waste Manifest, Any person functioning as the U.S. Importer, as defined in Part 111, must complete the manifest as required in 9299.9310 *

Transporters of hazardons waste shipments must deliver a copy of the manifest to U.S. Customs when it contagles exporting the waste across U.S. borders. Record the foreign waste manifest document ruinberin item 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon plecing the waste into transportation (first transporter eigns and detec manifest) ismove the white and gold tranded copies and give the remainder of the manifest copies to the transporter. Send the white copy to MDEQ no leter than the tenth day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out-of-state marriest is used, mail to the MDEQ a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received:

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the danary banded copy will be returned to you. If more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by it enact transporter. The canary banded copy stays with the manifest until the pripment reaches the designated facility

DESIGNATED FACILITY: Upon signing and duting the merifest as received, give the canary banded , the transcenter. Return the blue banded dayly to the generator. Mail the pink banded copy to the MDEO no later than the 10th day of the month following receipt of shipment.

ADDRESS ALL MOED MANIFEST COPIES TO:

WASTE MANAGEMENT DIVISION MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY PO BOX 30036 LANSING MI 46909-7538

THIS CONTAMINATED SOIL DOES / DOES NOT CONTAIN LISTED HAZARDOUS WASTE AND DOES / DOES NOT EXHIBIT A S. (CIRCLE ONE) (CIRCLE ONE) CHARACTERISTIC OF HAZARDOUS WASTE AND IS SUBJECT TO / COMPLIES WITH THE SOIL TREATMENT STANDARDS (CIRCLE ONE)

HOW MUST THE WASTE BE MANAGED?

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law-that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imprisonment.

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Sec 3004(d) prior to land disposal.
- IL THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS, I certify under penalty of law that 1 h personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certificat and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 2 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of a prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine a imprisonment.
- D. THIS RESTRICTED WASTE. FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY. IV BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance wi the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personall examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification the the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFI 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IY TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- II. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- 1. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL, (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS, I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE. FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOYE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED : FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL, (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imprisonment.

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, 11AS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. 1 certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- 1. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penaltics for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOYE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

Generator Approval Notification

July 29, 1999

Customer: ENVIRONMENTAL WASTE SRVCS.

Fax: (630) 365-3112

FRED PFEIFFER MOREY CORP. 2659 WISCONSIN AVE. DOWNERS GROVE, IL 60515

This Generator Approval Notification acknowledges the acceptability of waste material(s) into the EQ environmental protection facility identified below and ensures that this facility has the appropriate permit(s) issued by federal and state regulatory agencies to properly transport, treat, and/or dispose of the waste material(s).

EQ FACILITY: Michigan Disposal Waste Treatment Plant (MID000724831) 49350 North I-94 Service Drive, Belleville, Michigan 48111

Approval Number: 072999MK

Generator EPA ID #: ILD025415266 Approved Container: DRUM Expires On: 7/28/2000

Waste Common Name: SIGMA S-460 CONTAMINATED SOIL

Waste Code: Primary-000M Secondary-Comments: NO FREE LIQUIDS ALLOWED

The Approval(s) listed above are based upon information supplied to EQ by your company. The generator is ultimately responsible for the accuracy and completeness of the characterization information provided and other information that was provided during the technical approval process. The generator must notify the EQ Customer Satisfaction Department immediately upon knowledge of any changes to this information.

The Approval(s) will expire on the date(s) noted. Any new Approvals obtained from EQ on future business will be valid for a period of one (1) year from the date of issuance. Within 60 days of the Approval Expiration Date, you will be notified of the requirements for recertification. Please contact our Scheduling Department at 1-800-TRKTRAC (875-8722) to coordinate delivery of your waste stream(s).

If you have any questions, please call us toll free at 1-800-KWALITY (592-5489)

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- 1. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- L. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOYE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste shipment.
- In Column 2, choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49(c) (soil) or 268.45 (debris).
- In Column 4, circle the letter of the appropriate paragraph from Pages 1-2 of this form.
- In Column 5, for F001-F005, F039, D001-D043, Debris & Contaminated Soil wastes, enter the Reference Number(s) from the EQ Resource Guide-LDR/UHC Constituent Table for any constituents subject to treatment in your waste stream.

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, includin; the possibility of fine and imprisonment.

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 26th Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE, FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY, HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- IL THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- K. THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 268.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- L. THIS DECHARACTERIZED WASTE: CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOVE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.

General Instructions

Read all natives and hetere completing this form. This form has been discipled use on a 10-2 for (a to) appealization riputer annian action point per may also be used it pressions in the Consule and ones ale eg.big.

Fallergi, al distoto regulations require generalitis and transporter out hozpirous would and CATERS. ocerators of caractoria waste treatment, storage, and disposal fabilities to use this form (8700-22) and, if necessary, the continuation sheet (Form 8700-22A) for both inter- and intrastate transportation of hazardcus waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State ingulations also require the use of this manifest for all regulated shipments of liquid industrial waste as recoverd in Part 121 of Act 451 of 1994, as amended (Part 121)

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121)

Additional information such as "Rejected Load Procedures", state assigned, distribution numbers, manitest forme, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ).

Waste Miniagement Division's (WMD) Internet Home Page at: http://www.deg.state.mi.ut:wmd.or.you.may.

contact the Manifest Unit directly—at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

ftem 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial manifest page, should be shown

from 3. Enter the name of the generator and the malling address to which the manifest should be mailed. if the address of the size at which the waste was placed into transportation is different from the making address record the site address in item J.

from 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number

from 5. Enter the company name of the first transporter who we transport the waste

Nem 6, Enter the transporters U.S. EPA tweive digit identification number. For Part 121 manifesters nants where a transporter does not have a U.S. EPA assigned in limber, a state assigned number is to be used.

Rem 7. If using a second transporter, enter the company harrie

Rem 8. Enter the second transporter's U.S. EPA, twelve digit identification number. The Plant 124 main ista where a transporter boes not have a U.S. EPA, assigned not ben a state assigned number is to be used

NOTE: if more than two transporters are used, the generator or third transporter shall init aim a contribution sheet. In sem L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in from A. Every transport company used between the generative and the design of Recity (except for intermediate rail or parge bansporters used retween the initial rail or bange our ersion of the designated facility) must be listed. This is not intended to require multiple signatures for the volunt drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sneets may not be used to list additional weste streams

Stem 8. Enter the company name and site address of the facility designated to receive the waste listed on this manif

from 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

from 11. Enter an X in the MM box, if the waste is a hazerdous materiel requilated by U.S. DOT (See 49 CFR 172). Enter the required U.S. DOT shipping description, including Proper Shipping Name. Hazard Class or Division, ID Number (UN/NA), and pecking group for each waste as, dentified in 49 CFR 172 Additional information may also be required in this space, including technical name and reportable quentity references. For only Part 121 regulated wastes include an appropriate enipping description for the waste

from 12. Enter the number of containers for each waste and the appropriate abbreviations I sted below for are type of container. Each container type requires separate entry

DV - Metal drums, berreis, keas

DW - Wooden drum, barrels, kegs

DF - Fiberboard or plastic drums, parrels, kegs

CT - Dumo Truck

TP = Tanks, porable

TT - Cargo tanks (tank trucks) TC . Tank care

CY = Cylindera

CM = Metal boxes, cartons, cases (including roll-offs)

CW = Wooden boxes, cartons, cases

CF = Fiber or plastic boxes, cartons cases

BA - Burtop, cioth, paper/plastic bags

ttern 13. Enter the total quantity of waste described on each line. Do not use decimals or nactions

item 14. Enter the appropriate abbroviation for the unit of ineasure listed below

G = Gailtons (liquids only)

F . Pounds

T + Tons (2000 fb.)

Y + Cubic Yards L = Lifers (squids only)

K = Kiograms

N = Cubic maters

M = Metric tone (1000 kg)

INTERNATIONAL SHIPMENTS

Exports: Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure. from the United States.*

Imports. Shipments of hazardous and Part 121 regulated wastes must be annompanied by a U.S. EPA. Uniform Hazardous Waste Manifest. Any person functioning as the U.S. Importer, as defined in Part 111. must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest ducument number in item 15

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the marifest copies to the transporter. Send the white copy to MDEO no later than the tentil day of the month following the shipment. For shipments of westers being transported to a designated facility outside of Michigan when an out-of-state manifest is used, mail to the MDEG a photocopy of the manifest when the shipment is praced into transportation and mail a photocopy of the second generator manifest copy, when received

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the maintest, the canary banded copy will be returned to you. If more than one transporter is used, the maintest is to be copied and supplied to the previous transporter admowledging the receipt of the shippent by the next transporter. The canary banded copy stays with the manifest until the simpment reaches. the designated facility

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canery banded cony to the transporter. Perun melthic can had copy to the generator. Mailtine pink barrown copy to the MDLO no later than the 10th day of the highlightening receipt of shipment.

ADDRESS ALL MDEQ MANIFEST COPIES TO:

General Instruction:

Read at instructions before completing this form. This form has been designed for use on a 12-p tith (#ife). Spewmencomputer printer, a furn point peningly also be used i press duwn hard. Ensure all copies are

Falleral and state regulations require generators and transporters of haza dous was claim beneral or operators of hazardous waste beatment, storage, and disposal found as to use this form (3700-22), and if nocessity, the continuation sheet (Form 8700-22A) for both inter- and intrastate transportation of hazardque waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as required in Part 121 of Act 451 of 1994, as amended (Part 121)

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers. fest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deg.state.mi.usrwind.or.you.may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MCEQ

Complete all litems on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Rem 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial manifest page, should be shown

Rem 3. Enter the name of the generator and the mailing address to writin the manifest should be mailed If the address of the site at which the waste was placed into transportation is different from the making address record the site address in Item J.

Rem 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected toda

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number

Rem 5. Enter the company mains of the first transporter who we transport the waste

Rom 6. Enter the transporter's U.S. EPA, twelve digit identification number. For Part 121 manufested shipments where a transporter opes not have a U.S. EPA assigned number, a state assigned number is to be used.

Rem 7. If us no a second transporter, enter the company name

Rem 6. Enter the second transporter's U.S. EPA, twelve digit identification number. For than 121 mass feeled chipments where a transporter dues hut have a U.S. ERA, assigned number, a state assumed

NOTE: If more than two transporters are used, the generator or third transporter shall initiate a continuation sheet. In item L of the continuation sheet, the generator/transporter must copy the State manifest document number listed in Item A. Every transport company used between the generator and the designor **facility (except for intermediate** rail **or** parge trail sporters used between the initial rail or barge carriers and **the designated facility) must be fisted. This is not intended to require multiple signatures for intrincial.** drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and proparly distributed. Continuation sheets may not be used to list additional waste streams

m 9. Enter the company name and site address of the facility designated to receive the waste listed on

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in from 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

from 11. Enter an X in the HM box, if the waste is a hazardous material regulated by U.S. DOT (See 49 CFR 122). Enter the required U.S. DOT shipping description including Proper Shipping Name. Hazard Class or Division, ID Number (UNINA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate enipping description for the waste SV96W

hem 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry

CM = Metal drume, barrels, kegs

EW - Wooden drum, barrels kees

DF = Fiberboard or plastic drums, barrers, kegs

DT - Dump Truck

TP - Tanks, portable

TT = Cargo tanks (tank trucks) TC = Tank care

CY - Cyfriders

CM = Metal boxes, cartons, cases (including rot-offs).

CW = Wooden boxes, certons, cases CF a Fiber or plastic boxes, carrons, cases

BA - Burley, cloth, peper/plastic bags

from 13. Enter the total quantity of waste described on each kine. Do not use deciralis or hautor's

from 14. Enter the appropriate abtraivation for the unit of measure listed below

G - Gastons (hquide only)

P = Pounds

T is Today (2000 to 1 Y - Cutile Yalds

E = Liters (riquids only)

K = Kilocrems

M a Metric tone (1000 kg)

N = Cubic meters

MOR 000379

General Instructions

Pead actinst actions before completing this form. This form has been designed to use on a 12 pilon (et til) typewritercompager printer: a firm point pen may also be used uplies down hard. Ensure all copies are Micubia.

Followal and state riigitations require generators and transponder of hazardous waste and owners or oxierators of this addous waste treatment, storage, and disposal fixedies to use this form (97.0-22) and, if necessary, the continuation street (Form 8700-22A) for both inter- and intrustate transportation of hazard ous waste as defined in 40 CFH and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of liquid industrial waste as required in Part 121 of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifeet forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ).

Waste Management Division's (WMD) Internet Home Page at: http://www.deg.state.m.us/wmd.or.you.may.contact the Manifeet Unit directly: at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Rem 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested ship-ments where a generator goes not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Rem 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial manifest page, should be shown

item 3. Enter the name of the generator and the mailing address to which the manifest should be malied If the address of the site at which the waste was placed into transportation is different from the maining address record the site address in from .)

Nem 4. Enter a telephone number (including area code) where are authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipping paper may be different from the generator's phone number

hem 3. Enter the company name of the first transporter who will transport the waste

Rem 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 manifested stipments where a transporter does not have a U.S. EFA assigned number: a state assigned number is to he used

Rem 7. If using a second transporter, enter the company name

Rem 8. Enter the second transporter's U.S. EPA, twelve digit identification number. For First 1995 man feeled shoments where a transporter does not have a U.S. CEA, assigned humber, a such along with number is to be used

NOTE: If more than two transporters are used, the generalist or third transporter shall initials a continualism sheet. In item L of the communition sheet, the generator/transporter must copy the State man test docu ment number listed in Item A. Every transport company used between the generator and the designed facility (except for intermediate tail of burge transporters used between the Hittal rull or barge carriers and eignated facility) must be listed his is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page(s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional weste streams.

Rem 9. Enter the company name and site address of the facility designated to receive the waste listed on

ftera 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

flem 11. Emer an X in the HM box if the waste is a hazardous material regulated by U.S. DOT. (See 49. DFR (72) Enter the required U.S. DCT shipping description, including Princer Snipping Name, Hazard Class or Division. 'D Number (UNINA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste mageta

Item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry

CM = Metal drums, berrels, kegs

DW = Wonden drum, barrels, kegs

DF = Fiberboard or plassic drums, barrels, kegs

DT - Durno Truck

TP = Tanks, portable

TT = Cargo lenks (tank trucks)

TC - Tank care CY - Cylinders

CM a Metal boxes, cartons, cases (including roll-offs)

CW - Wooden boxes, cartons, cases

CF = Fiber or plastic boxes, cartons, cases

BA = Burlap, coth, paper/plastic begs

from 13. Enter the lotal quartity of waste described on each line. Do not use decimals or fractions

item 14. Enter the appropriate abbreviation for the unit of measure listed below

G = Galions (liquids only)

F × Pounds

T = Tons (2000 lb.)

Y + Cubic Vards

L = Litters (injuids only) K = Kikigrams

M = Metric tons (1000 kg)

N = Cubic meters

MOR 000383

Henri 15. The generator may use this space to indicate special transportation, treatment, storage or disposal information, import/Export information as noted in the "International Shipment" instructions section is to be recorded here

from 16. The large due to stread games should be sign as a tables on the appropriate

Item 17. Print the name of the person accepting the waste on benail of the first transporter. That person must acknowledge acceptance of the waste pescribed on the manifest by signing and entering the date * acost

Rem 18. If apprecable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by agring and entering the date of receipt

Hom 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment

Rem 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MOEQ 'Rejected Load Procedures' provides guidance for partial or total load, rejections

Only the following information in the shaded area is a State of Michigan requirement:

Hem A. A preprinted State manifest document number

Rem B - H. May be required by other states.

from I. For hazardous wastes, enter the appropriate waste numbers found in R229 9212 h rough R299 9214 of Part 111 and 40 Of Ri261 Subparts Cland D. If more than one waste number is required to appropriately identify the waste, enter the additional numbers in Item J. In selecting the most appropriate waste number the following hierarchy must be used: acute waste (including P and acute F). U flowel, K (specific sources), rion-acute F (non-specific sources) and D (characteristic). State, regulared wastes offine the same hierarchy as federally regulated wastes. For Part 121 wastes which are not bazardous wastes enter the appropriate code listed below

Miked Solvents	007L
^{Sharmaceutica}	C14L

INTERNATIONAL SHIPMENTS

Exports-Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary suporter must identify the point of departure, from the United States.*

Imports. Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. CPA. Uniform Hazardous Waste Manifest. Any person functioning as the U.S. Importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

"Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in item 15

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the write copy to MDEQ no late, than the term day of the month following the shipment. For shipments of wastes being transported to a designated facility outside of Michigan when an out of-state marifest is used, mail to the MDEQ a photocopy of the marifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received

TRANSPORTER: Upon delivery to the designated (or alternate) facility, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the marriest is to be copied and supplied to the prewous transporter acknowledging the receipt of the thipment by the next transporter. The canary banded copy stays with the manifest until the shipment reaches the designated facility

DESIGNATED FACILITY. Upon signing and calling the maintest as received, give the car ary banded ony to the transporter. Return the blue banded copy to the generator. Mail the pink banded copy to the MDSO no later than the 10th day of the month following receipt of shipment

ADDRESS ALL MORO MANIFEST COPIES TO:

Generator Approval Notification

Customer: ENVIRONMENTAL WASTE SVCS.

Fax: (630) 365-3112

PHIL MEYER MOREY CORP 2659 WISCONSIN AVENUE DOWNERS GROVE, IL 60515

This Generator Approval Notification acknowledges the acceptability of waste material(s) into Michigan Recovery Systems, Inc. (MRSI) and ensures that this facility has the appropriate permit issued by federal and state regulatory agencies to properly transport, treat, and/or disposal of the waste material(s).

Approval Number Waste Common Name
032217D FLUX

The Approval(s) listed on the following page(s) are based upon information supplied to MRSI by your company. The generator is ultimately responsible for the accuracy and completeness of the characterization information provided and other information that was provided during the technical approval process. The generator must notify the MRSI Approvals Department immediately upon knowledge of any changes to this information.

The Approval(s) will expire on the date(s) noted on the following page(s). Any new Approvals obtained from MRSI on future business will be valid for a period of one (1) year from the date of issuance. Within 30 days of the Approval Expiration Date, you will be notified of the requirements for recertification.

General Instructions

Residual institutions before completing this form. This forcinals been also grow two we an all Apiton (2 deritypewintercomputer profest is firm paint pen may also ne used il pressiduw. Facial Ensure all popes are teobre.

Feveral and state (egulations require generalisks and transporters of hozal dous wisite and owners or operators or hazardox is waste treatment, storage, and disposal fabrices to use this form (8700-22) and, if necessary, the continuation sheet (Form 8700-22A) for both interliend introstate transportation of hazardoxis wiste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of figure industrial waste as required in Part 121, of Act 451 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers, manifest forms, etc., can be obtained by contacting the Michigan Department of Environmenta, Quality (MDEQ Waste Management Division's (MMQ) informat Home Page at http://www.deq state millushimd or you may contact the Manifest Unit directly, at (517) 373-1217. Continuation sheets are not supplied by MDEQ.

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Rem 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial marifest page, should be shown

Rem 3. Enter the name of the generator and the mailing address to which the maintest should be mailed, if the address of the site at which the waste was placed into transportation is different from the making address record the site address in term J.

Rem 4. Enter a telephone number (including area chide; where an authorized agent of the generator can be reached in the event of an emergency and/or a paintal or total rejected total.

NOTE: The 24 hour emergency phone number required for a hazardous materials shipting paner may be different from the generators phone number.

Rem 5. Enter the company name of the first transporter who will transport the waste

Name 6. Enter the transporter's U.S. EPA, twelve orgit identification number. For Part 121 manifested shipments where a transporter poes not have a U.S. EPA, assigned number, a state assigned number is to be used.

Rom 7. If using a second transporter onter the company name

Rem 8. Enter the second transporter's U.S. EPA, twelve digit identification number. For Plut, 121 mail-fested shipments where a transporter does not have a U.S. EPA, assigned not be: a state assigned number is to be used.

NOTE: If more than two transporters are used the generator or third transporter shell initiate a continuation wheel. In term L of the consinuation sheet, the generator/transporter must copy the State manifest document number fested in from A. Every transport company used between the generator and the designed facility (except for intermediate ray or barge bransporters used between the meating for one transporter. It is used to intended to require multiple signatures for interface drivers working for one transporter. Item 2 is to be changed to reflect the added page(a). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

Rem 9. Enter the company name and site address of the facility designated to receive the waste listed on this manifest.

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned facility does not have a U.S. EPA assigned facility as a state assigned manufacture.

Rem 11. Enter an X in the HM box. If the waste is a hazardous material regulated by U.S. DOT. /See 49 CFR 172). Enter the required U.S. DOT shipping description including Proper Stipping Name, Hazard Class or Devision, ID Number (UNINA), and backing group for each waste as identified in 48 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste stream.

Rem 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry

DM = Metal drums, barrels kegs

DW = Wooden drum, barrels, kegs

DF - Fiberboard or plastic drums, parre's, kegs

DT = Dump Truck

TP = Tanks, portsole

TT = Cargo tanks (tank trucks)

TC = Tank cars

CY = Cylinders

CM = Motal boxes, cartons, cases (Including rolf-offs)

CW - Wooden boxes, cartons, cases

CF = Fiber or plastic boxes, cartons, cases

BA = Burlap, cloth, paper/plastic bags

Rem 13. Enter the total quantity of waste described on each line. Do not use awarnals or fractions

item 14. Enter the appropriate abbreviation for the unit of measure listed below

G = Gaillons (figuids only)

P = Pounds

T + Tons (2000 tb)
Y = Cubic Yards

L - Liters (liquids only)

K = Kilograms

M = Metric tone (1000 kg)

N = Cubic meters

MOR 000392

Items 15. The generator may use this space thind determinant interespectation, treatment, storage or discossion of a montexport information as noted in the "montexport information as noted in the international Grayment" instructions section is to be recorded their

from 16. The generator must read, point higher home, but in distance the spanishing of the

Item 17. Printitle nonle of the person accepting the waste on owner or the transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the dute of indeept.

flem 18. If applicable inntritie name of the person accepting the waste on behalf of the second transposter. That person must acknowledge acceptance of the waste described on the mainfest by a going and entering the date of repelot.

from 19. An authorized representative of the designated (or alternate) facility must note in this space any discrepancy in the waste shipment.

item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the dute of receipt.

NOTE: MDEQ "Rejected Load Procedures" provides guidance for partial or total load, rejections

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number

item B - H. Muy be required by other states

Item 1. For hazardous wastes, enter the appropriate waste numbers found in P229 9212 through SCP9 9319 419 at 1, and 40 CFF RET Sutuants Clard Dill moze than one waste number, shequited to appropriately identify the waste, enter the applicational numbers in Item U. In selecting the most appropriate waste number the following hierarchy must be used l'acute waste (including Pland appre P). U froxic, K (scelluf tip urcos), non-apple E (non-specific siphies) and D (challanter stu). State inergulated wastes follow the same neterorny as federally regulated wastes. For Part 121 wastes which are not hazardous wastes enter the appropriate code listed below.

INTERNATIONAL SHIPMENTS

Exports: Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure. From the United States.*

Imports: Shipments of hazardous and Part 121 regulated wastes must be accompanied by a U.S. EPA. Unform Hazardous Waste Manifest. Any person functioning as the U.S. Importer, as defined in Part 111, must complete the manifest as required in R299.9310.*

*Transporters of hazardous waste shipments must deliver a copy of the manifest to U.S. Customs when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in term 15.

MANIFEST DISTRIBUTION

GENERATOR: Upon placing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Send the write copy to MDEO no later than the tenth day of the month following the simpment. For stipments of wastes being transported to a designaled facility outside of Michigan when an out-of-state manifest is used, mail to the MDEO a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when received

TRANSPORTER: Upon delivery to the designated (or alternate) feet by and that facility signs and dates the manifest, the canary banded copy will be returned to you. It more than one transporter is used, the manifest is to be copied and supplied to the previous transporter acknowledging the reduct of the shipment of the receiver of the shipment of the canary banded copy stays with the manifest until the shipment reaches the designated facility.

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Peturn the blue banded copy to the generator. Mail the pink handed copy to the MDEO no later train the 10th day of the month following receipt of shipment.

ADDRESS ALL INDEQ MANIFEST COPIES TO:

Generator Approval Notification

Customer: ENVIRONMENTAL WASTE SVCS.

Fax: (630) 365-3112

PHIL MEYER MOREY CORP 2659 WISCONSIN AVENUE DOWNERS GROVE, IL 60515

This Generator Approval Notification acknowledges the acceptability of waste material(s) into Michigan Recovery Systems, Inc. (MRSI) and ensures that this facility has the appropriate permit issued by federal and state regulatory agencies to properly transport, treat, and/or disposal of the waste material(s).

Approval Number Waste Common Name
D15198L MTS 001 TITRATION SOLUTION

The Approval(s) listed on the following page(s) are based upon information supplied to MRSI by your company. The generator is ultimately responsible for the accuracy and completeness of the characterization information provided and other information that was provided during the technical approval process. The generator must notify the MRSI Approvals Department immediately upon knowledge of any changes to this information.

The Approval(s) will expire on the date(s) noted on the following page(s). Any new Approvals obtained from MRSI on future business will be valid for a period of one (1) year from the date of issuance. Within 30 days of the Approval Expiration Date, you will be notified of the requirements for recertification.

experiencempater parter, a firm point pen maria a line used la estidición de la companya de sue de la companya del companya del companya de la companya del la companya de esbe.

proming a 1889 that the girth along who hand pool of that dispussion note in the continuous master treatment is create, and display to the property to include 20, and, if the continuous master treatment is created, and for both interior and the continuous about 16,000 per display and in the continuous and shall be specified in the continuous and mis wisste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations elso require the use of this manifest for all regulated shipments of figure industrial waste as 1931 - 80 121 of Act 151 of 1994, as amended (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR: 43CFR: Cott 171, Part 127).

Additional information such as "Rejected Load Procedures", state assigned that faction can bers many test forms, etc., can be obtained by contacting the Michigan Department of Eos room email: Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deg.stste.mi.us/wmd.or.you.may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MCEQ

Complete all items on the mentiost. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Rem 1. Enter the generator's U.S. EPAtweive digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Rem 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case trie total number of pages, counting the milial manifest page, should be shown

Rem 3. Enter the name of the generator and the mailing address to which the manifest knowled by mailed If the address of the site at which the waste was placed into transportation is different from the making address record the site address in Item J

Rom 4. Enter a telephone number (including prea code) where an authorized agent of nia gene attornan be reached in the event of an emerge roy and or a partial or tutal relected toda

NOTE: The 24 hour emergency phone rumber reput ed for a huzaroous materials stricting phone may be different from the generator's prione number

Rem 5. Enter the company name of the first transporter who will paraport the waste-

flom 6. Enter the transporter's U.S. EPA (welve digit identification number. For Part 121 man feeted shipments where a transporter does not have also bit FA assigned to indien watate assigned in indient watate.

Rem 7. If using a second transporter enter the roma arvinance

Rem 8. Enter the second Sunsporter on ID FITS two years on the second supporter of the second supporter of ID FITS two years as U.S. CIA class, continuous control of the second supporter of the seco number is to be used

NOTE: If more than two transporters are used it is generator or third transporter sharinful are allowed by allowing the formal are used to be generator or third transporters are used to be generator or third transporters. wheel. In rem L of the continuation sheet, the generator/transporter must copy the State maintest document number lested in Item A. Every paraport company used between the generator and the besiden facility (except for intermediate raise of transpirates sporters used between the riving bases, and the side of the designated facility) must be fisted. If it is some intended to require multiple sign bullets in the control of drivers working for one transporter. Here 2 is to be analiged to reflect the update page (s). Continue sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to fist additional waste streams.

from 9. Enter the company name and site address of the facility designated to receive the waste listed on

Nam 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested ehipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Rem 11. Enter an X in the HM pox. If the waste is a nozarrious material regulated by J.D. D.F. (See 49) OTH 1722. Enter the liabured OIS 1901 singlighing destriction including Proper Shipping frame missand Crass or Dividion 10 humber (lith hA), and cacking group for euron waste as identified in 49 OFR 172. Androne: imministror may also be required in this space, including feoticical name and reportable quantity. references. For only Part 121 regulated wastes include an accrophiste shipping description for the waste.

Rem 12. Enter the number of contamers for each waste and the appropriate abbreviations tisted below for the type of container. Each container type requires separate entry.

DM = Metal drume barrels kees

Wooden arunt, barrels, seds

DF . Fiberboard or plastic froms parrels kegs

HOW MUST THE WASTE BE MANAGED?

For S, circle the appropriate response for the 3 italicized options:

MOR 000398

THIS CONTAMINATED SOIL DOES / DOES NOT CONTAIN LISTED HAZARDOUS WASTE AND DOES / DOES NOT EXHIBIT A (CIRCLE ONE) (CIRCLE ONE) CHARACTERISTIC OF HAZARDOUS WASTE AND IS SUBJECT TO / COMPLIES WITH THE SOIL TREATMENT STANDARDS (CIRCLE ONE)

AS PROVIDED BY 268.49(c) OR THE UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and believe that it has been maintained and operated properly so as to comply with treatment standards specified in 40 CFR 268.49 without impermissible dilution of the prohibited wastes. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment

- A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal.
- B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45.
- C. THIS RESTRICTED WASTE HAS BEEN TREATED TO THE PERFORMANCE STANDARDS. I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and base this certification upon my inquiry of those individuals immediately responsible for obtaining this information. I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR part 268 Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without impermissible dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- D. THIS RESTRICTED WASTE. FOR WHICH THE TREATMENT STANDARD IS EXPRESSED AS A SPECIFIED TECHNOLOGY. HAS BEEN TREATED BY THE SPECIFIED TECHNOLOGY. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.42. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- E. THIS RESTRICTED WASTE CAN BE LAND DISPOSED WITHOUT TREATMENT. I certify under penalty of law that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification that the waste complies with the treatment standards specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment.
- F. THIS RESTRICTED DEBRIS HAS BEEN TREATED IN ACCORDANCE WITH 40 CFR 268.45. I certify under penalty of law that the debris has been treated in accordance with the requirements of 40 CFR 268.45. I am aware that there are significant penalties for making false certification, including the possibility of a fine and imprisonment.
- G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.
- H. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOVE THE HAZARDOUS CHARACTERISTIC. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic. This decharacterized waste contains underlying hazardous constituents that require further treatment to meet universal treatment standards. I am aware that there are significant penalties for submitting a false certification, including the possibility of fine and imprisonment.
- I. THIS RESTRICTED WASTE HAS BEEN TREATED TO REMOYE THE HAZARDOUS CHARACTERISTIC AND BEEN TREATED FOR UNDERLYING HAZARDOUS CONSTITUENTS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristic, and that underlying hazardous constituents, as defined in 268.48 Universal Treatment Standards. I am aware that there are significant penalties for submitting false certification, including the possibility of fine and imprisonment.
- J. THIS RESTRICTED WASTE IS SUBJECT TO AN EXEMPTION FROM LAND DISPOSAL. (Please include the date the waste is subject to the prohibitions in Column 5) This waste is subject to an exemption from a prohibition on the type of land disposal method utilized for the waste (such as, but not limited to, a case-by-case extension under 40 CFR Part 268.5, an exemption under 40 CFR 268.6, or a nationwide capacity variance under 40 CFR 269 Subpart C)
- THIS RESTRICTED WASTE WITH TREATMENT STANDARDS EXPRESSED AS CONCENTRATIONS IN THE WASTE PURSUANT TO 263.43. IF COMPLIANCE WITH THE TREATMENT STANDARDS IN SUBPART D OF THIS PART IS BASED IN PART OR IN WHOLE ON THE ANALYTICAL DETECTION LIMIT ALTERNATIVE IN 268.439(c). I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based on my inquiry of those individuals immediately responsible for obtaining information, I believe that the nonwastewater organic constituents have been treated by incineration in units operated in accordance with 40 CFR part 264, Subpart O, or 40 CFR part 265, Subpart O, or by combustion in fuel substitution units operating in accordance with the applicable technical requirements, and I have been unable to detect that nonwastewater organic constituents despite having used best good faith efforts to analyze for such constituents. I am aware that there are significant penaltics for submitting a false certification, including the possibility of fine and imprisonment.
- I. THIS DECHARACTERIZED WASTE CONTAINS UNDERLYING HAZARDOUS CONSTITUENTS THAT REQUIRE FURTHER TREATMENT TO MEET UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the waste has been treated in accordance with the requirements of 40 CFR 268.40 to remove the hazardous characteristics. I am aware that there are significant penaltics for submitting a false certification, including the possibility of fine and imprisonment.
- M. THIS WASTE HAS BEEN TREATED IN ACCORDANCE WITH THE REQUIREMENTS OF 40 CFR 268.40 TO REMOYE THE HAZARDOUS CHARACTERISTIC AND THE UNDERLYING HAZARDOUS CONSTITUENTS. AS DEFINED IN 268.2(1) HAVE BEEN TREATED ON-SITE TO MEET THE 268.48 UNIVERSAL TREATMENT STANDARDS. I certify under penalty of law that the above is true. I am aware that there are significant penalties for submitting a false certification, including the possibility of line and imprisonment.

<u>General instruction</u>

Read as instruments before temperating this form. This followings precingles in provinces on a 10 orbit of the typewriterroomputer printer; a firm point pen may also by lised it to such a 1. Environ hopes also Service.

Plendrial and state regulations require geno more and clarispic will oil hexamples will be will be isperators of hazardous waste treatment, storage, and disposal facilities to use this form (6700-22) and, if necroseary, the continuation sheet (Form 8700-22A) for both inter-land intrastate transportation of hazard. our waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations usu require the use of this manifest for all regulated shuments of high duratustrial waste as 1949. 121 MA:t 451 [11954] as amendal. Flan 1211

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Fort 11), Fart 121)

Additional information such as "Rejected Load Procedures", state assigned, declar nation dumbers, in fest forms, etc., can be obtained by contacting the Michigan Department of Environments. Quality (MDEQ), Waste Management Division's (WMD) Internet Home Page at: http://www.deg.state.mii.us/wmd.or.you.may contact the Manifest Unit directly at (\$17) 373-1217. Continuation sheets are not supplied by MDEG

Complete all hems on the manifest. Enter "N/A" if any item does not apply. I eave items that may be needed later blank, such as second transporter.

Rem 1. Enter the generator's U.S. EPA livelye digit identification number. For Part 121 manifested ship ments where a generator does not have a U.S. EPA assigned number; a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e g. 00001)

Item 2. Page number 1 of 1 should be recorded unless a continuation sheet is used in which case trie total number of pages, counting the initial manylest page, should be show-

Rem 3. Enter the name of the generator and the melting address to which the manifest strougd be mailed If the address of the site at which the waste was placed into transportation is different from the making address record the site address in Item J

Nom 4. Enter a telephone number (no uping area code, where an authorized ag. if if it is generator osa be reached in the event of an emergency and or a pair wild rotative elithed toldo

NOTE: The 24 hour emergency phone number tenuned for a nazarbous materials, there is paper may be different from the generator's phone number

Rem 5. Enter the company haline of the first transporter who will banaport the waste

Item 6. Error the transporter's U.S. EPA, twelve digit identification number. For Part 101 man hated shipments where a transporter does not have a true? S.F.F.A and preneror time aspectations of the control of the co be used

Rem 7. If using a second transporter lenger the company rish e

Rem 8. Enter the second transporter sitts 6.9.6.69A inveice does then thought indenney in the last it in fested shipments where a transporter bit is not travely a bit of 1.6A. Assign of non-arrival course. number is to be used

NOTE: If more than two transponent are used the ger states on the disensponer shot make a continuation wheet in nem L of the continuation sheet the generator/transporter must copy the State manufact draw ment number lested in Item A. Every transport of party uses centively in a generator and replace years. The facility (except for information to all on the plan sporting strength in gige mature). The sporting facility (except for information to all on plan plan sporting speak need need to all on the sporting speak need to expect the sporting sporting speak need to expect the designated facility) must be fisted. This is not introduce to exquire matures synthetis for a sporting speak need to expect the sporting speak need to expect the sporting speak need to expect the sporting speak need to expect the speak need to expe drivers working for one transporter. Item 2 is to be analoged to reliect the addard page:3). Continuation be appropriately completed in their entirety and properly distributed, Continuation sheets may not be used to list additional waste struzme.

from 9. Enter the company name and site address of the facility designated to receive the waste listed on

Rem 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used

from 11. Enter an X in the HM box. If the waste is a nazardous mular a Leadlined by U.S. DOY. /Sac 49 OFR 172). Enter the required U.S. DOT shipting description, notified phase of highly Name. Hazard Cass or Clusted. 'O Nur ber (UNNA), wild croking group for each waste as centired in 44 OFR 172. Additional histormation may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste

from 12. Enlet the number of puntamers for each waste and the appropriate ubit is allorish stell below for the type of container. Each container type requires separate entry

Headle this trust one before completing this form. This form the c_{ij} is the i_{ij} is the typewiden.computer.printer; a firm point pen may also be used. gress duwlings to Drusse an obsess are regione.

Feneral and state regulations require generalizes and transporters of hazzi-book wiskle and owners or garenous of hazardors, washe treatment, sturage, and disposal fan it systemuse this furn. 3000-20, and if recessary, the communition sheet (Form 8706-22A) for both intin-land intrustate transportation of hazardous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). Statis regulations area require the use of this manifest for all regulated shipments of Equid industrial waste as required in Part 121 of Act 451 of 1994, as arreinded (Part 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 49CFR, Part 15), Part 121).

Additional information such as "Rejected Load Procedures", state assigned identification numbers fest forms, etc., can be obtained by contacting the Michigan Department of Environmental Guality (MDEQ), Waste Management Division's (WMD) Internst Flome Page at: http://www.deq.state.mi.usiw.md.or.you.may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEO.

Complete all floms on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Rem 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested ship-ments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Rem 2. Page number 1 of 1 should be recorded unless a continuation sneet is used, in which case the total number of pages, counting the initial manifest page, should be shown

filem 3. Enter the name of the generator and the mailing address to which the manifest should be mailed If the address of the site at which the waste was placed into transportation is different from the making address record the site address in Item J.

Rom 4. Enter a telephone number (including area code), where an authorized agent of the generator can be reached in the event of an emerger by and/or a partial or total rejected load

NOTE: The 24 hour emergency phone number required for a hazardous materials shocing paper may be different from the generator's phone number

Rem 5. Enter the company name of the first transporter who will transport the waste

item 6. Enter the transporters U.S. EPA, twerve digit identification number. For Part 121 man firsted shipments where a transporter does not have a U.S. EPA assigned number, a state ansigned number is to he used

Rem 7. If using a second transporter, enter the company name

Rem 8. Enter the second transporter's U.S. EFA, twelve digit identification number. For Flund 123 manufested shipments where a transporter is well not national 0.5. EFA, and prediction in the contract and promise. number is to be used.

NOTE: If more than two transporters are used, the generator or toird transplatter shall inflate a continuation sheet. In item L of the continuebon sheet, the generator/transporter must copy the State manufact document number fisted in hem A. Every transport company used between the generator and the designed facility (except for intermediate ray of partie transporters used between the entiairs list barne carriers and signated facility) must be listed. This is not intended to require multiple signatures for individual drivers working for one transporter. Item 2 is to be changed to reflect the added page (s). Continuation sheets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on

Item 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in Item 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

from 11. Enter an X in the HM box if the waste is a hazardous material regulated by U.S. DOT (See 49 CFR 172) Enter the required U.S. DOT shipping description, including Proper Shipping Name, Hazard Class or Division, ID Number (UNINA), and cacking group for each waste as identified in 49 CFR 172 Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste

Rem 12. Enter the number of containers for each waste and the appropriate above visitor is harris below for the type of container. Each container type requires separate entry.

DM = Metal drums, berreis, keas

DW = Wooden drum, betreis kage

DF a Fiberboard or plastic drums, barre's keigs

DT = Dump Truck

TP = Tanks, portable

TT = Cargo lanks (tank trucks) TC = Tank cars

CY = Cylmders

CM = Metai boxes, cartone, cases (including rof-offs)

CW = Wooden boxes, cartons, cases

CF = Fiber or plastic boxes, cartons, cases

BA = Burlap, cloth, paper/plastic bags

Rem 13. Enter the total quantity of waste described on each line. Do not use the mais or hactions

Nem 14. Enter the appropriate abtireviation for the unit of measure listed below.

G = Gallons (liquids only)

P - Pounds

T x Tons (2000 to)

Y + Cubic Yards L = Liters (liquids only)

K = Kiograms

M = Metric tone (1000 kg)

N = Cubic meters

MOR 000407

But 15. The generator may use this space to indicate special transportance. The period plagage of disposal information is moort Export information as noted in the finite mations. Since any instructions section is to the raco ged here

from 16. The generator must read, print his beridame is an and dare the certification statement

ftem 17. Printine name at the genson actioning the wayre of behalf sits diffrattransporter. That person must acknowledge acceptance of the waste describe, on the munifies by signing and entering the date of repeipt.

Ram 18. If applicable, print the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by agong and entering the date of receipt

from 19. An authorized representative of the designated (or alternate) facility must corp in this space any

Item 20. Print the name of the person accepting the waste on behalf of the designated facility. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

NOTE: MDEC "Rejected Load Procedures" provides guidance for partial or total load, rejections

Only the following information in the shaded area is a State of Michigan requirement:

Item A. A preprinted State manifest document number

from B - H. May be required by other states.

Item 1. For hazordous wastes, lenter the appropriate waste numbers found in f829 9212 through f829 9214 of Part 111 and 40 CFR 261 Subparts Gland D. If note than one waste number is required to appropriately identify the waste, enter the additional numbers in item. In selecting the most appropriate waste number the following hierarchy must be used: acute weste (including P and acute F). U (raxid) is (specific sources), floh-adite **F (non-spec**ific sources) and D (of aracter slict). Share, regulated wastes to low the same hierarchy as federally regulated wastes. For Part 121 wastes which are non-nazaracus will like writer the appropriate code I stad below

INTERNATIONAL SHIPMENTS

Exports-Transporters must sign and enter the date the waste leaves the United States in Item 15. The primary exporter must identify the point of departure. from the United States.*

Imports: Shipments of hazardous and Part 121 regulated waster must be accompanied by a U.S. EFA form Hazardous Waste Manifest. Any person functioning as the U.S. Importer, as defined in Part 111, must complete the manifest as required in R299 9310 *

*Transporters of hazardous waste chipments must deliver a copy of the manifest to U.S. Custo his when importing or exporting the waste across U.S. borders. Record the foreign waste manifest document number in Hom 15

MANIFEST DISTRIBUTION

GENERATOR: Upon plecing the waste into transportation (first transporter signs and dates manifest) remove the white and gold banded copies and give the remainder of the manifest copies to the transporter. Solid the white copy to MDEO no later than the let It day of the month (nowing the ship pinet). For ship prients of wastes being transported to a designated facility outside of Motigan when an out-of-state manifest is used, mail to the MDEO a photocopy of the manifest when the shipment is placed into transportation and mail a photocopy of the second generator manifest copy, when race yed

TRANSPORTER: Upon delivery to the designated (or alternate) tablity, and that facility signs and dates the manifest, the canary banded copy will be returned to you. If more than one transporter is used, the mainfest is to be copied and supplied to the previous transporter acknowledging the receipt of the shipment by the next transporter. The canary banded copy stays with the manifest until the empirement reaches. the designated facility

DESIGNATED FACILITY: Upon signing and dating the manifest as received, give the canary banded copy to the transporter. Peturn the this banded copy to the generator. Mail the pink banded copy to the MDEQ no later man the 10th day of the month following receipt of shipment.

ADDRESS ALL INDEQ MANIFEST COPIES TO:

WASTE MANAGEMENT DIVISION MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY PO BOX 30038 LANSING MI 48909-7638

The public reporting burden for this collection of information is estimated to average 31 minutes for generators, 16 minutes for transporters and 16 minutes for treatment, storage and disposal facilities. The record likesping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities. The burden associated with reading the regulations is estimated at 1 flour and 15 minutes annually. Burden means the total time, effort, or financial resources expended by persons to generate, mantain, retain, or dispose or provide information to or for a Federal agency.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it deplays a currently valid CMB control number. The GMB numbers for EPA's requirations are fater in 40 CPR Plant 9 and 48 CPR Chapter 15. Send comments regarding these burden statements or any other aspect of this collection, including suggestions for reducing the burden, including through use of automated collection fater on the Director, CPPE Regulatory Information Division, U.S. Environmental Protection Agency (2.37), 401 M St., S.W., Washington, D.C., 20480 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention; Desk Officer for EPA, 725 17th Street, N.W., Washington, D.C., 20503. Include the OMB control number in any correspondence.

READ ALL INSTRUCTIONS BEFORE COMPLETING THIS FORM.

Federal regulations require generators and transporters of hazargous maste and owners and operators of hazaruous wasie treatment, storage, anni disposal facilities to use this light (8700-22) for both inter and mtrastate transportation

State regulations require this manifest to be used for the transportation of (1) all hazardous western managed under Part 111 of Act 451 of 1994 as unrended and (2) all iguid industrial waste (including those reclaimed, or lacycled) under Part 121 of Act ab1 or 1994 is amended

Forms can be obtained by calling Michigan Department of Natural Pisources (MDNP) Waste Manager ment Division at (517) 373-2730.

GENERATOR INSTRUCTIONS

Hem 1. For shumers of regulated quantities of hazardous visite eries your U.S. EPA twicke digit identification rember. To receive an EPA ID number, a not fication or haza does made activity. EPA Form 8700-12 must be submitted to the EPA

Enter a unique, from digit number to the maintest document number space, it've suggest that you start with 00001 and progress to 99999 to

For an Act 130 liquid industrial waste evey, a Michiga (ID during) may be used in place of the EPA ID number. To obtain a Michigan to number coll MDNR Waste Management Division at (C17) 373-2730

The Michigan ID Humber cannot be used by generator: of RCRA hazaruous wastes.

Norm 2. If a continuation sheet is used leafer the challenger of sweets here it published to preed is used way when three or more transporters will all to the burshoot the stip lead or all of a cases, enter Dige e

Hem 3 Futer your name and mailing address. The address struid on the location that will manage the returned manifest form.

Hem 4. Filter a telephone number where your entriences age to value or when 24 hours addy in the event of an improvence

Hom 5. Enter the company name of the first transporter. The entragency the sact

ttem 6. Enter the C.S. EPA or Michigan methe door rienthication comber or the first Car uporter ideals. field to Hein Sight the supplier is not included specific or and Sigher filt matter our groups and

Hern 7. Enter the company name of the satural transport of the low transport the wast. If acuricable

from 8 letter the U.S. EPA or Michigan of the dust identification running of the canonil Lansport identi-561 m desa 7

if three or more transporters are used you must use an EPA form 8700 22A congruention shart to iden tily an additional transporters. This is the only situation where a continuation sheet is to be used. You must indicate the transporter's company name and district Archingan page-dust identification number in Items 24-27 on the continuation sheat

Photo copy the configuration sheet and distribute copies just as you do the mannest risk bisce the Confided document delinfer from Rein A of page 1. in the n C of the continuation sheet, in addition to proper signatures where needed, these are the only items to be completed on the country tion towers NOTE: been, transporter used netwise the cenerator and the designs of facility must be inter-

Item 9. Enter the company name and site address of the facility designated to receive the waste listed on this munitest. The address must be the site address in not may defer from the company making address.

Itom 10. Enter the U.S. EPA or Michigan twelve digit identification number on the nest nated facility ident her in item 9

from 11. Enter an X in the HAI box 1 the waste 3.0 hazarrious metaral registered by G.S. DOT (see 49 CFR 172 201)

First the U.S. 201 Proper Shipping Finne, Hazaro Class, and the BOT ID (LIBNA) number for each #38le as identified in 49 CFR 171 through 177, and (Ei), when required

if the liver space to fish additional waste types and take mandestr to complete the wasta listings for your sharpest. Each mandest used should be committed in its entirely. You nite not use combination sheets to ist artainonal waste shipments.

WASTE BEING TRANSPORTED TO AN OUT-OF-STATE FACILITY MUST BE PROPERLY CHARACTERIZED TO DETERMINE IF IT IS A HAZARDOUS WASTE IN THAT STATE. ANY WASTE WHICH IS DETERMINED TO BE A HAZARDOUS WASTE IN THE RECEIVING STATE MUST BE APPROPRIATELY IDENTIFIED IN ITEM J.

Horn 12. Enter the number of containers for each state and the appropriate abbreviation for the type of container

DM - Metal droms, barre's kegs

DW = Wooden drums, barrels kegs

DF = Fiberboard or plastic drims, barrets keys TP = Tanks portable

TT - Carno tanks (tank trucks) TC - Tank cars (railroad cars)

OT _ Dump truck

CY = Cylinders CM -Metal boxes nartons cases

(including rate offs) CW . Wooden boxes cartons cases

CF -Fiber or plastic buxes, cartons, cases BA - Burtan cloth paper or plastic bags

illem 13. Enter the total quantity of wrists described on each line. Use whole numbers only, do not use necima, numbers or fractions

from 14. Enter the appropriate abbreviation for the unit of measure:

6 . Gallons (liquids only) L = Lifers (liquids only) P w Pound; K - Kilograms 1 = lone (2000 tbs.) M - Metric tons (1000 kg) Y - Unbic vards N + Cubic melers

Hem 15, indicate any special transportation. Bill of Ending, treatment, storage or disposal information. For shipments of hazardous waste from the U.S. destined for treatment, storage or disposal outside the jurisdiction of the United States, generators must enter the count of departure (City and State)

item 16. The generator must read sign (by hand) and date the certification statement it a mode other than high vay is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air; at serted directly below the bises out word. If another mode in addition to the bigging mode is used emithe appropriate additional mode (e.g., and rail) in the sumi location

Item A. Miningan has preprinted the State maintest decument number, to assure a unique number to

Items B - H. Not required to be completed under Mr. (2.9) for This information may be required by this generator state of the waste was generated in a state other than Michigan

Hem 1 For hazardons wastes, enter the hazardous maste number R299 9210 thru R299 9214 of the Michigan Administrative Code, or 40 CFR 261. If more than one waste number is required to pregnatory identify the suste enter additional numbers in thim of for figure industrial wastes which are not regulative by RDEA of Part 111 of Act 451, 1994, as amended enter the most appear rate is incorporate from Taylor a ded in most instructions.

N/H Column

For Jaco sporte listed, pill an N in this column if the posser can also be a door, and industrial waste in a confrequences because waste. Put only on this color of the captures angulary hazardous waste unit BOBA Medita

General Instructions

Read with natives one service completing this force. This to be hus been designed to like on a fix pilon of felhypewriterroomspuriar printer, a tirm boint pan may a so be used it press gliver hard. Ensure all coskes are 19.75 B.

Federal and state regulations require generalities and transporte a of haza discs wildle. In tilt which or quelato is at riarardicus waste treatment ist rage, and disposal turviliase to use this form (8700-22) and if medissary, the continuation sheet (Form 670C-22A) for both interior programme transportation of hazard our weste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also require the use of this manifest for all regulated shipments of figure industrial wastelesined, medicinal 121 of Act 451 of 1994, as amended (Part 121)

Federal and State regulations provide for additional requirements not included in these instructions, regarding the use and management of this form (40CFR, 46CFR, Part 111, Part 121)

Additional information such as "Rejected Load Procedures", state assigned, dentification numbers, manitest forms, etc., can be obtained by contacting the Michigan Department of Environmental Quality (MDEQ), Weste Management Division's (WMD) Internet Home Page at: http://www.deg.state.mi.us.wmd.or.you.may contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEQ

Complete all items on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

from 1. Enter the generator's U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (a.g. 00001).

Item 2. Pean number 1 of 1 should be recorded unless a continuation sheet is used in which case the total furnition of pages, counting the initial marriest page, should be shown

Ram 3. Enter the name of the generator and the mailing address to which the manifest should be mailed. If the address of the site at which the waste was placed into transportation is different from the making address record the site address in Item J

Rem 4. Enter a telephone number (including area code, whore an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load.

NOTE: The 24 hour emergency phone number required for a hazaroous materials structing paper may be different from the generator's phone number

Rem 5. Enter the company name of the first transporter who will hansport the waste

flom 6. Emer the transporter's U.S. EPA twelve digit identification number. For Part 121 manifesting shipments where a transporter does not have a U.S. EPA assigned in their, a state assigned in their a to

Rem 7. If using a second transporter, enter the oppingary name

Rem 8. Enter the second fransporter's U.S. EPA, twelve digit identification number. For Fig. 1.20. fested shipments where a transporter oces for have a U.S. EFA, assigned number is single conjust. number is to be used.

NOTE: If more than two transporters are used the generator or third transporter shall impute a point of above sheet. In nem L of the continuation sheet, the generalogyanaporter must copy the State manifest document number lated in herr. A. Every transport company used between the generator and the designed facility (except for intermediate rail of panje transporters used between the initial rail or transporters and the designated facility) must be listed. This is not intended to require multiple signatures for interitial drivers working for one transporter. Item 2 is to be changed to reflect the added page(a). Communition sheets must be appropriately completed in their entirety and properly distributed. Continuation ensets may not be used to list additional waste streams.

Stam 9. Enter the company name and site address of the facility designated to receive the waste listed on

m 10. Enter the U.S. EPA twelve digit identification number for the designated facility described in ham 9. For Part 121 manifested shipments where a designated facility does not have a U.S. EPA assigned stumber, a state assigned number is to be used

from 11. Enter an X in the MM pox. If the waste is a hazardous motor of regulated by U.S. DOT. (See 49) OFR 172). Enter the required U.S. DOT shipping description, including Proper Stipping fearle, Hazard Class or Division, 10 Number (UNNA), and backing group for each waste as delittled in 43 CFR 172. Additional information may also be required in this space, including rechnical name and reportable grantity. references. For only Part 121 regulated wastes include an appropriate shipping description for the waste STORM

Rem 12. Enter the number of containers for each waste and the appropriate above violibris listed below to the type of container. Each container type requires separate entry

DM = Metal drums, berrets, kegs

DW - Wooden drum, barrels, kings.

DF - Fiberboard or plastic drums, barrels, kegs

DT - Dump Truck

TP = Tenks, portable

TT = Cargo tanks (tank trucks)

TO a Tank care

CV - Cylinders

CM = Meta, boxes, cartons, cases finduding roll-offs)

CW = Wooden boxes, cartons, cases

OF a Riber or plastic boxes, carryin cases

BA = Burlap, cloth, paper/plastic tiegs

from 13. Enter the total quantity of waste described on each line. Do not use decimals or fractions

from 14. Enter the appropriate abbreviation for the unit of measure I sted below.

G - Gallons Alguida onlid

~ Pounds

T = Tons (2000 tb)

Y - Cubic Yards L = Ligers (Liquids aniv)

K » Kuograms

M = Metric tons (1000 kg)

N = Cubic meters

Flead all instructions before curic, enlight is form. This form has been design in the least to be that \$2 problet to typewiner/computer printer, a firm point per may else be used i press delikit halid. Ensure all colles are eu de.

Problem and state regulations reculan generators and transporters of figuratious waste and owners or operations of the products waste treatment of prage, and disposal rapidities to use this turnitipation(20) and if necessary, the communition sheet (Form 8700-22A) for both intervand intractive transportation of hazard ous waste as defined in 40 CFR and Part 111 of Act 451 of 1994, as amended (Part 111). State regulations also requite the use of this manifest for all regulated shipments of bould industrial waste as required in Part 171 of Act 451 of 1994, as amended (1991 121).

Federal and State regulations provide for additional requirements, not included in these instructions, regarding the use and management of this form (40CFR, 42CFR, Part 111, Part 121).

Additional information such as "Rejected Load Procedures", state assigned electrical on numbers, fest forms, etc., can be obtained by contacting the Michigen Department of Environmental Quality (MDEQ).

Waste Management Division's (WMD) Internet Home Page at: http://www.deg.state.ms.us/wmd.or.you.me/ contact the Manifest Unit directly at (517) 373-1217. Continuation sheets are not supplied by MDEG.

Complete all fleme on the manifest. Enter "N/A" if any item does not apply. Leave items that may be needed later blank, such as second transporter.

Item 1. Enter the generators U.S. EPA twelve digit identification number. For Part 121 manifested shipments where a generator does not have a U.S. EPA assigned number, a state assigned number must be obtained and used. The generator of the waste must enter a unique five digit manifest document number (e.g. 00001).

Nem 2.: Page number 1 of 1 should be recorded unless a continuation sheet is used in which case the total number of pages, counting the initial manifest page, should be shown

Nem 3. Enter the name of the generator and the mailing address to which the manifest should be mailed If the address of the site at which the waste was placed into transportation is different from the mailing address record the site address in Item J.

Item 4. Enter a telephone number (including area code) where an authorized agent of the generator can be reached in the event of an emergency and/or a partial or total rejected load

NOTE: The 24 hour emergency prions number required for a hazargous materials shipping paper in ay two different from the generator's phone number

Rem S. Enter the company name of the first transporter who we transport the way.

Hern 6. Enter the transporter's U.S. EPA twelve digit identification number. For Part 121 man fested ments where a transporter thesinot have a U.S. EPA assigned non-trainal state assigned no interest to be used.

from 7. If using a second transporter, enter the con pany name

Rem 8. Enter the second transporters u.S. EPA, twoive digit identification number. If we uit that the fested shipments where a bansporter dues out have a Life EFA lausigned ribinber le sture essigned. number is to be used

NOTE: if more than two transporters are used, the generator or hard transporter shall in hats a combination sheet. In item i, of the communition sheet, the generator/transporter must copy the State manifest room ment number listed in Item A. Every transport company used between the generator and the designed facility (except for intermediate ref or barge transporters used hetween the initial rail or barge carriers and the designated facility) must be listed ^ans is not producto require in Utplais gruppios for includa drivers working for one transporter, item 2 is to be changed to reflect the added page(s). Continuation sets must be appropriately completed in their entirety and properly distributed. Continuation sheets may not be used to list additional waste streams.

from 9. Enter the company name and site address of the facility designated to receive the waste listed on the menitest

m 10. Enter the U.S. EPA twalve digit identification number for the designated facility described in Item 9. For Pert 121 manifested shipments where a designated facility does not have a U.S. EPA assigned number, a state assigned number is to be used.

Rem 11. Enter an X in the HM box, if the waste is a hazardous material regulated by U.S. IXXI. (See 49. CFR 172) Enter the required U.S. DOT shipping description or banking Proper Shipping Name, Hazard Class or Devision (D.Number (UNNA), and packing group for each waste as identified in 49 CFR 172. Additional information may also be required in this space, including technical name and reportable quantity references. For only Part 121 regulated wastes include an appropriate shipping description for the waste

item 12. Enter the number of containers for each waste and the appropriate abbreviations listed below for the type of container. Each container type requires separate entry

DM = Metal drums, barrels, kegs

DW = Wooden drum parreis, kegs

DF = Fiberboard or plastic grums, barrels, kegs

DT = Dump Truck

TO . Terks, contable

TT - Cargo famile frank trucks) TC = Tank care

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL — (Initial Waste Generator Only) —

1 am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME L More	ey Corp.			D. NUMBER LL	pρ ₁ 2 ₁ 5 ₁ 4 ₁	1,5266
EWR STREAM NO.L 21226	MANIFEST	NO. LILTL	[(())	Line No. 🏚 1a	11b11c	☐ 11d

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous not a continuous) storial elegand of avenue or reclaimed in Illinois; and for all shipments originating in Illinois and destined for that of the do not grief and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For this result is infrared to the following the first of the following the first of the following the first of the following the first of the requires copies of the manifest, a photocopy of part I should be used.

INSTRUCTIONS TO GENERATORS (Please type)

- Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator
- 2. Enter total number of pages comprising this Manifest.
- Enter generator's name and mailing address. If iocation of waste generation is different from mailing address, enterlocation to the right of mailing address.
- 4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- Enter the generator's Illinois EPA ten digit identification
- 5, 6. For the first transporter who will transport the waste, enter the
- C. D. company name, USEPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) Permit number, toto telephone number where an authorized agent of the transported may be reached in the event of an emergency
- 7, 8, If applicable, enter the information requested for the second
- E, F. transporter who will transport the waste.
- 9, 10, For the facility designated to receive the waste, enter company
- G, H. name, address, USEPA ID Number. Blinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- Enter the US DOT Proper Shipping Name, Hazard Class. and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT"
- 12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container.

CM = Metal boxes or roll offs DM = Metal drums

CW - Wooden boxes

OW 5 Wooden drams

CF = Fiberboard or plastic bags DF = Fiberboard or plastic drums

BA = Burlap, cloth, paper or plastic bass.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

- (Initial Waste Generator Only) -

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME Morey Corp. GEN. EPAI.D. NUMBER L.D. 0 12 15 14 1 1 1 52 6 6 1

Facility Owner or Operator: Certification of receipt of hazardous materials covered by this manifest except as noted in item 19. Date Printed/Typed Name Month Day Year Signature

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part I should be used.

INSTRUCTIONS TO GENERATORS (Please type)

- 1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
- 2. Enter total number of pages comprising this Manifest.
- 3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
- 4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification number.
- 5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- 7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.
- 9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- 11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
- 12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

DM = Metal drums CM =Metal boxes or roll-offs DW -Weeden drums CW = Wooden boxes DF = CF = Fiberboard or plastic drums Fiberhoard or plastic bags CY -BA = Burlap, cloth, paper or plastic bags Cylinders DT = Dump trucks 7T -Tank trucks Tanks recitable TC = Tank cars TP *

- 13. Enter the total quantity (gallons or cubic yards) of each waste
- 14. Enter G if quantity is in gallons or Y if quantity is in cubic yerds. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.
- I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).
- J.K. If needed, enter additional description or information/instructions for the material listed in item 11.
- 15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment storage, or disposal outside the jurisdiction of the United States in this space.
- 16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the ord "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another used in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt.

UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

- The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any aigmificant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the state actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Return copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL — (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME Morey Corp. GEN. EPA I.D. NUMBER I L D 0 12 15 14 1 1 52 6 6 1

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part I should be used.

INSTRUCTIONS TO GENERATORS (Please type)

- 1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
- 2. Enter total number of pages comprising this Manifest.
- Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
- 4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification number.
- 5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- 7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.
- 9.10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- 11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
- 12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM = Metal boxes or roll-offs DM -Metal drums DW = CW = Wooden boxes Wooden drums CF = Fiberboard or plastic bags DF = Fiberboard or plastic drums CY =BA = Burlap, cloth, paper or plastic bags Cylinders DT -14L = Tank trucks Dump trucks TC -TP = Tanks portable Tank cars

- 13. Enter the total quantity (gallons or cubic yards) of each waste.
- 14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.
- I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).
- J.K. If needed, enter additional description or information/instructions for the material listed in item 11.
- 15. Moveded, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment storage, or disposal outside the jurisdiction of the United States in this space.
- 16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt.

UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

- 19 The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725 172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must sukmowledge acceptance of the waste by signing and entering the date of receipt.

Ketain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for transporters, and 10 minutes for transporters, and 10 minutes for transporters, and 10 minutes for transporters, and 10 minutes for transporters, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL — (Initial Waste Generator Only) —

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

This Agency is authorized to require, pursuent to Minois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed \$25,000 per day of violation. Failaffication of this information may result in a fine up to \$50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and conferences) storad, disposed of the and or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that I was gried and supply the form PIMW (Potentially Infectious Medical Waste) requires a differe a manifest. For ships one of the control of the contr requires copies of the manifest, a photocopy of part I should be used.

INSTRUCTIONS TO GENERATORS (Please type)

- Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (e.g. 00001) by the generator.
- Enter total number of pages comprising this Manifest.
- Enter generator's name and mailing address. If location of waste generation is different from mailing address, enterlocation to the right of mailing address.
- Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification
- 5, 6. For the first transporter who will transport the waste, enter the
- C, D. company name. USEPA ID number, Phronis EPA four digit Special Waste Hauling (SWH) Permyt ausgber, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- 7, 8, If applicable, enter the information requested for the second
- E, F. transporter who will transport the waste.
- 9, 10, For the facility designated to receive the maste, enter company
- G, H, name, address, USEPA ID Number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT".
- Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

CM = Metal boxes or roll offs <math>DM = Metal drums

CW = Wooden boxes

DW - Wooden druins

CF = Fiberboard or plastic bags | DF = Fiberboard or plastic drums

BA = Burlap, cloth, poper or plastic bags,

CY = Cylinders

TT = Tank Trucks

DT = Dump tasels.

TP = Tanks pertable

TC = Tank cars

Enter the total quantity of each waste.

13. Enter unit of measure from list below:

> G = Gailous P = Founds T = Tons A self-inte Yards f = Liters Elizabelografiis M = Metric tons is a Cubic meters

Enter the EPA 4 digit Hazani ias Wasie Number, it waste is a mixture of listed and characteristic wastes, the listed waste must be entered a other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization)

- number for the sorte scream classe numbers are specific for each waste scream and companies, and are obtained from the receiving facility) (leave blank for waste going our of Illinois).
- J. K. If needed, enter adilition if deviation or international instructions for the material listed in Item 11.
- If needed indicate special transport tion, treatment, storage, or disposal information, or Bill or Lading information. For international shipments generators must each the point of departure (City and State) for shipments destined for treatpart storage, or dispositions of the Chief States in this space.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois: and for all shipments originating in Illinois and destined for states that do not print and supply the form. FIME (Presidentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part I should be used.

INSTRUCTIONS TO GENERATORS (Please type)

1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.

2. Enter total number of pages comprising this Manifest.

- Enter generator's name and mailing address. If location of wests generation is different from mailing address, enter location to the right of mailing address.
- Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.

B. Enter the generator's Illinois EPA ten digit identification number.

5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.

7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste.

- 9,10,G,H. For the facility designated to receive the wests, order company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- 11. Enter the US DOT Proper Shipping Name, Harard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrose inot instantable by DOT."

12. Enter the number of containers for each waste and the appropriate abbreviations for the type of container:

Metai boxes or roll-offs UN a Metal drums CM = DIIWooden drams CW = Wooden boxes 1575 6 CF = Fiberboard or plastic bags Fiberboard or plastic drums BA = Burlap, cloth, paper or plastic toes Cylinders 71 = Dump trucks Tank tracks DT = (3° -Tanke portable TC = Pank cars

13. Enter the total quantity (gallons or cubic yards) of each works

14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.

I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).

J.K. If needed, enter additional description or information/instructions for the material listed in item 11.

15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for the eatment storage, or disposal outside the jurisdiction of the United States in this space.

16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17.18. The person accepting the waste on behalf of the transporter must ecknowledge acceptance of the waste described on the Manifest by eigning and entering the date of receipt.

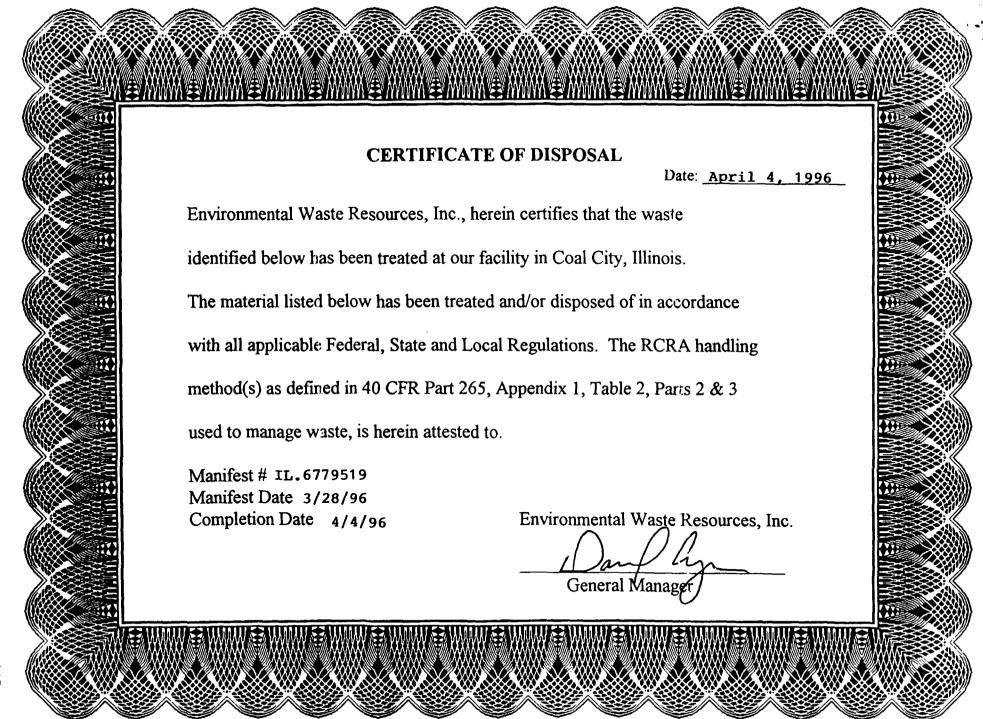

UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO GWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

- 19 'The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 III. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20 Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Recause copy $S_{\rm esc}$ all copy T to the generator, and send copy 2 to Winois EPA (within 30 days of the delivery).

Public recording burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503

Date Month Day

Year

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and nonhazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. FOON (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS (Please type)

- Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this
 Manifest (eg. 00001) by the generator.
- 2. Enter total number of pages comprising this Manifest.
- 3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
- 4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification number.
- 5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- 7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the waste
- 9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- 11. Enter the US DOT Proper Shipping Name. Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase 'not hazardous by DOT."
- 12. Enter the number of containers for each waste and the appropriate abbreviations for the type of containers

Metal boxes or roll-offs L·M -Metal drums CM =CW = Wooden boxes DW = Wooden drums DF = CF = Fiberboard or plastic drums Fiberboard or plastic bags Burlay, of the paper or plastic bags UY = Cylinders BA = DT =Dunn trucks TT = Tank trucks TC = Table cers Ψp → Tanks portable

- 13. Enter the cotal quantity (gallons or cubic yards) of each waste.
- 14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.
- I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).
- J.K. If needed, enter additional description or information/instructions for the material listed in item 11.
- 15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For informational shipments, generators must enter the point of departure (City and State) for shipments destined for the transportation of the United States in this space.
- 15. For generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another under maddition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTEUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt.

UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

- 19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 III. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20 Print of type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must acknowledge acceptance of the waste by signing and entering the date of receipt.

Ketam ope 2, send copy 1 to the generator, and send copy 2 in Illianis EPA cuitium 30 days of the delivery).

Public reporting barden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

This Agency is authorized to require, pursuant to Binois Revised Statute, 1989, Chapter 111 1/2, Section 1004 and 1021, that this information be submitted to the Agency. Failure to provide this information may result in a civil penalty against the owner or operator not to exceed \$25,000 per day of violation. Fails/fication of this information may result in a fine up to \$50,000 per day of violation and imprisonment up to 5 years. This form has been approved by the Forms Management Center.

The Illinois Uniform Manifest must be used for all shipments of special wasts (hazardous and respectations) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used.

INSTRUCTIONS TO GENERATORS (Please type)

- 1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
- 2. Enter total number of pages comprising this Manifest.
- 3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, address, address.
- 4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may no reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification number.
- 5,6,C,D. For the first transporter who will transport the waste, enter the conspany name, US EPA ID number, the noise EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- 7,8,E,F. If applicable, enter the information requested for the second transporter who will transport the weeks.
- 9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, illipois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- 11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NAUN number) for each westere identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste, plus the phrase "not hazardous by DOT."
- 12. Enter the number of containers for each waste and the appropriate abbreviations for the type of containers

CM = Metal boxes or roll-offs DM = Metal druins CW = Wooden boxes DW = Wooden driving CF = Fiberboard or plastic bags DF = Fiberhoard of plastic drains BA = Burlap, cloth, paper or plastic bags CY = Cylinders DT = TT = Tank trucks Dump trucks TC = TP = Tanks portable Tank cars

- 13. Enter the total quantity (gallons or cubic yards) of each waste
- 14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.
- I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered other numbers should be listed in Section J. For nonhezardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specials for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).
- J.K. If needed, enter additional description or information/instructions for the material listed in item 11.
- 15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. Use international shipments, generators must enter the point of departure (City and State) for shipments destined to treatment storage, or disposal outside the jurisdiction of the United States in this space.
- 16. The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the word "highway" should be lined out and the appropriate mode (rail, water, or sir) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter mest acknowledge acceptance of the waste described on the Manifest by signing and autering the date of receipt UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility according to the second state of the second

INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

- 19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 or a significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20. Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That promote must acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EFA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing unsuredone, gethering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget Weshington, DC 20603.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

- (Initial Waste Generator Only) -

1 am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

- (Initial Waste Generator Only) -

1 am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

ſ							
GENERATOR'S NAME More	ey Corp.			D. NUMBER LL	P P 12 15 141	1 52 6 6

### NOTIFICATION FOR WASTES RESTRICTED FROM LAND DISPOSAL

- (Initial Waste Generator Only) -

I am supplying this notice and certification to Environmental Waste Resources, Inc. In accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME L MOTE	ey Corp.			D. NUMBER IL	D D 12 15 141	1,5266
EWR STREAM NO.L 21226	MANIFEST	NO. 1 <u>IL63</u>	85068	Line No. 🔯 11a		□ 11d

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and non-hazardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PINW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part I should be used.

### INSTRUCTIONS TO GENERATORS (Please type)

- Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this
  Manifest (eg. 00001) by the generator.
- 2. Enter total number of pages comprising this Manifest.
- Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
- 4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification number.
- 5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EPA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- 7.8.E.F. If applicable, enter the information requested for the second transporter who will transport the waste
- 9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- 11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
- 12. Enter the number of containers for each waste and the appropriate abbreviations for the type of containers

CM = Metal boxes or roll-offs

CW = Wooden boxes

DM = Metal drums

DW = Wooden drums

CF = Fiberboard or plastic bags DF = Fiberboard or plastic drums

- 13. Enter the total quantity (gallons or cubic yards) of each waste.
- 14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.
- I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).
- J.K. If needed, enter additional description or information/instructions for the material listed in item 11.
- 15. It needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For actional shipments, generators must enter the point of departure (City and State) for shipments destined for amment storage, or disposal outside the jurisdiction of the United States in this space.
- 16 The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the searchinghway should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another in which in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt.

UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

### INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL FACILITIES:

- 19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 any significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the maste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20 First or type name of the person accepting the waste on behalf of the owner or operator of the facility. That person must be acceptance of the waste by signing and entering the date of receipt.
- Restance of the delivery). Restance of the senerator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public a norting burden for this collection of information is estimated to average: 37 minutes for generators 15 minutes for transporters and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gathering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Date: July 12,1995

Environmental Waste Resources, Inc., herein certifies that the waste identified below has been treated at our facility in Coal City, Illinois. The material listed below has been treated and/or disposed of in accordance with all applicable Federal, State and Local Regulations. The RCRA handling method(s) as defined in 40 CFR Part 265, Appendix 1, Table 2, Parts 2 & 3 used to manage waste, is herein attested to.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and not included) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMW (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part 1 should be used. 

#### INSTRUCTIONS TO GENERATORS (Please type)

- Enter generator's USEPA twelve digit identification number and the unique five digit document number analogied to this Manifest (eg. 00001) by the generator.
- Enter total number of pages comprising this Manifest.
- Enter generator's name and mailing address I' location of waste generation is different from mailing address, enter location to the right of mailing address.
- Enter telephone number where an authorized agent of the generator, who has knowledge of the wasts, casy to reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification number.
- For the first transporter who will transport the waste, enter the company name, US EPA ID number, affire to EPA 5,6,C,D. four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- If applicable, enter the information requested for the second transporter who will transport the vester 7.8.E.F.
- For the facility designated to receive the waste, enter company name, address, US EPA ID number Allineis EPA 9,10,G,H. ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached
- 11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
- 12. Enter the number of containers for each waste and the appropriate abbreviations for the type of containers

CM =Metal hoxes or roll-offs

DM -Metal drums

DW = CW = Wooden drums Wooden boxes

DF -Fiberboard or plastic drums CF = Fiberboard or plastic bags

Cylindera CY = Burlap, cloth, paper or plastic bags BA =DT = TT =Tank trucks Dump trucks

TP =TC = Tank cars Tanks portable

- 13. Enter the total quantity (gallons or cubic yards) of each waste.
- 14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.
- Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered - other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).
- J.K. If needed, enter additional description or information/instructions for the material listed in item 11.
- 25. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For national shipments, generators must enter the point of departure (City and State) for shipments destined for ment storage, or disposal outside the jurisdiction of the United States in this space.
- my generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the send highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another tions in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO IEPA WITHIN 2 DAYS OF THE SHIPMENT

The person accepting the waste on behalf of the transporter must INSTRUCTIONS TO TRANSPORTER: 17,18. ncknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt. UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave remaining copies with the facility owner/operator.

#### Instructions to owners and operators of treatment, storage, or disposal facilities:

- 19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 and significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20. Print of type name of the person accepting the waste on behalf of the owner or operator of the facility. That needed must arknowledge acceptance of the waste by signing and entering the date of receipt.

Retain  $exp_{xy}$  3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average: 37 minutes for generators, 15 months for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instructions, gettle ering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs. Office of Management and Budget, Washington, DC 20503.

#### CERTIFICATE OF DISPOSAL

Date: October 30,1995

Environmental Waste Resources, Inc., herein certifies that the waste identified below has been treated at our facility in Coal City, Illinois. The material listed below has been treated and/or disposed of in accordance with all applicable Federal, State and Local Regulations. The RCRA handling method(s) as defined in 40 CFR Part 265, Appendix 1, Table 2, Parts 2 & 3 used to manage waste, is herein attested to.

The Illinois Uniform Manifest must be used for all shipments of special waste (hazardous and numberardous) stored, disposed of, treated or reclaimed in Illinois; and for all shipments originating in Illinois and destined for states that do not print and supply the form. PIMV (Potentially Infectious Medical Waste) requires a different manifest. For shipments not originating in Illinois, if the generator's state requires copies of the manifest, a photocopy of part I should be used.

#### INSTRUCTIONS TO GENERATORS (Please type)

- 1. Enter generator's USEPA twelve digit identification number and the unique five digit document number assigned to this Manifest (eg. 00001) by the generator.
- 2. Enter total number of pages comprising this Manifest.
- 3. Enter generator's name and mailing address. If location of waste generation is different from mailing address, enter location to the right of mailing address.
- 4. Enter telephone number where an authorized agent of the generator, who has knowledge of the waste, may be reached in the event of an emergency.
- B. Enter the generator's Illinois EPA ten digit identification number.
- 5,6,C,D. For the first transporter who will transport the waste, enter the company name, US EPA ID number, Illinois EFA four digit Special Waste Hauling (SWH) permit number, and telephone number where an authorized agent of the transporter may be reached in the event of an emergency.
- 7.8.E.F. If applicable, enter the information requested for the second transporter who will transport the waste.
- 9,10,G,H. For the facility designated to receive the waste, enter company name, address, US EPA ID number, Illinois EPA ten digit facility code number, and telephone number where an authorized agent of the receiving facility may be reached.
- 11. Enter the US DOT Proper Shipping Name, Hazard Class, and ID number (NA/UN number) for each waste as identified in 49 CFR 171 through 177. For wastes not regulated as Hazardous Materials by DOT, enter a description of the waste and the generic name of the waste, plus the phrase "not hazardous by DOT."
- 12. Enter the number of containers for each waste and the appropriate abbreviations for the type of containers

CM = Metal boxes or roll-offs

DM = Metal drums

CW = Wooden boxes

DW = Wooden drums

CF = Fiberboard or plastic bags

DF = Fiberboard or plastic drums

BA = Burlap, cloth, paper or plastic bags

CY = Cylindera

DT = Dump trucks

TT = Tank trucks

TC = Tank cars

TP - Tanks portable

- 13. Enter the total quantity (gallons or cubic yards) of each waste.
- 14. Enter G if quantity is in gallons or Y if quantity is in cubic yards. No other unit is to be used. To track weight if desired, enter pounds, tons or kilograms in Section J.
- I. Enter the EPA 4 digit Hazardous Waste Number: if waste is a mixture of listed and characteristic wastes, the listed waste must be entered other numbers should be listed in Section J. For nonhazardous special wastes, enter Class A. Enter the Illinois EPA six digit waste stream permit (authorization) number for the waste stream (these numbers are specific for each waste stream and companies, and are obtained from the receiving facility) (leave blank for waste going out of Illinois).
- J.K. If needed, enter additional description or information/instructions for the material listed in item 11.
- 15. If needed, indicate special transportation, treatment, storage, or disposal information, or Bill of Lading information. For international shipments, generators must enter the point of departure (City and State) for shipments destined for treatment storage, or disposal outside the jurisdiction of the United States in this space.
- 16. "The generator must read, sign (by hand), and date the certification statement. If a mode other than highway is used, the world "highway" should be lined out and the appropriate mode (rail, water, or air) inserted in the space below. If another mode in addition to highway is used, enter the appropriate additional mode.

GENERATOR: RETAIN COPY 6 AND MAIL COPY 5 TO SEPA WITHIN 2 DAYS OF THE SHIPMENT

INSTRUCTIONS TO TRANSPORTER: 17,18. The person accepting the waste on behalf of the transporter must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt UPON DELIVERY OF WASTE TO FACILITY, retain copy 4 and leave completing copies with the facility symmetric particle.

#### INSTRUCTIONS TO OWNERS AND OPERATORS OF TREATMENT, STORAGE, OR DISPOSAL PACHALIBES.

- 19. The authorized representative of the designated (or alternate) facility's owner or operator must note in Item 19 may significant discrepancy (as defined in 35 Ill. Adm. Code 725.172) between the waste described on the Manifest and the waste actually received at the facility. Reference the discrepancy by line A, B, C, or D.
- 20 Print or type name of the person accepting the waste on behalf of the owner or operator of the facility. That present renational acknowledge acceptance of the waste by signing and entering the date of receipt.

Retain copy 3, send copy 1 to the generator, and send copy 2 to Illinois EPA (within 30 days of the delivery).

Public reporting burden for this collection of information is estimated to average 37 minutes for generators 15 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. This includes time for reviewing instance and evident spain ering data, and completing and reviewing the form. Send comments regarding the burden estimate, including suggestions for reducing this burden to: Chief, Information Policy Branch, PM-223, U. S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20480; and the Office of Information and Regulatory Affairs, Office of Management and Reduct The United Street DC 20503.

-- (Initial Waste Generator Only) --

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

I am supplying this notice and certification to Clayton Chemical Co in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

- (Initial Waste Generator Only) -

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on land disposal for this material.

GENERATOR'S NAME MOT											
EWR STREAM NO.L 21226	MANIFEST	NO. LIL63	85319	Line No. 🔯 11a	□11b □11c	□ 11d					
PROHIBITIONS AND RESTRICTIONS	Complete a column f	or each waste number	used to Identify the wa	ste, as applicable, by c	ompleting blocks and	checking (🗸) boxes.					
1. U.S. EPA Waste Number:	D001										
1a. Fermer USEPA Waste Numbers: (II proviously treated to remove bazzardous characteristic)		,									
2.Subcategory:	High TOC Ign. Liq.										
3. Treatability Group:  • Wastewater  • Non-Wastewater											
4. Fer F001-F005, D001 (DEACT enly), and D012-D043 wastes, list all hazardous constituents.											
5. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing =1,000 ppm Appendix 80 HOCs for which specific treatment standards do not apply: (CMRST)											
6. This waste is subject to a treatment standard under 40 CFR 258.40; • Waste Requires Treatment • Waste Does Not Require Treatment	<u> </u>										
7. This waste is subject to a prohibition under 40 CFR 268.32(a) or RCRA Sec. 3004(d): (California List prohibitions)											
8. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(c).											
9. This waste is hazardous debris subject to 40 CFR 268.45. (over 50% of waste is debris)											
10. This waste is subject to an exemption from treatment under:  a national capacity variance  a Case-by-case extension  40CFR258.6	000		0	000							
The exemption expires esc											
ADDITIONAL REQUIREMENTS	Check all that apply, a	ad follow instructions.

- (Initial Waste Generator Only) -

I am supplying this notice and certification to Environmental Waste Resources, Inc. in accordance with the requirements of regulations at 40 CFR 268.7 I have determined that the material described below is a restricted waste as defined in 40 Part CFR 268. I have indicated below the type of material which is covered by this notification. I have also indicated below the appropriate management required to comply with the prohibitions on lend disposal for this material.

GENERATOR'S NAME   Mor	ey Corp.			D. NUMBER LILL		
EWR STREAM NO.L	MANIFEST	NO. LILY81	05168	Line No. 🔀 11a	□11b □11c	☐ 11d
PROHIBITIONS AND RESTRICTIONS	Complete a column fo	or each waste number i	used to identify the wa	ste, as applicable, by c	ompleting blocks and	checking (🗸) boxes.
1. U.S. EPA Weste Humber:	D001					
2. Subcategory:	Ign. Liq. High TOC					
3- Treatability Group:  • Wastewater • Non-Wastewater	, ם					
4. This waste is subject to a treatment standard under 40 CFR 268.41(a):  • Waste Requires Treatment  • Waste Dees Not Require Treatment						
5. This waste is subject to a treatment standard under 40 CFR 258.42(a): (Include Technology Codes)	FSUBSINCIN RORGS					
6. This waste is subject to a treatment standard under 40 CFR 268.42(a) for wastes containing ≥1,000 ppm Appendix III HOCs for which specific treatment standards do not apply: (INCIN)		-				
7. This waste is subject to a treatment standard under 40 CFR 268.43(a):  • Waste Requires Treatment  • Waste Dees Net Require Treatment						
8. This waste is subject to a prohibition under 40 CFR 258.32(a) or RCRA Soc. 3004(d): (California List prohibitions)						
9. This waste is a Lab Pack subject to the alternative treatment standard under 40 CFR 268.42(a): (INCIN)  Appendix IV (organometallic lab pack)  Appendix V (organic lab pack)						ļ
10. This waste is hazardous debris subject to the alternative treatment standard under 40 CFR 268.45(a);						
11.(Reserved)						
12. This waste is subject to an exemption from treatment under:  a national capacity variance  a Case-by-case extension  (reserved)	000					000
The exemption expires on:
